OUR LINCOLN DOOR. OAK VENEER. Described and Priced on Page 15.

Three beautiful colors in which this oak door may be stained and finished are illustrated above. To obtain these effects order the following materials, which are sufficient for finishing both sides. Complete directions are on the packages. For full information and complete instructions on how to finish woodwork, write for our Paint Color Book, sent free on request.

1 Pint Oil Stain (any color shown) 32c
1 Pint White Shellac, No. 30M2656 ..... 23c
1 Pound Paste Wood Filler, No. 30M2661 ..... 7c
1 Pint Turpentine, No. 30M3460 ..... 12c
1 Pint Outside Spar Varnish, No. 30M2722 ..... 33c
1 Brush, No. 30M3039, 2½-inch 41c

OUR TWO-PANEL BIRCH VENEERED DOOR. Described and Priced on Page 16.

Three beautiful colors in which this birch door may be stained and finished are illustrated above. To obtain these effects order the following materials, which are sufficient for finishing both sides. Complete directions are on the packages. For full information and complete instructions on how to finish woodwork, write for our Paint Color Book, sent free on request.

1 Pint Oil Stain (any color shown) 32c
1 Pint White Shellac, No. 30M2656 ..... 23c
1 Pint Outside Spar Varnish, No. 30M2722 ..... 33c
1 Brush, No. 30M3039, 2½-inch 41c

For finishing birch natural, give the surface a coat of boiled linseed oil thinned down with a little turpentine. Process from here on is same as for the stained finishes.

If the door is to be used outside and exposed to the weather, apply our Outside Spar Varnish No. 30M2722, pint 33 cents. If inside, use Interior Spar Varnish No. 30M2719, pint 30 cents.

QUALITY GUARANTEED

QUALITY GUARANTEED

THE INDEX IS ON PAGE 10

WE GUARANTEE that the lumber and mill work specified and priced on this order, as well as every other item listed and illustrated in our Building Material and Mill Work Catalog, will be exactly as represented.

WE GUARANTEE that the mill work will be found upon examination and comparison with similar material to be STRICTLY UP TO OR BETTER than the official grades adopted by the Sash, Door and Blind Manufacturers' Association of the Northwest, and the lumber to be graded strictly in accordance with Manufacturers' Grading Rules. This means that our lumber will be found better, grade for grade, than the lumber generally sold elsewhere.

WE GUARANTEE that it will be packed, crated or boxed in such a way that it will arrive at destination in FIRST CLASS CONDITION.

WE GUARANTEE to make PROMPT SHIPMENT of this order, excepting such items as are termed "Special," which are not carried in stock and which must be made special to your order. However, such items will be given special prompt attention. We will follow up the order from the moment it is placed with our sawmills and factory until it reaches destination.

WE GUARANTEE that after this shipment has been examined, if the material does not come up to the purchaser's expectations in every respect, by notifying us in writing it can be shipped back AT OUR EXPENSE and we will promptly RETURN THE ENTIRE PURCHASE PRICE and freight charges that may have been paid by the purchaser.

WE GUARANTEE to replace any item that may be damaged in transit or otherwise considered unsatisfactory, or to return the price of such item, as the purchaser may direct, upon receipt of the paid freight expense bill with a notation by the freight agent showing the damage incurred.

Read the testimonials from satisfied customers printed throughout this catalog. They bear testimony to the high quality of our mill work, to the saving that we have enabled them to make and to the prompt manner in which we have handled their orders.

A BIG ORGANIZATION AT YOUR SERVICE

When you write us about a plan or an estimate, your business will be attended to by ONE OF THE MOST EFFICIENT ORGANIZATIONS OF ITS KIND IN THE WORLD. We employ architects, draftsmen, estimators, pricers and correspondents to solve your building problems WITHOUT EXTRA CHARGE. Our Book of Modern Homes shows many styles of houses suitable for every section of the country. Almost every design has been proved a success. We guarantee our plans to be correct and, furthermore, we can change them to meet your own ideas wherever necessary. We make special plans to your order, if so desired, at a small cost, but recommend that you select a house from our Book of Modern Homes and secure PLANS, SPECIFICATIONS AND BILL OF MATERIAL WITHOUT EXTRA CHARGE. Write us for full information about the house in our Book of Modern Homes in which you are interested. Our architects and estimators are at your service.

WINDOW WAREHOUSE

A NEW FACTORY FULLY STOCKED FOR YOUR ORDERS

These are reproductions of actual photographs recently taken for the purpose of giving our customers a better idea of the tremendous stocks carried at our mill work factory **in readiness to ship at once.** Here you will find a larger stock of mill work than will be found carried under any one roof by any other retail dealer throughout the entire world. As shown in pictures, our mill work is carefully stored in dampproof, dirtproof, solid reinforced concrete buildings, assuring our customers of receiving only bright, clean stock, a far better grade than could possibly be furnished by smaller dealers who lack these facilities. Here you will find about 90,000 Doors, over 100,000 Windows, millions of feet of hard and soft wood Moldings and Columns, Newels, Stair and Porch Material; also Flooring in equally large quantities. These modern facilities and mammoth stocks make it possible for us to furnish you **extra good quality** and **extra quick service,** while our prices enable you to make **a substantial saving.**

BIG STOCKS—PROMPT SHIPMENTS

OUR GUARANTEE

You are protected in every way when you order Mill Work or other Building Material from this catalog. See facsimile of Bond of Indemnity on page 1. This binding Bond of Indemnity goes with every order.

OUR TERMS

1—Cash in full with the order. You need not hesitate about sending us the full purchase price because, if we do not satisfy you in quality, service and saving, you get your money back without question, together with any freight charges you paid, provided the material is returned.

2—Special C. O. D. Terms. While we do not recommend C. O. D. shipments, we will accept orders amounting to $50.00 or over for C. O. D. shipments when accompanied by the part payments shown below:

Send $15.00 with orders of $50.00 to $75.00.
Send $25.00 with orders of over $75.00 to $100.00.
Send $30.00 with orders of over $100.00 to $150.00.
Send $35.00 with orders of over $150.00 to $200.00.
Send 25% with orders of over $200.00; that is to say, one-fourth of the total amount of the order.

3—No cash with order. If you want to examine the materials before paying any money you can deposit the full purchase price in your local bank, and then send us the certificate of deposit stating that the money will be paid to Sears, Roebuck and Co. after you have examined the material and find it to be satisfactory. Upon receipt of the certificate of deposit we will ship the material to you, and if you believe it to be good value for the price you can instruct your bank to forward the money to us, otherwise you do not have to pay for it.

4—Pay for the material as the building goes up. If you are building by an arrangement with a bank or building and loan association, we will ship the material to you upon receipt of a letter from the bank or the building and loan association stating that payments for the material will be made at certain periods as the work progresses.

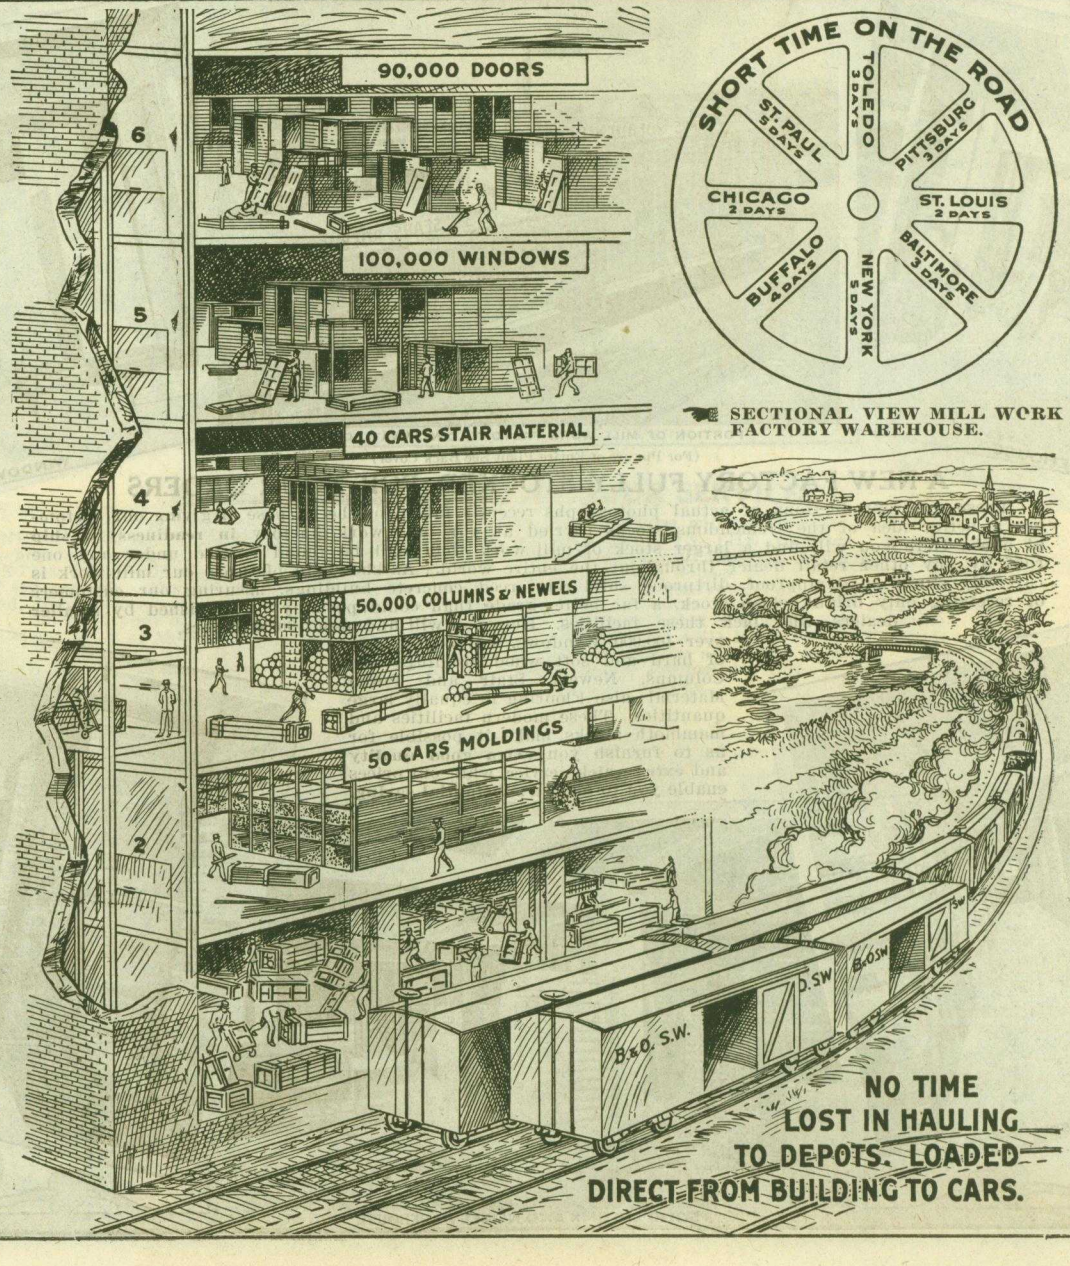
You surely will find one of these methods of payment satisfactory.

CARE IN PACKING

No concern takes better care in packing and crating material than we do. A tough grade of paper is used to cover our doors, balusters, newels, etc. All exposed parts are carefully protected by sound ½-inch lumber which will stand the rough handling in transit. All our mill work products are clean and bright, and easier to work than much of the material offered elsewhere.

FREIGHT RATES

Freight rates on building material are extremely low to almost every section of the country. (See pages 142 and 143 of this catalog for approximate charges to the principal points in every state.) You can figure very closely from these two pages just how much you will have to pay on any bill of material. Delivered prices quoted on request.



SECTIONAL VIEW MILL WORK FACTORY WAREHOUSE.

WHERE WE SHIP FROM

All mill work in this catalog, unless otherwise stated, will be shipped from our own big factory in Western Ohio, interior sections of which we show in this and on preceding pages. Note how material is shipped direct in box cars, promptly upon receipt of your order. See illustration in center of this page.

HOW TO ORDER

You can write out your order on the Special Mill Work Order Blank enclosed in this catalog or on a plain sheet of paper of any kind. Be sure to give the numbers as stated in the catalog, sizes and quantity required. **Always give width first.**

Send us your carpenter's bill of material or estimate you may have received from any concern and we will figure it for you, with freight prepaid to your station. Don't place your order elsewhere for a large or small bill of material without comparing our grades and prices. We know we can save you money on your order and satisfy you fully in regard to quality.

SIZES, GRADES AND WEIGHTS

All our mill work is guaranteed to be strictly up to or better than the official grades adopted by the Sash, Door and Blind Manufacturers' Association of the Northwest. The sizes listed in this catalog are standard sizes. They are the same sizes handled by all of the leading manufacturers in the country. Throughout this catalog we give the approximate shipping weights on doors, windows, blinds, etc. Approximate molding weights are shown on pages 70 and 71 together with valuable information regarding freight classification.

TIME IN TRANSIT

We have unexcelled facilities for making prompt shipments. See sectional view of our Mill Work Factory on this page and the wheel in the upper right hand corner, showing time in transit to eight of the principal cities in the United States. The time in transit is proportionately short to all territory adjoining these important centers.

"MADE TO ORDER" GOODS

You can save extra money and get your mill work in much less time by ordering stock items illustrated, described and priced in this catalog. If you have "Made to Order" goods, remember that they will cost you more and you must allow from **two to four weeks extra time.** All stock sizes and numbers will be shipped promptly. Odd sizes will have to be made to order.

GOOD ADVICE

The wise man always orders building material at least thirty days in advance of the date on which he intends to use it. Do not wait until the last moment, especially in the busy building season. You have everything to gain by placing your order early when prices are comparatively low and railroads are in position to make prompt delivery.

See opposite page showing how by twentieth century methods we are able to save you extra money on high grade mill work products.

MADE ENTIRELY FROM SELECTED LUMBER

BETTER MILL WORK

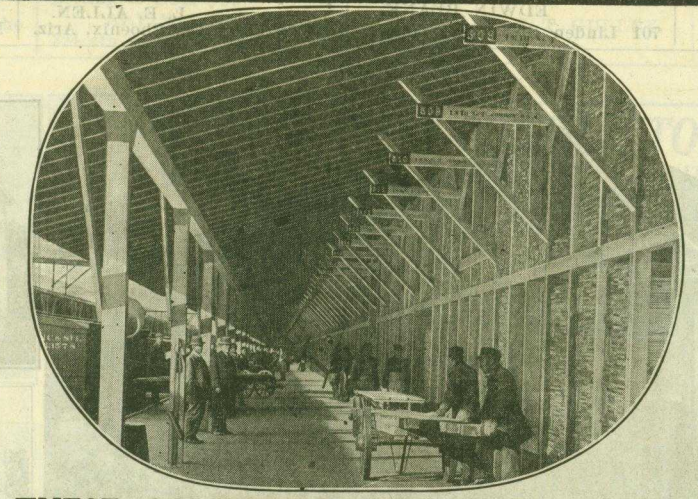
SHELTERED FROM RAIN, SUN, SOOT AND WIND

The Care We Take

In protecting the lumber that goes into our mill work products enables us to guarantee the quality and insures complete satisfaction to the customer.

From the time the lumber leaves the sawmill until it is required in our mill work factory it is thoroughly protected from the weather. Notice the 800-foot loading platform—one of ten—in the small picture and the large, well built rainproof warehouses below. Is it not reasonable that the doors, windows, frames, moldings, etc., manufactured from high grade lumber so protected should be more satisfactory in every way than the same articles made from lumber exposed to rain, snow, hail, soot and dust, as is usually the case in the average mill's yard?

Note on page 3 the solid concrete warehouses where all our finished products are carefully stored. See, on the opposite page, how we load these products, carefully crated, direct from our covered platforms into the box cars for QUICK DELIVERY TO THE PURCHASER.

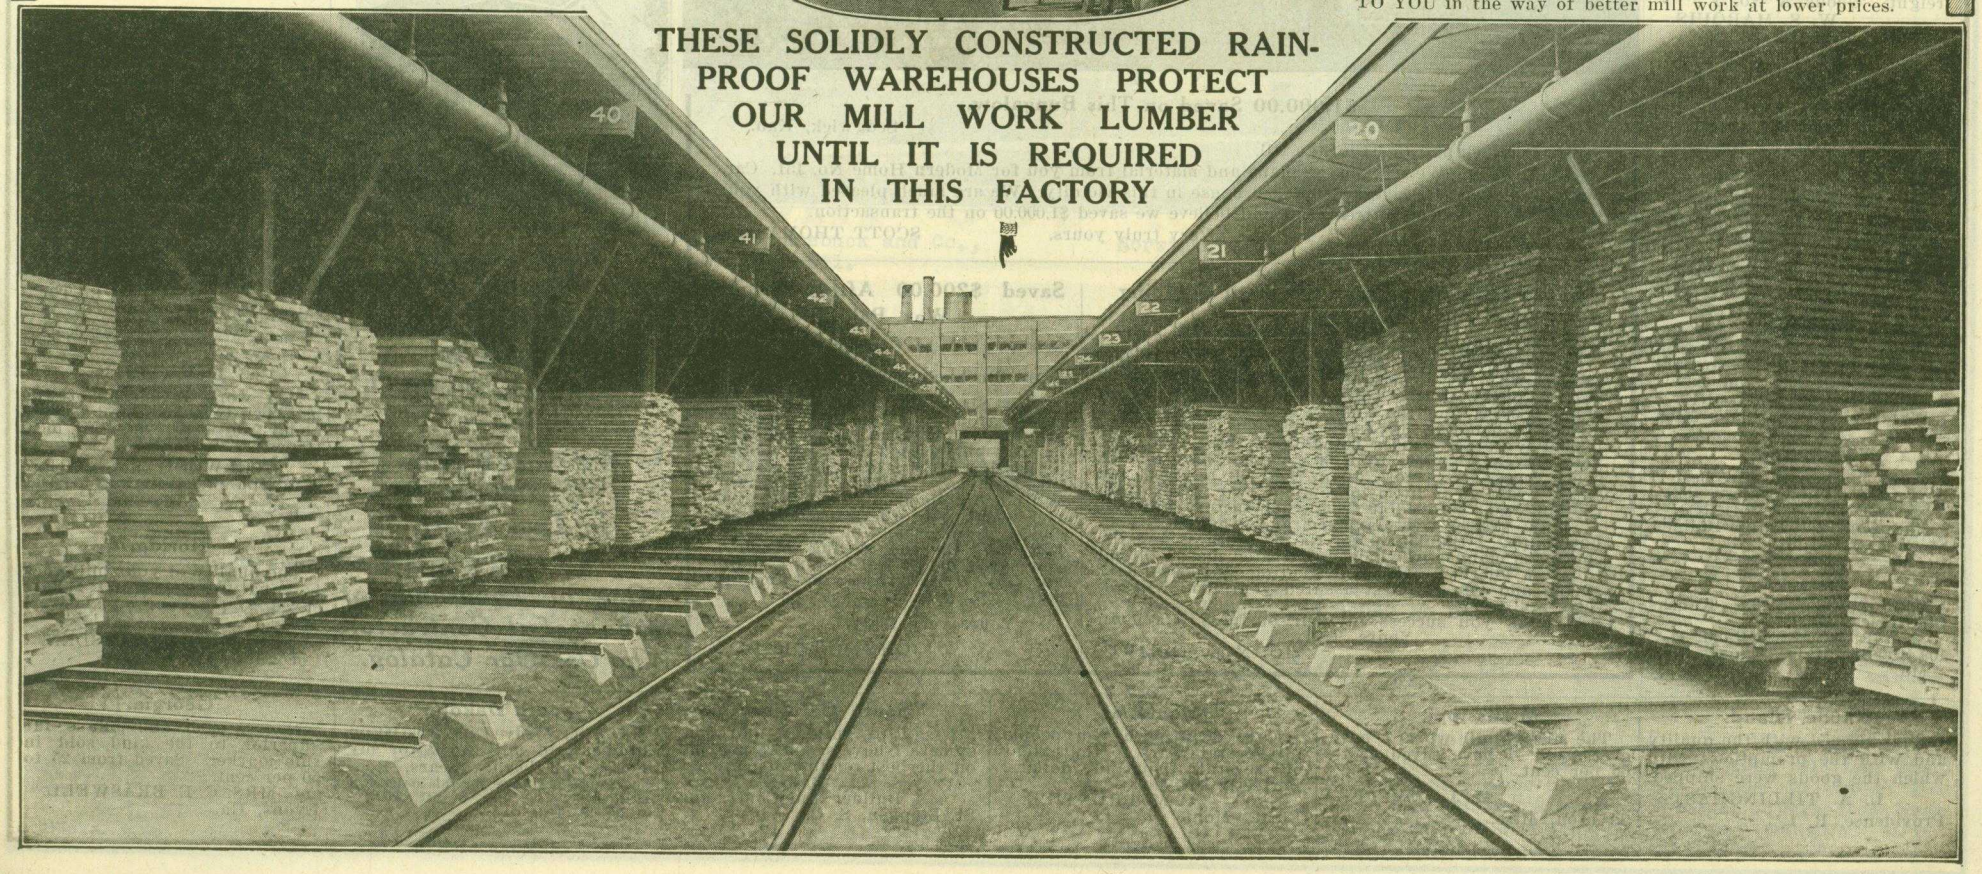


Unexcelled Facilities

Not only for handling our mill work and the lumber that goes into its manufacture, but also for quick handling of our customers' orders, make it exceedingly profitable and convenient for every carpenter and builder to select his mill work from this catalog.

If we could show you through our new mill work factory and let you see for yourself the many money saving devices we have installed, you would understand why we can underbid all competitors, if quality is considered. The high grade lumber which you see piled in the big warehouses below will not be touched by human hands until it is required at the big battery of machines in our factory. Each pile of lumber, containing nearly a carload, rests upon a movable truck which, when the lumber is needed, can be quickly transferred to the tracks in the foreground and pushed either into the dry kilns or wherever required. All lumber handled at our factory is unloaded from the cars on to these trucks and kept ready for use at a moment's notice. You can see how different this process is from the usual custom in the average mill's yard, where selections are made from one pile and another and carried by wagon in small quantities (requiring much time and labor) to the different places around the factory where the workmen are waiting for it. All the money saved by our quick, modern system of handling lumber GOES DIRECT TO YOU in the way of better mill work at lower prices.

THESE SOLIDLY CONSTRUCTED RAIN-PROOF WAREHOUSES PROTECT OUR MILL WORK LUMBER UNTIL IT IS REQUIRED IN THIS FACTORY



Alabama.

All mill work received of the best quality. Service prompt and saving from 25 to 50 per cent.

P. F. KNAPP.

Minnesota.

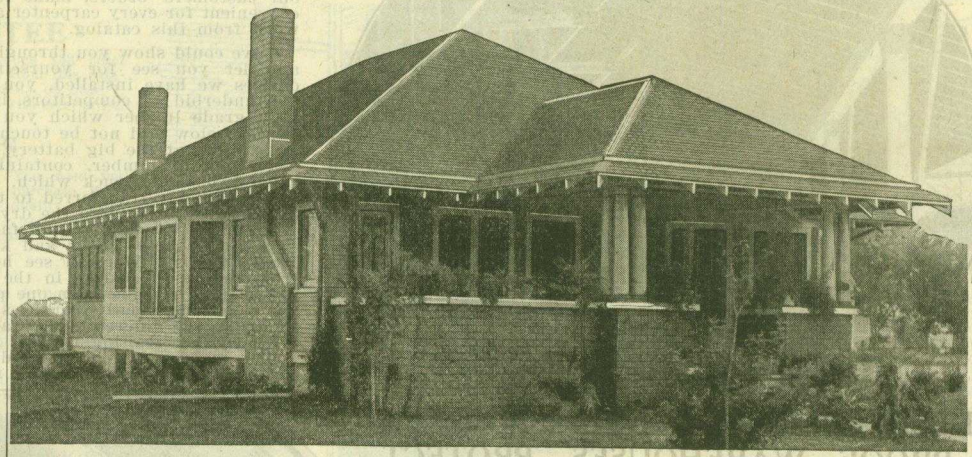
Your lumber is the best I have ever used in thirty years.

EDMUND CAMERON,
Contractor and Builder.
St. Vincent, Minn.

Missouri.

Your newels, $2.96; Kansas City price, $7.60.

L. BLOESSER, M. D.
109 Sterling Bldg., Kansas City, Mo.



$1,000.00 Saved on This Bungalow.

Sedgwick, Kan.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—We bought the plans and material from you for Modern Home No. 151. Carpenters say ours is the finest finished house in this vicinity. We are much pleased with your honest and gentlemanly treatment and believe we saved $1,000.00 on the transaction.

Very truly yours. SCOTT THOMAS.

Saved $800.00 on One Order of Building Material.

Colorado Springs, Colo.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I will state that I am more than pleased with my home built by your plans and with your material. I have saved on my order given you about $800.00, and the quality of the material furnished by you far surpasses any that is being furnished for other houses being built right here, and your prices are more than 50 per cent less, and in some cases even more than that. I received my entire order in a little more than two weeks from the time you shipped it from your factory and not a single article was damaged and was packed in fine shape. I thank you for the promptness and the courteous manner in which you treated me. I intend to erect another house for renting purposes next spring and you can rest assured your firm will receive my order.

Wishing you success in your business, I remain

Yours truly,
JOHN M. CLEAR.

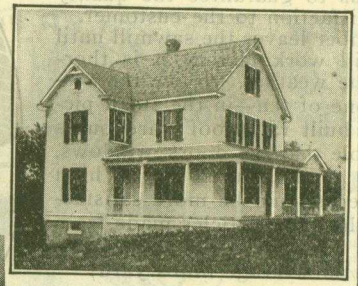
Saved $200.00 After Freight Was Paid.

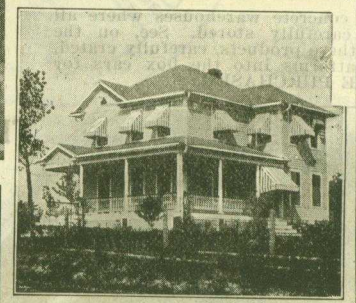
Norfolk, Conn.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—On the lumber I received from you for my house in December you saved me 25 per cent on my bill with freight added, amounting to $800.00 or about $200.00 saved for me. I am very well pleased and much obliged to you. I will give you some more orders in the future and I think some of my friends will too. On the sewing machine you saved me 50 per cent; I could not buy it for twice the amount here.

Yours very truly,
JOHN B. CURTIS.





These Houses Built by C. T. CALDWELL, Woodside, Maryland.

We Saved Him $1,000.00 in Two Years.

READ WHAT MR. BECKWITH SAYS.

CONTRACTORS READ THIS LETTER WRITTEN TO SEARS, ROEBUCK AND CO.

Sears, Roebuck and Co.,
Chicago, Ill.

Norwich, Conn. January 23,1913.
110 W.Thames St.

Gentlemen:-

The writer has built Modern Homes No. 108,124,163 and 168 as shown in picture mailed you under separate cover a few days ago, from your plans and finished them throughout inside with your material; together with plumbing, heating, brick mantels and tile in some of them. My carpenters say of the plans "They are the finest set of Blue Prints we ever worked from." Of the inside finish they say "We never put a saw into as good material as this." The saving to me has been from 20% to 50%. For square dealing there is no house to compare with Sears, Roebuck . You have at all times done more than you agreed to do. You must remember gentlemen that the writer is not a contractor or builder but a Real Estate man developing his own property. I hire my own men and build these houses by day work with Union Labor and expect to build ten more. Refer to me any time. Thanking you for your many favors I have the honor to be Yours truly

H. H. Beckwith

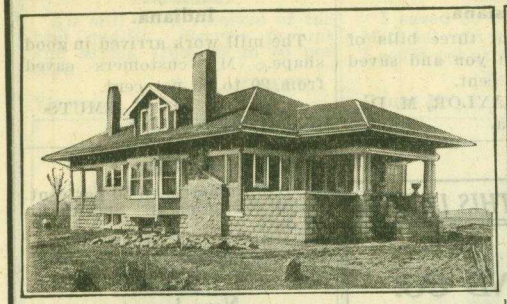
By dealing with your firm I was enabled to save at least $700.00 on an eight-room house.

L. P. DESMOND, M. D.
316 W. 23rd St., Cheyenne, Wyo.



SAVED $1,500.00 ON A BUNGALOW

West McHenry, Ill.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—We are in our new house, or bungalow, as we prefer to call it, and we are greatly pleased with everything. We feel that you have saved us $1,500.00 on our materials, and you have given us every courtesy that a seller can give a buyer.

Very respectfully, AUGUST M. SCHILLER.

FOR $1,488.00 we will furnish all the material to build this Six-Room Bungalow, except cement, brick and plaster.

JOHNSON SAVES ONE-HALF

Roselle Park, N. J.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Am very glad to say that whatever I purchased from you for my house, which I think amounted to $800.00 or $900.00, has been found to be very satisfactory. I know that I could not have obtained the same material for less than about twice the amount, considering quality.

Your customer, JOHN C. JOHNSON.

FOR $1,108.00 we will furnish all the material to build this Eight-Room House, except cement, brick and plaster.

DELIGHTED WITH QUALITY AND SAVING

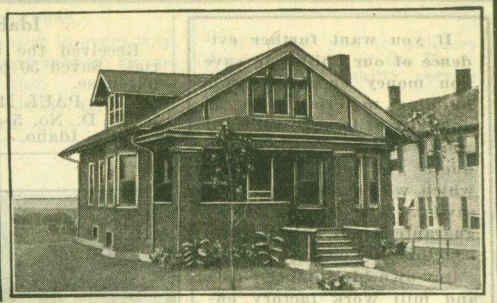
Evansville, Ind.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I wish to state that I am extremely well pleased not only with the plans and material furnished, but with the way in which you handled this order. I will further add that I feel satisfied I saved anywhere from $500.00 to $700.00 by buying from you.

Very truly yours, F. N. HILLS.

FOR $939.00 we will furnish all the material to build this Eight-Room House, except cement, brick and plaster.



WHAT THE CONTRACTOR SAID

Box 61, Little Silver, N. J.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The contractor stated that the whole order of goods was up to the standard in every respect and he emphasized the fact that the oak doors were the best he ever handled and he has worked on many large jobs right in my vicinity.

Very truly yours, LESLIE BORDEN HILL.

FOR $1,145.00 we will furnish all the material to build this Five-Room Bungalow, except cement, brick and plaster.

FREE! *Send a Postal Card for This Beautiful Book of 100 Modern Homes*

QUALITY O.K. AND SAVES $1,000.00

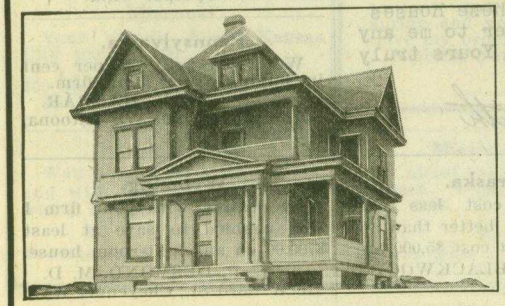
Dixon, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The lumber and mill work I bought from your firm is satisfactory in every way. I saved from $1,000.00 to $1,200.00 on this house.

Yours truly, CHAS. J. DAHMS.

FOR $1,660.00 we will furnish all the material to build this Nine-Room House, except cement, brick and plaster.



WILL DISPEL YOUR DOUBTS

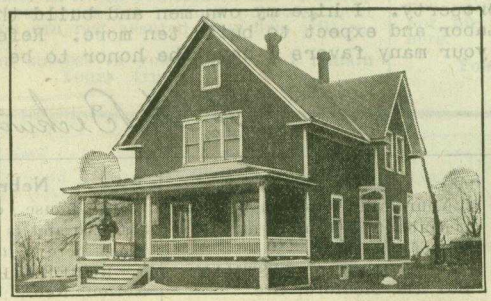
15 Henry St., Fitchburg, Mass.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I have moved into my new home, No. 170, which I bought of you and find everything just as you represent it, both in quality and saving. If any person interested in your building proposition is in doubt, have him come to me or write and I will give him full information.

Very truly yours, PATRICK B. McNAMARA.

FOR $1,183.00 we will furnish all the material to build this Eight-Room House, except cement, brick and plaster.



QUALITY RIGHT, SAVES 25 PER CENT

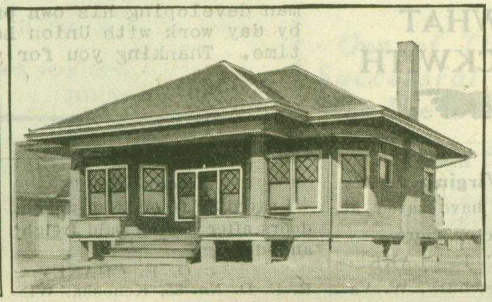
2736 Meredith Ave., Omaha, Neb.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am sending photo of my new house built according to your plans with material purchased from you. I could not have been better satisfied as to the quality of the material, the promptness of the shipments and the way I was treated. I saved about 25 per cent on the material.

Yours truly, R. L. GILCHRIST.

FOR $858.00 we will furnish all the material to build this Six-Room Bungalow, except cement, brick and plaster.



MATERIAL FIRST CLASS

Griswold, Iowa.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I am very much pleased with the material furnished for my new house. It is all first class and makes a very neat job. I am perfectly well satisfied with the outcome of the deal.

Yours truly, H. G. TURNER.

FOR $966.00 we will furnish all the material to build this Eight-Room House, except cement, brick and plaster.

MODERN HOMES
SEARS ROEBUCK AND CO CHICAGO
Leading Eastern and Western designs of Bungalows, Houses, Cottages, Flat-Buildings, Farm-Houses and Farm-Buildings.

You Need This Latest Free Book of Modern Homes if You Are Thinking of Building a House. Write for It Today.

ASK FOR FREE BOOK No. 596M.

Over 100 Pages Like These

Our latest Book of Modern Homes is now better than ever before. It contains a fine selection of houses, the material for which is already cut and fitted. Many of the designs are entirely new. People who are best qualified to judge claim that our book now occupies first place among all books of its kind and should be in the hands of every contractor, carpenter or anyone contemplating building a city residence, bungalow, cottage or farm house. A postal card will bring you this big book, free and postpaid.

If you have any building to do it will pay you to post yourself on every angle of the building proposition. Send for our latest free Book of Modern Homes, study the illustrations and compare our prices with others. If you do this there will be no doubt in your mind as to the saving we can make you. We can refer you to our customers in every state in the Union and possibly to somebody in your own town. Remember, our latest Book of Modern Homes is absolutely free and will be mailed to you postpaid on request. In order to get the book quoting our latest prices ask for our Modern Home Book No. 596M.

Sears, Roebuck and Co. - - - - - Chicago, Ill.

IT SHOULD interest you to know that we have already sold over 4,000 Modern Homes. We will be glad to refer you to somebody in your vicinity who has built a house according to our plans and with our materials. But if you will read the many letters from our customers, printed throughout this book, we feel sure you will not question our ability to save you money on high quality material and to give you the best of service in the way of quick shipment.

During the past few years we have sold Millions of Dollars worth of building material. According to what our customers tell us, they saved as much as $1,000.00 on a single house. You should be interested in a saving of $500.00 or more. Send for our latest Book of Modern Homes, select your plans and let us demonstrate that this saving is possible.

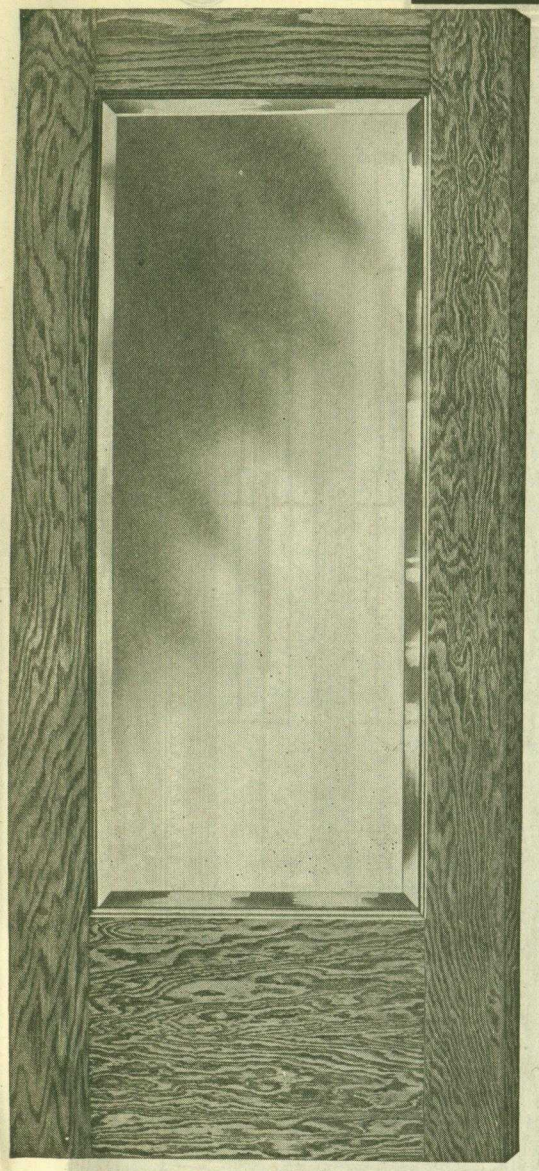
OAK AND BIRCH VENEERED FRONT DOORS



Description of All Veneered Doors Listed in This Catalog

WHY VENEERED DOORS ARE BEST. Veneered construction has been used in the manufacture of pianos and fine cabinet work for years. Veneered work is light, strong and durable. Solid hardwood does not give the satisfaction and service that veneered work does. A solid hardwood door will crack, warp and twist, and its great weight will cause it to sag and stick. A veneered door will not crack, warp or twist but will hang true.

HOW OUR VENEERED DOORS ARE MADE. The core is built up of strips of soft pine lock jointed and glued together. This is the lightest and strongest core known. The veneers are carefully selected for grain and color (which is impractical in a solid hardwood door). The veneers are glued on the core under enormous pressure. The beautiful grain noticed in our doors is the result of the rotary process of cutting our veneers.

MATERIALS USED. Our materials are the best that can be secured for the purpose.

WORKMANSHIP. None but skilled workmen are employed in the manufacture of these doors.

DESIGNS. In selecting the designs shown, we use those recommended by the leading architects. We do not handle freak designs that go out of fashion in a short time. Each door is correctly proportioned with wide stiles, large glass and presents a massive, dignified appearance.

SPECIFICATIONS

MATERIAL.

Genuine White Pine is used in our front doors. It is light, strong and durable and will stand up under trying conditions without warping or shrinking. The wood we put in our doors is especially selected so that we secure light and clear white pine free from pitch. It will take an oil finish perfectly.

WORKMANSHIP.

We do not allow a blemish in our highest grade white pine doors. Each door when it comes from the machines must be perfect, otherwise it is rejected. Modern machines, skilled workmen and careful inspection make this possible.

CRATING.

Before shipping our doors they are closely inspected, then carefully wrapped in tough paper, and crated with sound lumber. We are painstaking in the manner of our packing, realizing that the doors must arrive in perfect condition. Each door reaches our customers as bright and clean as when it left the machines.

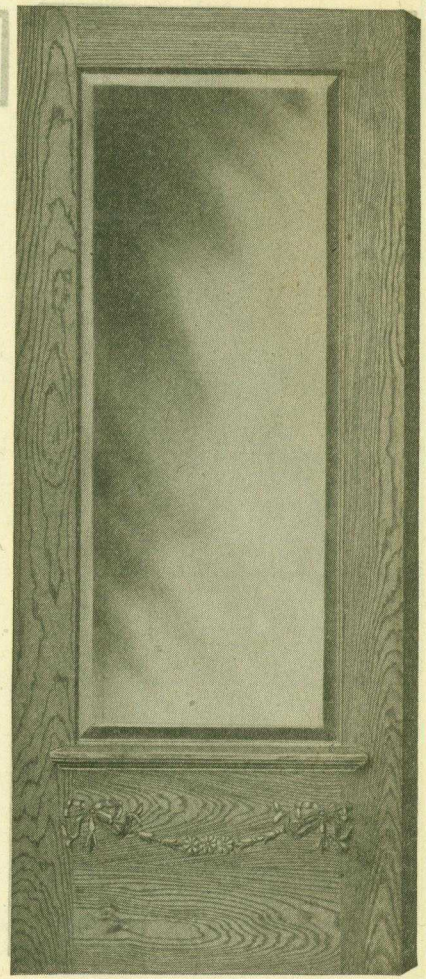
GLAZING.

We use extra care in selecting the glass for our doors, which are glazed by competent workmen.

D. S. means double strength; S. S. means single strength.

Replace the Old Front Door—Costs but little, adds much to the appearance of your house. Make the right impression on the mind of the visitor or passerby.

Either door shown on this page can be furnished 1¾ inches thick for 50 cents extra. We recommend ordering the larger sizes 1¾ inches thick.



MAJESTIC.

HIGHEST GRADE WHITE PINE DOORS

Any door on this page can be furnished 1¾ inches thick. For the Kenilworth and Jenkins, 1¾ inches thick, add 50 cents extra. For Empire and Harrison, 1¾ inches thick, add 75 cents extra. We recommend the larger size doors be ordered 1¾ inches thick.

The mitered crystal sheet glass shown in the Kenilworth door is an extra heavy crystal (not plate) glass with a cut border or line around the edge. It is slightly thinner and to some extent lacks the perfect polish of plate glass. The miter makes it appear like beveled plate glass.

HIGHEST GRADE WHITE PINE DOORS

Any door on this page can be furnished 1¾ inches thick for 75 cents extra. We recommend ordering the larger size doors in 1¾ inch thickness.

The mitered crystal sheet glass shown in the Glenview door is an extra heavy crystal (not plate) glass with a cut border or line around the edge. It is slightly thinner and to some extent lacks the perfect polish of plate glass. The miter makes it appear like beveled plate glass.

The chipped glass shown in the Clay door is a single process chip glass which does not exclude any light, but is not transparent. An ideal door when light with privacy is wanted.

STANDARD GRADE WHITE PINE DOORS

Standard grade white pine doors are one grade lower than our highest grade white pine doors. The material is not so carefully selected and the finish not so perfect as our highest grade doors. For a painting job they are thoroughly durable and satisfactory doors.

Any of these doors can be furnished 1¾ inches thick for 50 cents extra.

Used for basement, grade entrances or back doors, etc. Constructed and finished with more care than is generally used on inexpensive doors of this sort.

THE WAY WE GRAIN. Unlike the usual practice with other so called grained doors, we give the door two coats of paint and then carefully apply our graining, which is done by expert grainers, imitating the grain of an oak door. To bring out all the details and to produce a lasting luster we apply a heavy coat of varnish, giving it a finish seldom equaled by any other concern.

QUALITY GUARANTEED

THE DOOR UNFINISHED. Doors which are grained and painted are made from kiln dri stock and very durably constructed but, like all other grained doors, are made from a low grade of material than is used in our Clear White Pine Doors and, as a result, contain knots a other imperfections which are covered up with shellac and putty, but when finished no way detract from the durability of the doors. We therefore cannot guarantee o grained doors to be perfect as far as the wood is concerned, but we do gua antee to sell you a better painted and grained door than is usually produced by a other concern.

WE SELL THE BEST PAINTED AND GRAINED DOORS.

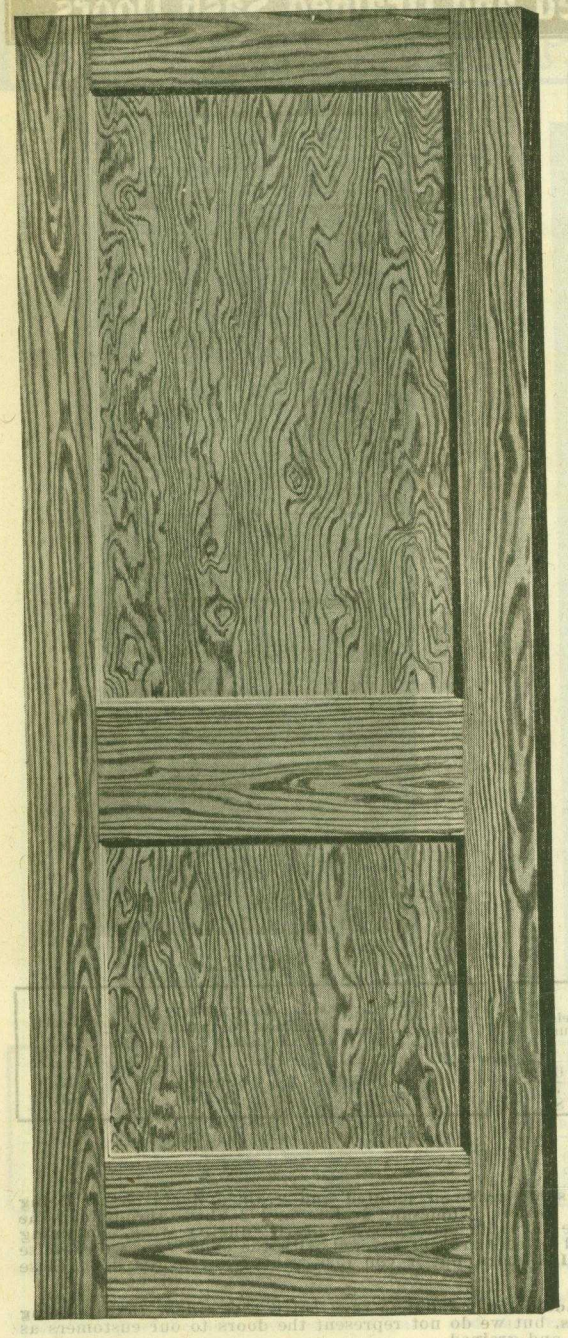
The two doors illustrated above are grained by hand in accordance with the specifications given on the preceding page. The painted doors are heavily coated with two coats silver gray paint applied with a brush by hand. Before applying the first coat all ots are shellacked and other imperfections puttied. Then the graining is done by erts who closely imitate the oak grain which is brought out bright clear by a coat of varnish.

For a few cents difference in the price which you pay for these doors, r those shown opposite, you get a first class dependable article which prove to be a good investment.

The two doors shown above are the same grade of painted and grained doors as are being furnished by some of the leading retail dealers, wholesale dealers and jobbers throughout the country as a nice grade of doors. They are in reality made of No. 4 or "D" quality stock, containing large knots and defects. These knots and defects are not covered with the same care we exercise in painting and graining our **HIGH GRADE** doors, but if you just want a low priced door, these doors will answer your purpose.

Even in these low grade doors we aim to turn out a better door than is being furnished by most dealers, but we do not represent the doors to our customers as being good doors painted and grained.

If you want a better quality painted and grained sash door, refer to HIGH GRADE painted and grained sash doors shown on this and the opposite page.



Solid Yellow Pine Inside Doors

EXTRA! QUALITY GUARANTEED EXTRA!

Newest Designs in Yellow Pine Doors at a Big Saving

Yellow Pine is the most popular wood for interior trim. It is easy to work. It has a grain and color not to be equaled in any other kind of wood. Can be stained or finished in any tone or color. See color of finishes on inside back cover page.

We make a specialty of yellow pine doors and trim. We buy our yellow pine from only the choicest timber tracts. We use the greatest care in drying and curing this lumber. We use the latest and best methods of manufacture. A strong claim, but true. We believe our yellow pine doors to be the best made, regardless of price.

By specializing in yellow pine doors and trim we are able to offer these highest grade doors at prices lower than usually asked for low grade doors.

The two-panel door shown at the left is a very popular design. It is made with built-up veneered flat panels with solid stiles and rails and solid sticking.

The doors shown on the opposite page are all made with solid sticking with heavy raised solid panels.

We crate these doors very carefully before shipping and guarantee them to reach you in good condition. OUR GUARANTEE OF SATISFACTION STANDS BEHIND EVERY DOOR SOLD.

TWO-PANEL CYPRESS.

Solid Cypress Inside Doors

CYPRESS THE WOOD ETERNAL

QUALITY GUARANTEED

CYPRESS DEFIES DECAY

New Designs in the "Wood Eternal"

Strictly "A" Grade Number 1 Quality.

Cypress is considered the best wood for outside work because of its weather defying qualities. It is known as "the wood eternal." It is popular for interior trim because of its beauty of grain and easy working qualities. It takes a great variety of finishes and is used in the finest cabinet work.

Our line of Cypress doors and trim is complete. We show only the latest designs. We are able to quote low prices on Cypress doors and trim because we make them in our own factory.

The Cypress we use in our doors and trim is clear, carefully selected stock which is thoroughly dried before being used.

The door to the left is made with solid sticking and veneer built-up panels.

The doors on the opposite page are made with solid sticking and heavy raised solid panels.

Each door is carefully made, sandpapered and polished ready for finish, well crated and guaranteed to reach you in good condition.

Cypress can be finished natural, or will take a great variety of stains. See inside back cover page for sample stains and finishes.

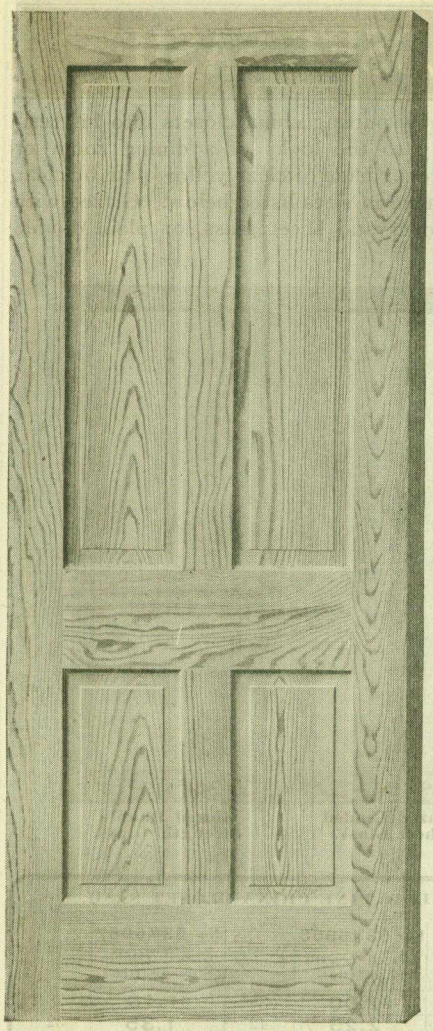
SAVED FROM ONE-THIRD TO ONE-HALF ON EVERYTHING.

Box 563, North East, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The building material which I ordered from you was for another man who was building a new house. He got prices from the dealers here and was talking with me about it. I told him that if he wanted to get the best materials for his money to send to you for them. He said he did not know how to order them, so I told him I would send the order for him and showed him the catalog I had and he said he would try an order. That is how I came to order mill work. When it arrived he examined it very closely and said, **"I have saved from one-third to one-half in price** and I am very much pleased with everything."

Very truly yours, ROY EADES.



FOUR-PANEL

QUALITY GUARANTEED

GENUINE CLEAR WHITE PINE DOORS

No. 1 QUALITY "A" GRADE

ABOUT WHITE PINE

White soft pine is easily worked. Doors made from this stock are recommended for durability, for they will not check, warp nor shrink under the most severe conditions. The grain does not rise up and they are free from pitch and sap; perfectly adapted for either oil finish, paint or enamel.

Of special importance to you is the fact that the lumber used in our doors is first left in piles until it is thoroughly air dried and is then put through dry kilns. At no time is the drying process rushed.

FIVE-PANEL

QUALITY GUARANTEED

GENUINE CLEAR WHITE PINE DOORS

No. 1 QUALITY "A" GRADE

All our white pine panel doors have O. G. sticking and bevel raised panels, two sides, as per illustration, except the 7/8-inch doors which are raised panel one side only.

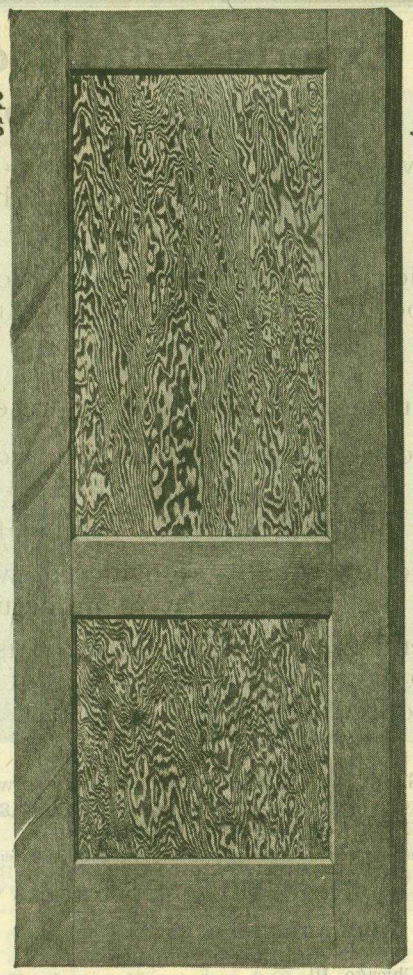
Up To Date Inside Doors

FIR VENEER PANELS



Fir Veneer Panels With White Pine Stiles and Rails.

Up to the minute designs in high grade two-panel doors. **The door to the left** is made with **fir veneer panels** and white pine stiles and rails. It is superior to the solid fir door because white pine for the stiles and rails makes a more substantial door, lighter in weight and is easier to fit. Made with solid sticking. High class workmanship, carefully crated.

The door to the right is made with **birch veneer panels** and spruce stiles and rails. Solid sticking. This is a well known door and is largely used in the place of solid birch. It has the appearance of a solid birch door, when in the white or when stained and finished.

Clear Oregon Fir Doors

Made by Experts With Modern Machinery From Clear Yellow Fir

Fir Doors have become very popular among architects and contractors during the last few years. They are being used in the higher grade residences, apartments and public buildings.

Because of their beauty of grain and color, durability, and being low priced, Fir Doors will continue to be in demand for many years to come.

Remember—

Fir Doors can be stained to closely resemble oak and other hardwood doors.

Fir is stronger and harder than soft woods and is therefore more durable.

We sell only the **highest grade** of Fir Doors. They are made of choice Fir lumber carefully selected for grain and free from defects.

Our prices are low, quality considered, when compared with the prices that others ask. **We sell direct to the consumer at manufacturers' prices.**

We recommend Yellow Pine Trim, illustrated and priced on pages 70 to 73, to be used with these doors. Yellow Pine being of similar grain and color, matches Fir perfectly. If Oak stain is to be used, then select the Oak Trim, illustrated and priced on pages 65 to 69.

***Mitered Crystal Sheet** is an extra heavy crystal glass with a miter or line drawn around the edge. It is slightly thinner, and to some extent, lacks the perfect polish of plate glass. The miter makes it look a great deal like beveled plate glass and presents a very high class, dignified appearance.

Read What Customers Say About Our Doors

MILL WORK ARRIVED O. K.

216 Lelia St., Pittsburgh, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The mill work that I ordered from you arrived O. K. I am highly pleased with the door, also the way it was packed. The glass in it was perfect when opened. I saved over one-third by buying from you. I shall buy all my material in that line from Sears, Roebuck and Co. in the future and will drop you a card when I am in need of more.

Thanking you for the interest shown us so far, I remain,

Yours truly, WM. F. STREYLE.

TALK OF ALL THE CARPENTERS.

44 Fourth St., Philadelphia, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The finishing lumber, doors, etc., are the finest that I have ever seen and are the talk of all the carpenters who work on the building. They say they never worked on finer material in their lives.

Yours truly,

JOHN D. AVIL.

A SAVING OF MORE THAN HALF ON DOORS.

Box No. 213, Sinton, Texas.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The glass doors ordered from you received in fine shape. They were so well packed—not a scratch on them. The cheapest offer I could get on them here was $25.00 each, so you see $9.65 and 73 cents each for freight on the bevel plate glass makes them $10.38, a saving of more than half.

Yours truly, DREW MOSS.

SAVED BETWEEN 30 AND 40 PER CENT ON DOORS.

R. F. D. No. 3, Hellertown, Penn.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I saved between 30 and 40 per cent on the doors I ordered from you and over 50 per cent on the sash, all of which arrived O. K., and were entirely satisfactory.

Yours truly, WM. EISENHART.

RETAIL DEALERS' PRICES TWICE AS HIGH.

Williamstown, Mo.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I have just completed my work and will say Sears, Roebuck and Co.'s mill work is strictly up to date in every respect and far lower in price than what we pay for the same articles at our local dealers here. I ordered two front doors for my brother's house, among other material, and we priced the same doors here and it was just twice as high here as at Sears, Roebuck and Co. I have been doing all I can in your favor ever since I sent you the first order thirteen years ago.

Yours truly,
W. A. TAYLOR.

Grained Doors

QUALITY GUARANTEED

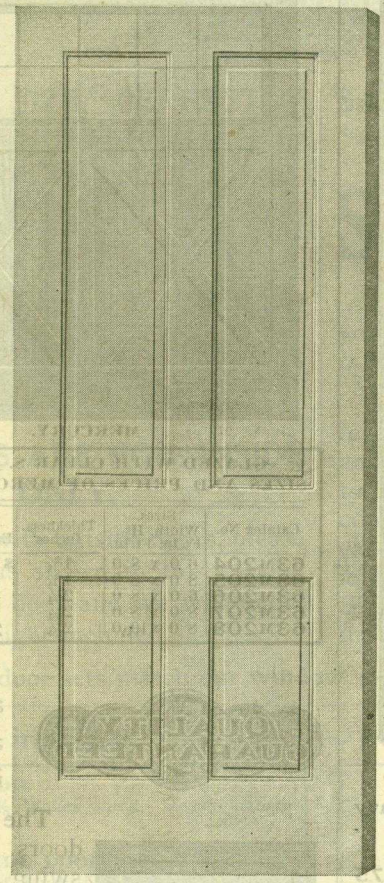
AS REPRESENTED.

Painted Doors

Four-Panel, Grained.

The care we use in the construction and finish of our grained doors is unusual in low priced doors. This is the reason we furnish grained doors that for appearance and durability are better than most grained doors.

Five-Panel, Grained.



Four-Panel, Painted.

Made from "D" quality stock. This is the grade always used in painted doors. No stock used which will affect the strength of the door. All knots are carefully puttied and shellacked before the finish is applied. Finish consists of two coats of silver gray paint. This care in construction and finish produces a door that is better than most painted doors.

Our Garage Doors are made of clear soft pine and cypress. The panels are worked into a groove in the stiles and rails so the door presents the same appearance from both sides. These doors are all machine made and possess many advantages over the hand made door, in addition to offering a saving in both time and money.

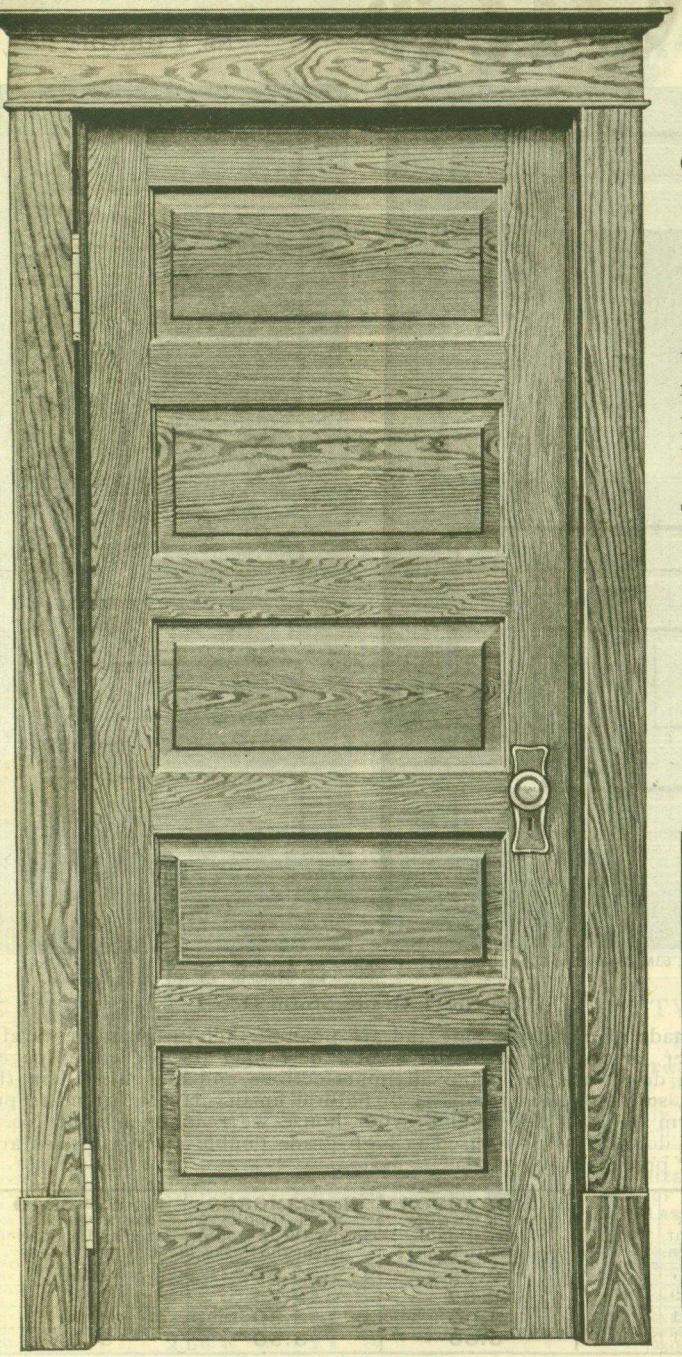
PREMIER.

DOOR SETS (INCLUDING DOOR, INSIDE DOOR FRAME, MOLDINGS FOR BOTH SIDES OF DOOR AND HARDWARE.) FRAME AND MOLDINGS CUT TO EXACT SIZE



QUALITY GUARANTEED

CUT TO EXACT SIZE, PERFECTLY MACHINED AND BETTER THAN HAND CARPENTRY COULD MAKE THEM.

This applies to the door jamb or inside frame, the interior casing, head casing, blocks and stops, making trimming or cutting unnecessary, except planing the edge of the door—a simple bit of work, which should be done on the job.

THESE DOOR SETS ARE FOR INSIDE DOORS ONLY.

If you want door sets with outside doors, please tell us catalog number as shown in this catalog and state size of outside door and we will quote price for complete set, freight included.

SAVINGS MADE IN ORDERING COMPLETE DOOR SETS.

SAVE Trouble in ordering various parts.
Errors in quantity of material.
Waste in cutting material.
Labor in installing doors.

Contractors, here is your chance to underbid your competitors on a saving of labor and cost of material by using these sets.

PACKING. We use extra special care in packing. Each door is carefully wrapped in tough paper and crated. The jamb or inside frame is tied together with patent fasteners, and it will not come loose or rub. The moldings are packed in cardboard cartons, carefully sealed, excluding dust and insuring your getting bright clean material. Size of the door is marked both on frame and moldings, so that one set can be used at a time.

These door sets match our window sets shown on pages 48 and 49.

Items Included in These Sets.

DOOR.
Clear No. 1 Yellow Pine, 1⅜ inches thick. Heavy panels raised on both sides.

DOOR JAMB OR INSIDE DOOR FRAME.
Clear Yellow Pine. Width of jamb, 5½ inches; thickness, 13/16 inch. Sides dadoed or grooved to receive head of jamb.

TRIM OR MOLDINGS FOR BOTH SIDES OF DOOR.
Clear Yellow Pine carefully selected for grain and color. All parts cut to exact size. Head trim is composed of three separate moldings. These are nailed together and the ends returned as shown in illustration. Casing is ¾ inch thick, 4¼ inches wide. Head trim is 7 7/16 inches wide over all, cap extending 2½ inches from wall. Blocks are 4½ inches wide by 10 inches high.

HARDWARE.
The hinges and lock set are high class, in keeping with the high quality of the door. Enough screws and nails included to put the door together.

We do not include thresholds, as most people use inside doors without them.

NOTE—All parts carefully sandpapered ready to varnish.

Finest Lot of Mill Work He Has Ever Seen. Saved $100.00 on a $400.00 Order After Paying Freight.

Coatesville, Penn.
Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—The mill work I sent for a few days ago has arrived and I must say it **is the finest I have ever seen.** It is far better than I expected. It arrived here in quicker time than it takes to get other goods that don't have over one hundred miles to come, as it was only six days coming over a thousand miles. I might also say that **after paying the freight charges ($70.24) I saved over a hundred dollars on a purchase of a little over $400.00.** In all my dealings with you I have found you prompt in your shipments, courteous in your treatment, and, above all, I get more for the money and better goods than I have ever received from any firm I ever dealt with. You may look for more orders in the future.

Respectfully,
C. H. TAYLOR.

Painted and Grained Storm Doors

Are made from the same grade of lumber used in our painted and grained doors, shown on preceding pages. While they are not made of clear lumber, the doors are strong and durable and are very carefully painted and grained. We guarantee them to be better than the usual painted and grained storm doors now on the market. The glass used is double strength glass, not the single strength glass usually furnished in this kind of door.

Our No. 1 Grade Storm Doors

Are made of clear soft pine and are put together in the same carefu manner as our regular front doors, described on preceding pages These doors are free from all imperfections and are shipped in th white, suitable either for paint or natural finish. If you intend to pu a storm door on the front of your house we recommend our No. 1 grade door. The glass used is high grade double strength glass an single process chipped glass.

STORM SASH

Do not delay your order for storm windows. When the cold weather comes be prepared. It is the first few days of cold weather that are the most dangerous.

Our Storm Sash are made of **clear soft pine,** put together in a most substantial manner. High grade window glass is very carefully secured with high grade points and putty.

NOTE—Only one-piece storm sash shown on this page. For regular windows see pages 40 and 48.

When Ordering BE SURE to GIVE WIDTHS FIRST.

Our Storm Sash are made 1 inch wider and 1½ inches longer than is usual. This insures a good fit, and enables many to use stock size, where with ordinary sash they would have to order special sizes, which would mean delay and expense. The extra wide stiles and rails on our sash allow for trimming. In ordering give number in catalog of the storm sash wanted and the exact size of opening (give width first) and we will send you sash which may be trimmed to fit. **WHEN ORDERING BE SURE TO GIVE WIDTH FIRST.**

A High Grade Colonial Entrance

Doors, windows and side lights are made of clear white pine. Exposed parts of frames and Colonial entrance of cypress, "the wood eternal." Sill of solid oak.

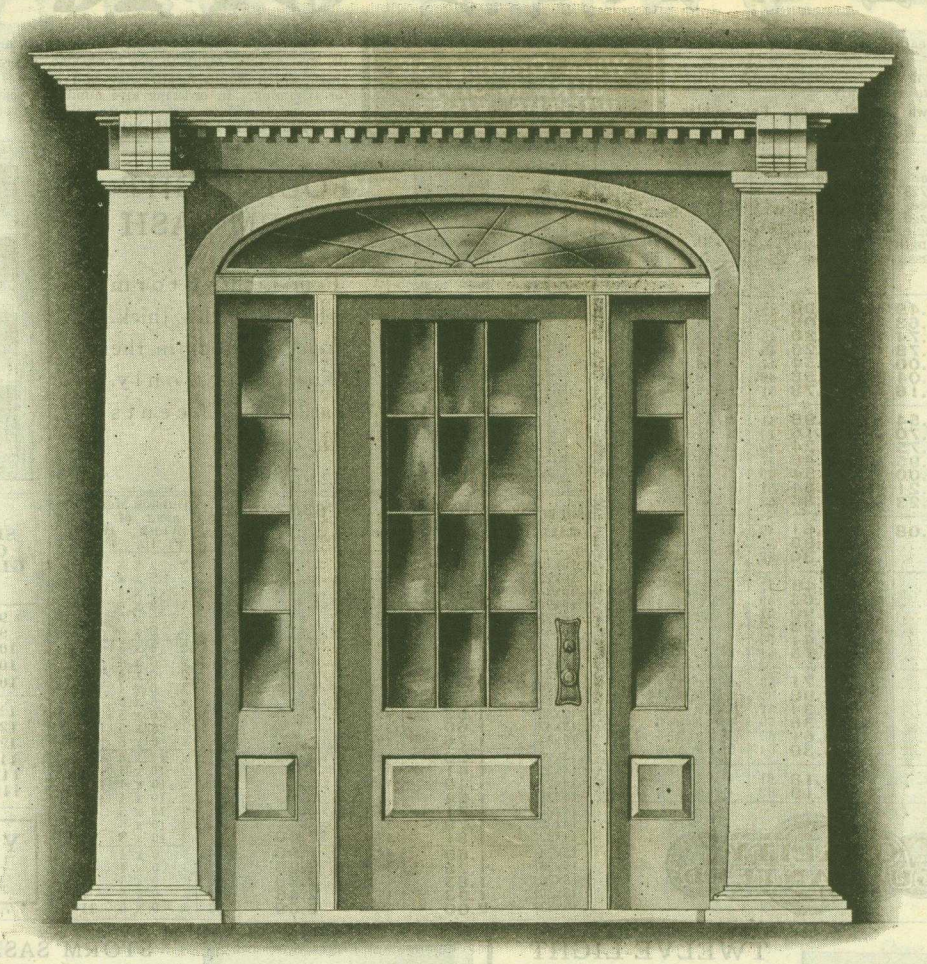
A Front Entrance Like This Will Add $200.00 to $300.00 to the Value of Your Home.

Consider the materials of which it is made. The pilasters or half columns on each side, all exposed parts of framework and all cap moldings are made of weather defying cypress. The large door, two side lights and ornamental transom are made of clear white pine, glazed with clear plain plate glass. The sill is made of **solid oak.**

One of these Colonial entrances, which we sell complete, cut all fitted ready to put in place for only $59.25, will give your residence a high class, distinctive appearance. It will last for years, requiring only an occasional coat of paint.

We ship this entrance to you carefully packed so as to prevent damage in shipment, and we will be entirely responsible for its safe delivery to your station. Our guarantee of complete satisfaction goes with every order.

Don't let your house run down. Whether you are planning to sell it in the near future, or to improve it for your own comfort and satisfaction, you cannot afford to overlook the offerings on these two pages. Very few houses are in such condition that they cannot be improved at a reasonable cost. A new front entrance, a few new doors and windows will go a long way toward increasing the value of your residence and prolonging its life.



Complete Colonial Entrance With Details.

COLONIAL WINDOW

This illustration shows our No. 33M7173 Window listed on page 43. It also shows how well our Colonial windows harmonize with our Colonial entrance and Colonial sash. A few of these windows and sash will improve the appearance of any home and the cost of them will be returned many times over in the increased value of the property.

What Part of Your House Is First Noticed and Longest Remembered?

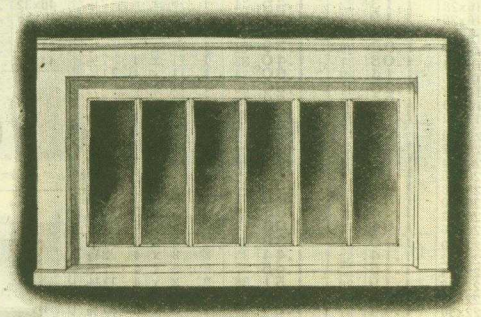
It is the main entrance. It is the index by which the interior is judged. You will note that there is nothing freakish and nothing that is likely to go out of fashion about the front entrance illustrated on this page. The design has been popular since Colonial times, it is today being specified by leading architects for modern residences and it will continue to be popular for years to come.

Please note how massive, dignified and yet simple this front entrance really is. When given a coat or two of pure white paint it will stand out from the rest of your residence with a prominence and charm that not only you but all your neighbors and visitors will appreciate.

As shipped from our factory, however, all front entrances, doors and windows on these two pages are furnished unpainted so that they can be given any paint treatment best suited for your house and surroundings.

If you are handy with tools you can install this entrance yourself, as the door, side lights, pilasters and cap come to you ready to put in place. It will be only a matter of assembling the proper parts and fastening them together. The work is simple and easy, as there will be little cutting or fitting to do and the cost will be reasonable. The results will more than justify the outlay.

COLONIAL SASH



Colonial Sash No. 63M7009 is made of clear white pine and is 1⅜ inches thick. Glazed with clear single strength glass.

In the 2 ft. 8 in. width, sash will be four lights wide; in the 4 ft. 2 in. width, six lights wide.

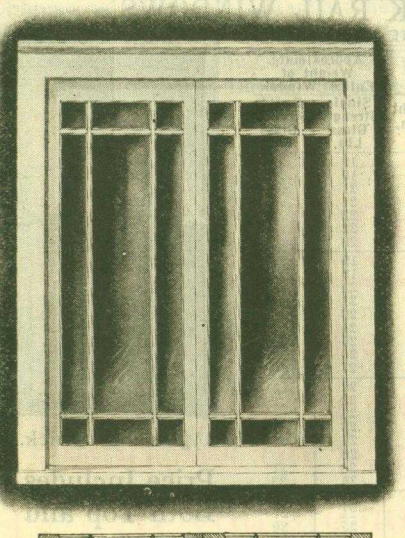
French Doors, Windows and Casement Sash

These doors, windows, etc., are used in modern residences and apartments. They can be talled in an old building as well as a new one. Harmonizing designs.
Everything shipped in the white, that is, without paint or varnish, unless otherwise requested.

Windows receive one coat of oil primer before shipment so the putty will adhere properly. All Frames shown are for wooden buildings with 2x4 studs. Full description of frames on pages 52 to 58. Hardware for these doors and windows will be found on pages 122 to 129.



FRENCH WINDOW.

Our French Window No. 63M7016 is a design that is being used for the finer class of apartment buildings as well as for bungalows, Colonial homes and fine residences of every description. Furnished in clear white pine, 1⅜ inches thick, glazed with "A" grade clear double strength glass.

ABOUT OUR QUALITY WINDOWS.

All our windows are well made of clear soft white pine, thoroughly seasoned and kiln dried, carefully machined and sanded and dipped or primed with linseed oil compound. Progressive contractors say they are the best windows they ever saw. All our windows are glazed with good quality glass, securely held with high grade points and putty. With the exception of small sizes, all our windows are back puttied, which prevents the window glass from rattling, makes a tighter and neater job and increases the durability of the window.

WINDOWS
MADE OF GENUINE CLEAR WHITE PINE

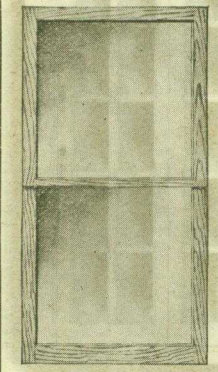
Check rail windows are 1⅜ inches thick and have a check rail where the two sash come together, preventing rattling or driving rains and snow beating through. Prices quoted include upper and lower sash. In shipping our windows we bundle them very carefully and guarantee that they will reach you in good condition.

NOTE—Weights shown are of the window only, to assist in ordering sash weights. For shipping weight or weight of window and crating add one-fifth to the weight given.

When Ordering Be Sure to Give Width First.

TWO-LIGHT CHECK RAIL WINDOWS.

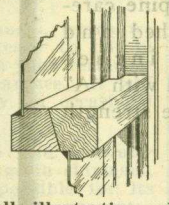
MADE OF GENUINE WHITE PINE.



1⅜ Inches Thick.

PLOWED AND BORED FOR SASH WEIGHTS.

Price Includes Both Top and Bottom Sash.



Small illustration shows check rail feature furnished on all windows shown on this page.

Leaded Bevel Plate Glass and Fancy Sheet Glass

THE LEADED BEVEL PLATE AND CRYSTAL GLASS

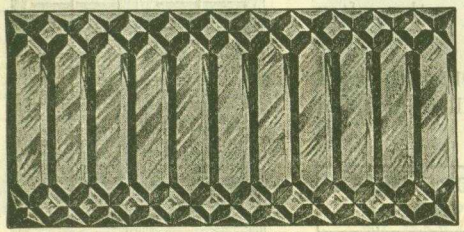
Shown on this page are standard designs and have proven to be quite popular. You will find the prices to be bargains when you consider the good workmanship and the high grade of materials used in the manufacture of this leaded glass.

IN ORDERING ALWAYS SPECIFY

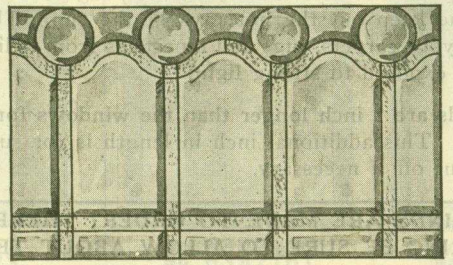
Width of glass first, length last. Sheet glass is made to your order, therefore be sure to specify exact size wanted. Leaded glass is made to order, therefore be sure to allow a few days extra time.

IMPORTANT

Select a design of the same shape or proportion as the opening for which glass is intended. Do not select a high narrow design for a low wide opening, or a low wide design for a high narrow opening.



No. 63M8933
Leaded Bevel Plate Glass.
Price, per square foot.....**$1.30**



No. 63M8932
Leaded Bevel Plate Glass.

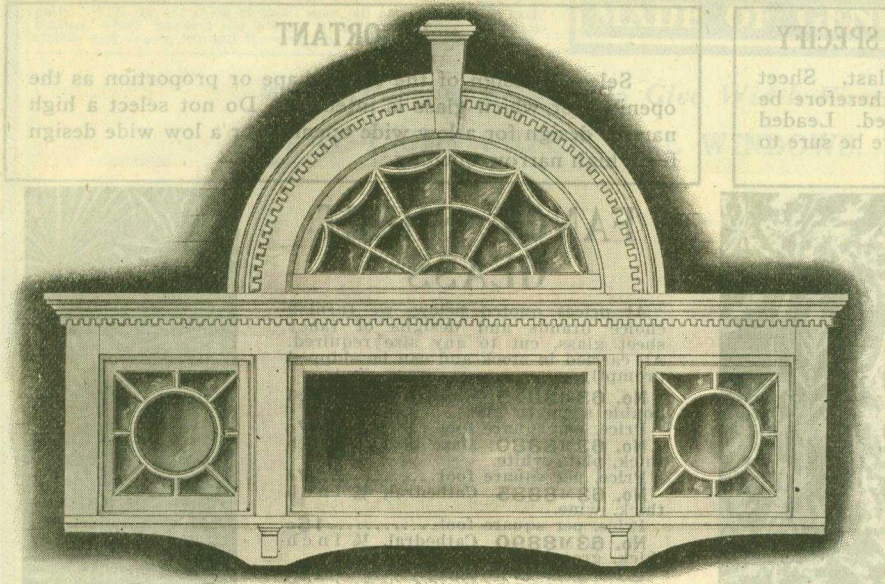
Price, per square foot.....**50c**

WHEN ORDERING ANY OF THE LEADED DESIGNS (NOT FANCY SHEET GLASS) GLAZED IN SASH, SEE YELLOW SLIP FOR INSTRUCTIONS.

PRISCILLA FRAME AND SASH



Priscilla Frame and Sash is just the feature needed to make an attractive home of what otherwise would be a plain, ordinary looking house. Gable frames and sash similar to the Priscilla are specified by architects for Colonial houses and heretofore it has been necessary to have the frame and sash made up special at prices considerably higher than our Priscilla frame and sash. The frame is made of good sound lumber, practically clear and perfectly machined and is **made up complete and ready to set in place.** The sash are made from clear stock and glazed with clear glass.

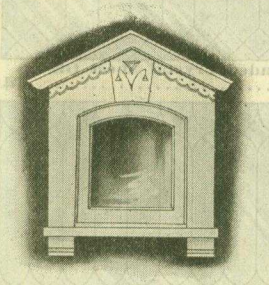
The top or semicircular sash is 2 feet 8 inches wide by 1 foot 4 inches high. The side sash are 1 foot 8 inches by 1 foot 8 inches. The center sash is 2 feet 8 inches wide by 1 foot 8 inches high.

We carry these frames and sash in stock and can ship them promptly with the balance of your mill work.

Frame for 2x4-inch Studding only.

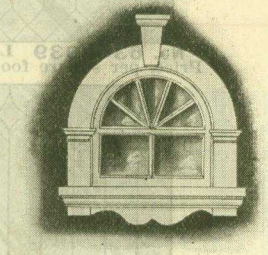
No. 63M7145 Priscilla Frame and Sash. Price, complete as shown..... **$27.00**
Weight, 80 pounds.

GABLE SASH AND FRAMES



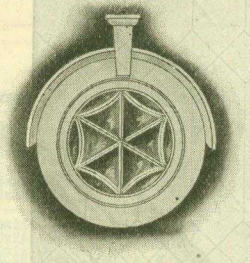
No. 63M7164 Sash. Opening 2 feet by 2 feet 5 inches, 1⅜ inches high, glazed clear glass. Wt., 20 lbs. Price... **$1.00**

No. 63M7165 Frame. Opening 2 feet by 2 feet 5 inches, for 2x4 studding. Weight, 25 pounds. Price..... **$2.20**



No. 63M7168 Sash. Opening 2 feet by 2 feet 5 inches, 1⅜ inches thick, glazed clear glass. Wt., 20 lbs. Price.. **$2.40**

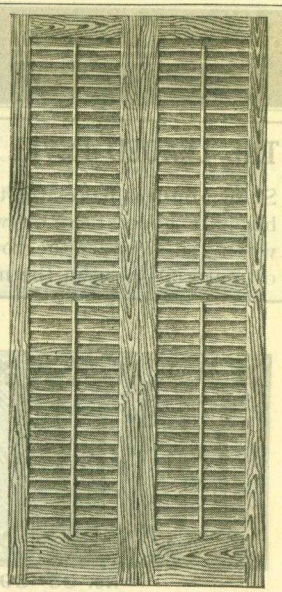
No. 63M7169 Frame. Opening 2 feet by 2 feet 5 inches, for 2x4 studding. Weight, 25 pounds. Price..... **$2.50**



No. 63M7170 Sash. Opening 2 feet by 2 feet, 1⅜ inches thick, glazed clear glass. Weight, 20 lbs. Price..... **$5.00**

No. 63M7171 Frame. Opening 2 feet by 2 feet, for 2x4 studding. Weight, 25 pounds. Price..... **$2.95**

BLINDS



FOR TWO-LIGHT, FOUR-LIGHT, EIGHT-LIGHT AND TWELVE-LIGHT WINDOWS.

Blinds are again becoming popular for all kinds of residences. They allow a free circulation of air through the house and at the same time keep out the hot rays of the sun. The use of blinds protects your carpets, rugs and tapestries from fading as they often do when exposed to strong light.

Blinds are 1 inch longer than the windows for which they are intended. This additional inch in length is for subsill frames and can be cut off if necessary.

BLINDS ARE MADE TO ORDER; THEREFORE WHEN ORDERING BE SURE TO ALLOW ABOUT TEN DAYS.

No. 63M7335 Blinds for Two-Light Windows, Rolling Slats, 1⅛ inches thick.

Top Sash Has Three Lights — Double Strength Glass

Top Sash Has Four Lights — Double Strength Glass

WHEN ORDERING be sure to give WIDTH first.

We can furnish other sizes at correspondingly low prices.

Send for quotations on the sizes you want.

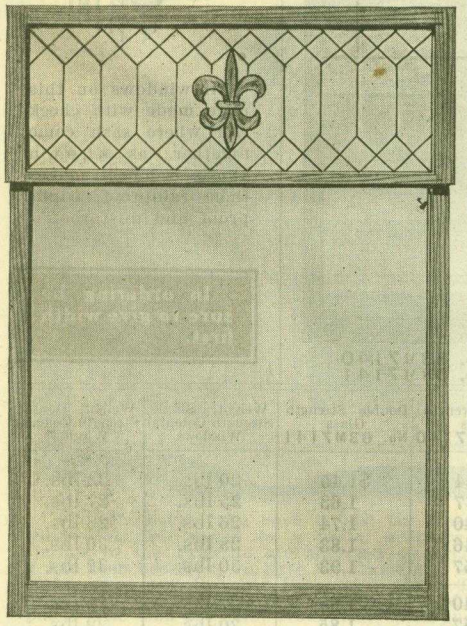
The check rail feature in our windows effectively keeps out rain, snow and wind.

Prices for windows on this page include both top and bottom sash glazed clear window glass.

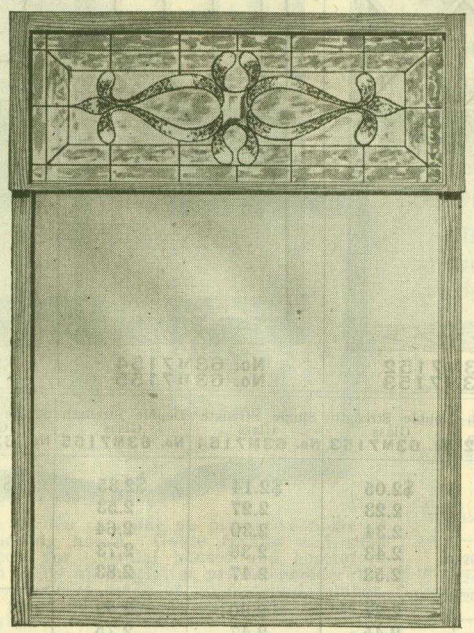
For prices of window frames for these windows see pages 52, 53, 54 and 56.

Windows Like These Increase the Value and Beauty of Your Home

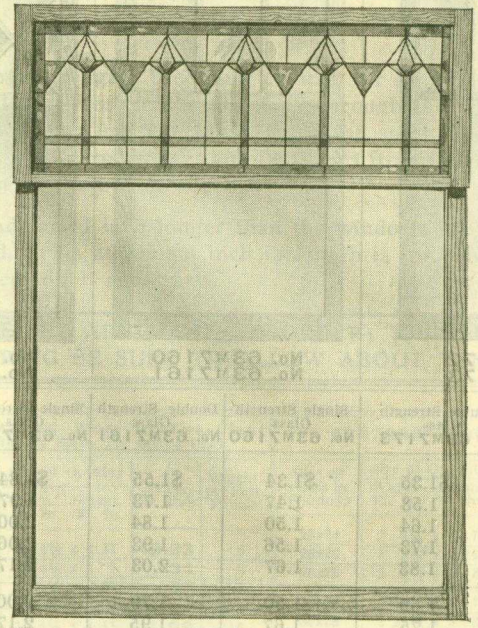
ART GLASS WINDOWS. The kind that will add beauty and value to your cottage, house or bungalow, at exceptionally low prices. The illustrations can only give an idea of the form of these designs and not of the colors.



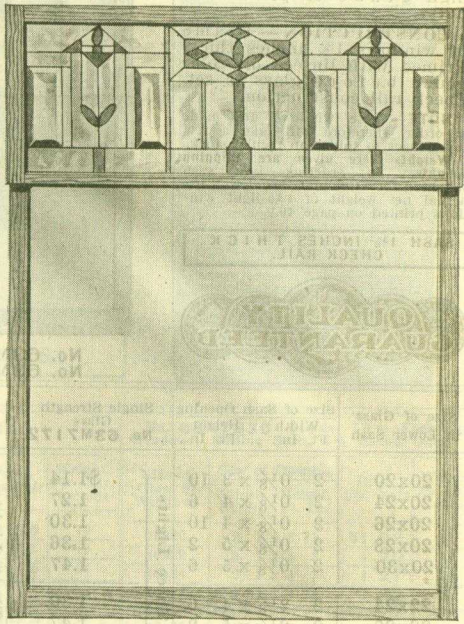
FLEUR DE LIS



CRESCENT



ROMAN



VENICE

All the upper lights of the windows shown on this page are glazed with leaded art glass in harmonizing colors. In the Fleur de Lis design the small ornament in the center is in light green glass; the Crescent design is worked out in pink, amber and green glass; the Roman design is worked out in green and rose color glass; the Venice design is worked out in amber, pink, red and green glass. This colored glass is divided by lead bars which will not rust or corrode. The bottom lights are clear double strength glass. The wood frames are made of genuine white pine. We carefully pack these windows and guarantee safe delivery to destination, as explained in the first pages of this book.

Any of the windows on this page can be glazed in bottom sash with plain plate glass instead of double strength. For price refer to column headed "Plate Glass" and ADD the amount quoted opposite the proper size to the price of the window you have selected glazed double strength bottom, and write the word "Plate" after the number in the catalog.

We would suggest that in ordering the larger sizes of front windows the bottom light be glazed with plate glass. While it costs a little more, you will be more than repaid by the added beauty of the window and by the added strength and durability. Remember, a front window is usually in the principal room of your home and a few dollars spent in beautifying this part of your home is not an expense but an investment.

Windows as shown are two-piece, check rail. Can be furnished as sash or one piece for 45 cents extra.

The frames priced below are our regular window frames fully illustrated and described on page 52 of this catalog. They are made with 1⅛-inch outside casing, plain drip cap. Price includes pulleys set in frame. Made with clear yellow pine pulley stiles and clear cypress casings and sills. Shipped knocked down, ready to set up.

Other frames for these windows are shown on pages 52 and 53. Storm sash for front windows are shown on page 37. When ordering frames or storm sash give opening size.

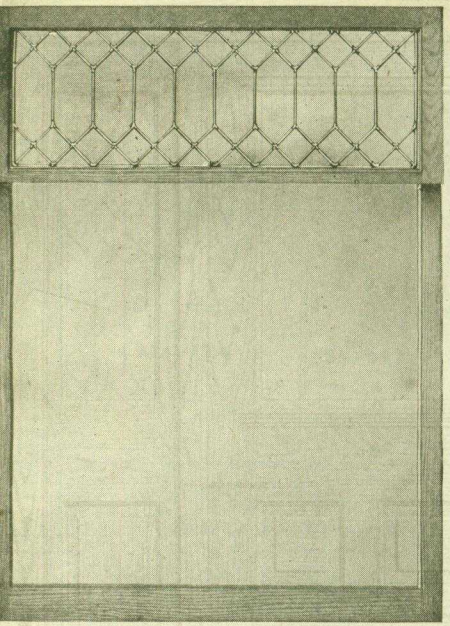
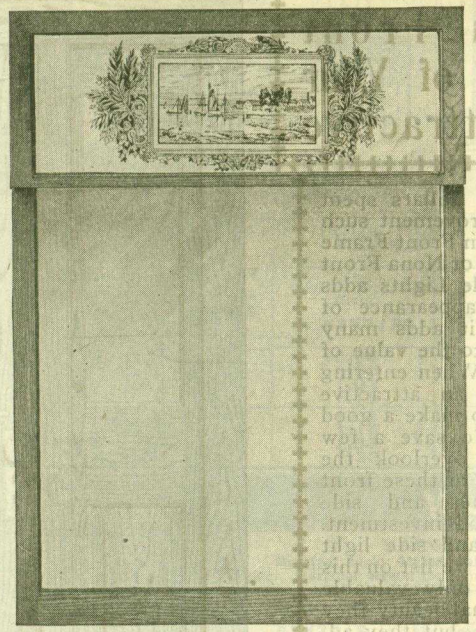
ALL SIZES OF WINDOWS LISTED ABOVE ARE CARRIED IN STOCK AND CAN BE SHIPPED PROMPTLY.

High Quality Front Windows and Frames to Match



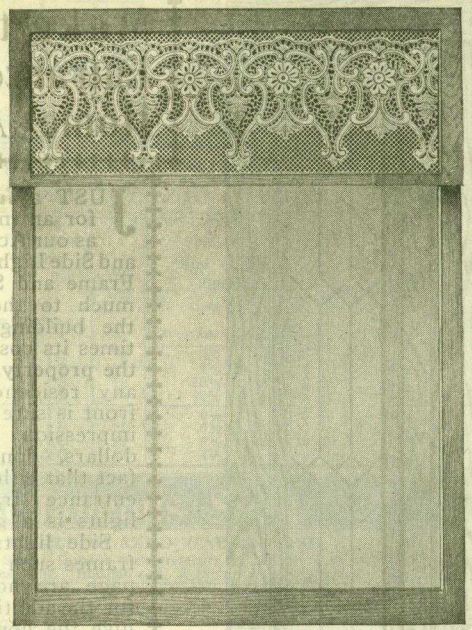
CRYSTAL

Top glazed clear leaded crystal sheet glass. Bottom glazed clear double strength glass.



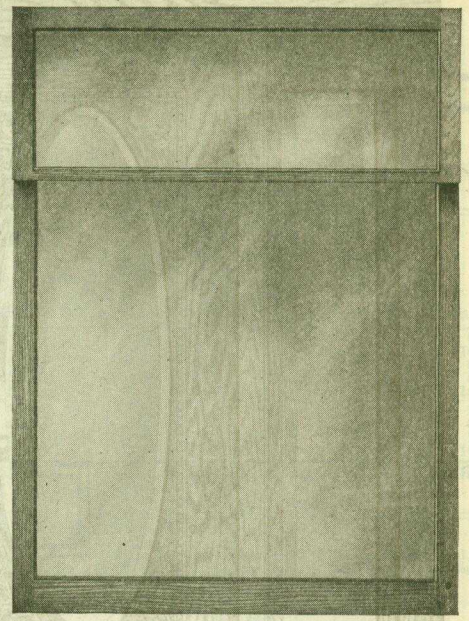
BAYVIEW

Top glazed sand blast design on double strength glass. Bottom glazed clear double strength glass.



REX

Top glazed sand blast design on double strength glass. Bottom glazed clear double strength glass.



GEM

Both top and bottom glazed clear double strength glass.

The above windows are check rail windows, the bottom sash may be raised or the upper sash lowered, if hung with weights. If made in one piece, to be placed stationary, add cents extra to the price of the window wanted and write the word "Special" after the number in the catalog, also state "one-piece, stationary." Order with our casement frames, ages 52 and 53.

The fancy windows illustrated on this page have the bottom sash glazed with clear double rength glass. The upper lights are shown to give our customers a variety to select from, and e designs are such as will harmonize with our glazed front doors. The sash is made of genuine hite pine, 1⅜ inches thick. Window consists of top sash and bottom sash. Price includes both sh. Glass securely fastened with points and putty. Use the sizes shown, as odd sizes not sted take a higher price. Prices for odd sizes quoted on application. We pack our windows with reat care and guarantee safe delivery.

Any of the windows on this page can be glazed in bottom sash with plate glass instead of plain double strength glass. For price refer to the columns headed "Plate Glass" and add the amount opposite the proper size to the price of the window you have selected, and write the word "Plate" after the number in the catalog.

The frames priced below are our regular window frames fully illustrated and described on page 52 of this catalog. They are made with 1⅛-inch outside casing, plain drip cap. Price includes pulleys set in frame. Made with clear yellow pine pulley stiles and clear cypress casings and sills. Shipped knocked down, ready to set up.

Other frames for these windows are shown on pages 52 and 53. Storm sash for these windows are shown on page 37. When ordering frames or storm sash for these windows give opening size.

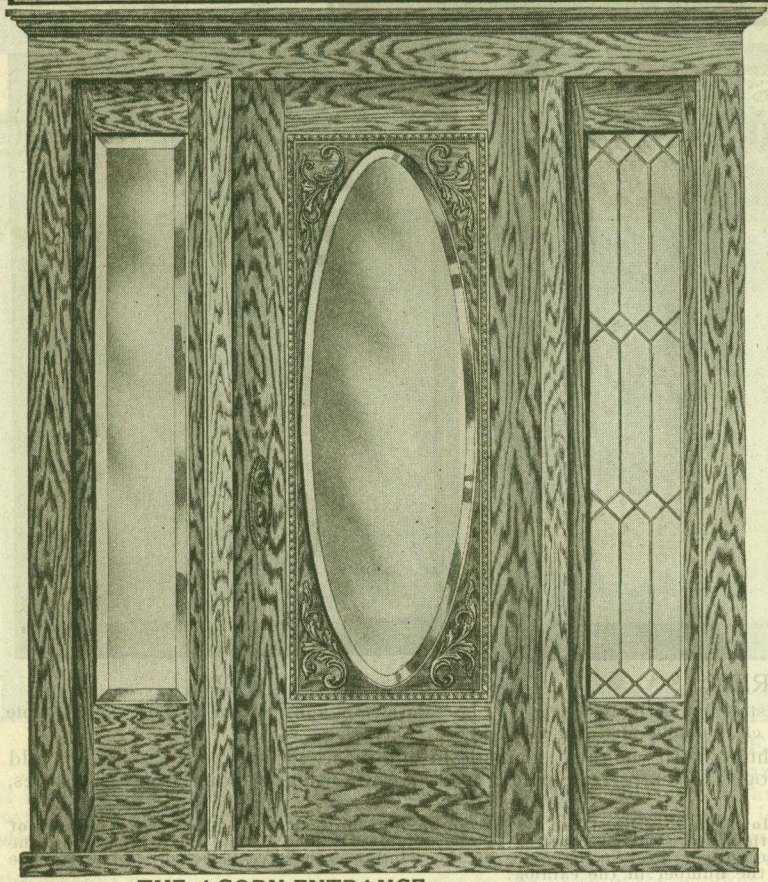
Frames for Side Lights and Doors



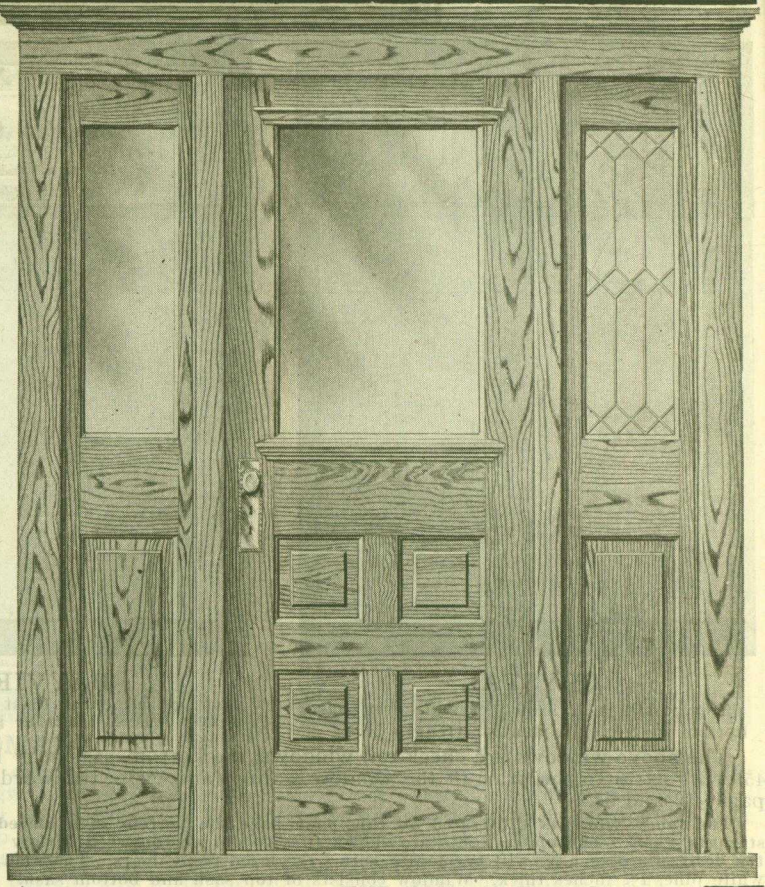
Make the Front Entrance of Your Home Attractive

JUST a few dollars spent for an improvement such as our Acorn Front Frame and Side Lights or Nona Front Frame and Side Lights adds much to the appearance of the building; it adds many times its cost to the value of the property. When entering any residence an attractive front is sure to make a good impression. To save a few dollars, don't overlook the fact that either of these front entrance frames and side lights is a good investment.

Side lights and side light frames such as we list on this page are not only valuable for the additional beauty they give the house, but they admit an abundance of light in what might otherwise be a dark hall. Furnished with crown mold cap.

Frames shipped knocked down.

Door Not Included in Prices Listed. See Other Pages for Doors.



THE ACORN ENTRANCE.

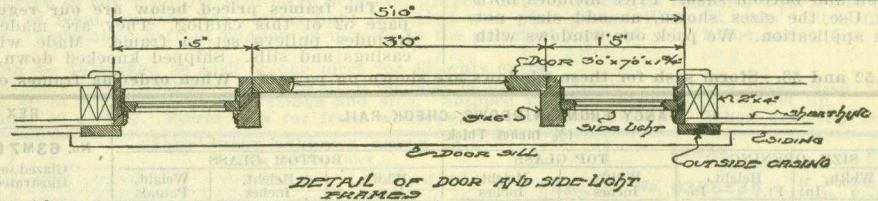
FRAME—Clear oak. Crown mold cap. 1⅛-inch outside casing. Made for full size 2x4 studs. Comes in two sizes as listed and will be rabbeted for a 1¾-inch door, unless otherwise specified. Shipping weight, approximately, 200 pounds.

SIDE LIGHTS—Oak veneer. 1⅜ inches thick. Glazed with either clear double strength glass, leaded crystal sheet (like illustration at the right) or bevel plate. Come only in two sizes as listed. Shipping weights: Bevel plate, 50 pounds; leaded glass, 45 pounds; plain double strength glass, 40 pounds.

DOOR—Any of the oak veneer doors shown on pages 11 and 12 in the 2-foot 8-inch by 6-foot 8-inch or 3-foot by 7-foot sizes will match.

Acorn side lights can be made to order in white pine. Prices on request.

Furnished only in sizes listed.



DETAIL OF DOOR AND SIDE-LIGHT FRAMES

THE NONA ENTRANCE.

FRAME—Clear white pine. Crown mold cap. 1⅛-inch outside casing. Made for full size 2x4 studs. Comes rabbeted for a 1⅜-inch door unless otherwise specified. Shipping weight, approximately, 140 pounds.

SIDE LIGHTS—Clear white pine. 1⅜ inches thick. Glazed with either double strength, leaded crystal sheet (like illustration at the right) or bevel plate glass. Come only in two sizes as listed. Shipping weights: Bevel plate, 50 pounds; leaded, 45 pounds; plain double strength, 40 pounds.

DOOR—Any of our clear white pine doors with the same length glass as the side lights can be used with this entrance.

Furnished only in the sizes listed.

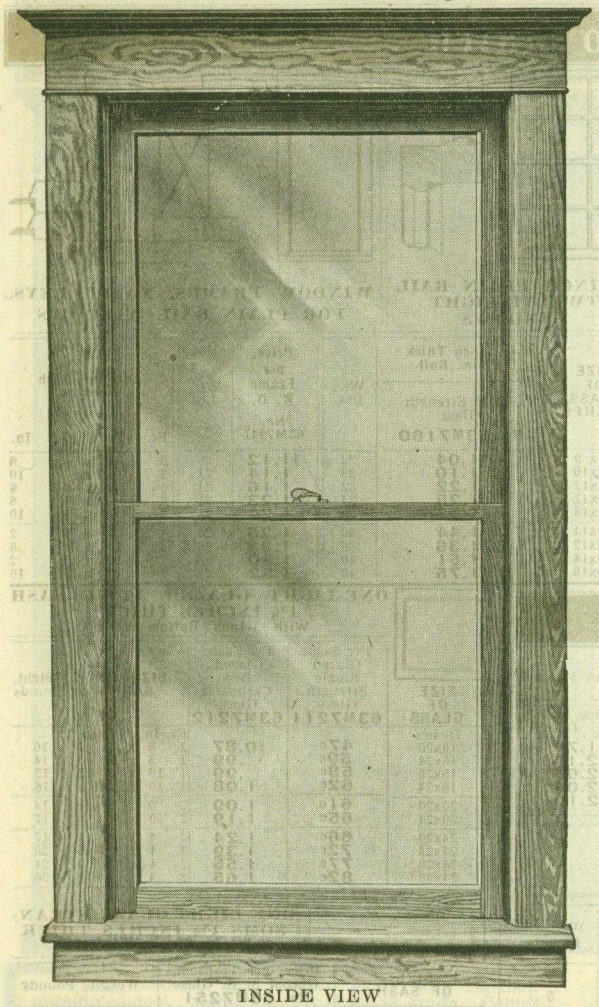
No. 63M7200 Sash Weights. To hang a window, four sash weights are required, each weighing one-fourth the weight of entire window. Our weights are standard diameter and length, according to weight. **We ship sash weights from foundry near CHICAGO, one Eastern foundry and one Western foundry, whichever foundry is nearest you.** Sizes, from 3 to 8½ pounds by half pounds, and from 9 to 26 pounds by pounds. **When ordering be sure to state weight.** Price, per pound.....2c



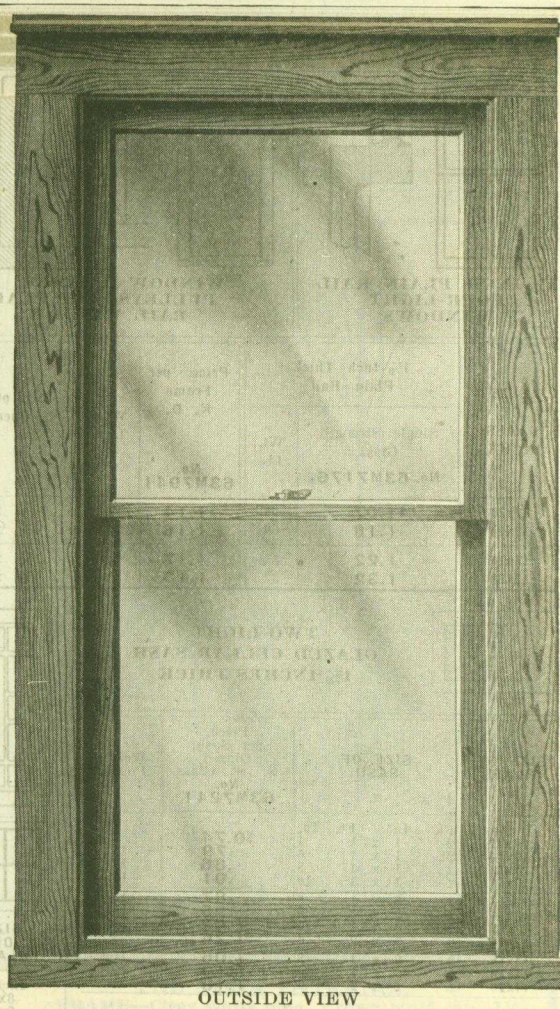
INSIDE VIEW

WINDOW SETS

Including

Glazed Window, Window Frame, Inside Trim, Hardware. Frame and Trim Cut to Exact Size

Ready to Nail in Place



OUTSIDE VIEW

CUT TO EXACT SIZE, perfectly machined, and better than skilled hand carpentry could make them.

This applies to Window Frames, Interior Casing, Head Casing, Sills, Aprons, etc., and includes the glazing of the sash, making trimming or cutting unnecessary, except the planing of edges on Glazed Sash, a simple bit of work that should be done on the job.

PRICES ON OPPOSITE PAGE

Contractors, here is your chance to underbid your competitor by saving of labor and cost of material by using these sets.

Save trouble in ordering various parts.

Save errors in quantity of material.

Save waste in cutting material.

Save labor in putting windows in place.

You can **save** all this by buying our Ready Cut to Fit Window Sets.

ARTICLES INCLUDED IN WINDOW SETS.

QUALITY GUARANTEED

WINDOW—Genuine Clear White Pine, 1⅜ inches thick, check rail. High grade glass, carefully set with a high grade of points and putty.

WINDOW FRAME—Our highest grade Drip Cap Frame, made with yellow pine pulley stiles and cypress casing and sill. Every part cut to size, ready to nail together. Pulleys set in place. Pulley stiles dadoed, or grooved to receive head and plowed or grooved for parting stop. Also cut so sash weights can be installed without any trouble. Outside casing 1⅛ inches thick. Made for 2x4 studding.

MOLDINGS FOR TRIMMING INSIDE OF WINDOW—Made of clear yellow pine, carefully selected for grain and color. Each piece is cut to the exact size required. The head trim is composed of three different moldings and nailed together; the ends returned or trimmed, as shown in illustration. The inside window sill and apron which is shown under it, are cut to exact size. All parts carefully **sandpapered,** ready to nail in place and varnish.

HARDWARE—High grade sash weights and sash locks to fit each set. Enough nails, screws and sash cord sent to complete the window.

WHEN ORDERING WINDOWS OR FRAMES OR WINDOW SETS BE SURE TO GIVE WIDTH FIRST

PRICES ON OPPOSITE PAGE

PACKING. We use extra special care in packing these sets. Windows are crated with sound ½-inch lumber. Frames are bundled and tied with patent fasteners. The moldings are packed in cardboard cartons, carefully sealed, excluding dust and insuring your getting bright clean material. Size of the window is marked on both the frame and the moldings, so each set can be matched up without opening. These window sets match our door sets shown on page 35.

ALL SETS CARRIED IN STOCK AND CAN BE SHIPPED PROMPTLY.

Prices on Complete Window Sets

Order complete window sets from this page. Allow the price given in columns 8 or 9, using care to see the size wanted is on the same line. Sizes are shown in columns 1 and 2.

Prices shown in columns 3, 4, 5, 6 and 7 enable you to buy any part of window set. Windows only are priced in columns 3 and 4, frames in column 5, inside moldings, casing, sills, etc., in column 6, sash weights, hardware, etc., in column 7.

ETS WITH TWO-LIGHT CHECK RAIL WINDOWS.

When Ordering Give Width First.

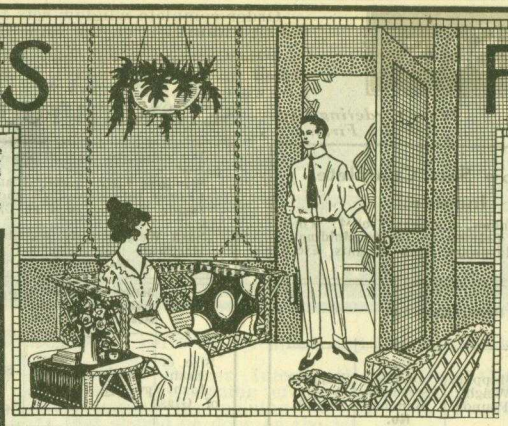
AVOID MISTAKES—WHEN ORDERING GIVE WIDTH FIRST.

HOME COMFORTS FOR HOT WEATHER



There is economy in buying our screen doors. We use material of tested durability and strength. Cypress, exposed to the elements, has been known to last 100 years. It is known everywhere as the "wood eternal," and "the wood that resists decay." Everybody knows about the merits of white pine. **Cypress and white pine are the principal woods used in the construction of our doors,** excepting in our Ozone door, which is solid oak. The workmanship is high class, and back of every door stands the Sears, Roebuck and Co. guarantee of satisfaction or money back.

We Do Not Handle Cheap Doors, but Specialize on High Class Doors at Low Prices.

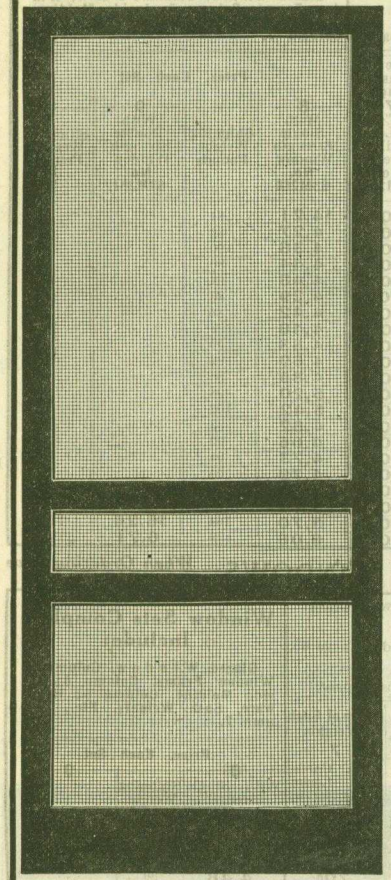
Screen Doors

All our screen wire is standard mesh; black and galvanized, twelve squares to the inch. Bronze, fourteen squares to the inch. The black wire is high grade steel with black enamel baked on. The galvanized wire is a steel wire, which has been galvanized by the same process that was used in galvanizing the Atlantic cable; the best galvanized wire that we can secure. Bronze is the most durable metal known for outside purposes. Ours is genuine bronze wire, very ornamental and lasting.

We crate our doors very carefully and guarantee them to reach you in good condition. **Order by number in catalog and be sure to give size wanted. Shipped from our factory in WESTERN OHIO.**

IMPORTANT NOTICE.
Our black wire is not painted. It is enameled and the enamel is baked on.

Hardware for these doors will be found on page 133.



PROTECTION.

1⅛ inches thick. All stiles and rails 3 inches wide, with the exception of the bottom, which is 6 inches wide. This door is substantial and well made. Painted black. Furnished with bronze, galvanized or black wire.

Prices of Protection Doors.

Size, Ft.	In. Ft.	In.	63M15 Black Wire	63M16 Galvanized Wire	63M17 Bronze Wire

OZONE.

Our highest grade door. It is of pleasing design and superior workmanship. Made of **clear oak** and shipped to the customer in the white, that is, without any paint or varnish, so that the door may be finished to match the woodwork. A front door to be proud of. 1⅛ inch thick stiles and rails 4¾ inches wide, except bottom, which is 8¾ inches wide. Panel shown is 8 inches wide.

SCREENS

Everyone realizes how necessary screens are to health and comfort, but few people realize the economy in buying good screens. Window screens as a rule are subject to a great deal of wear and tear. They are exposed to the weather in the summer and have to be taken down and stored when winter comes. Cheap screens will not stand this treatment, therefore a great many of the screens that are being offered to the public last only one season. We are offering a line of screens made of high quality materials and of strong, rigid construction. With ordinary care our screens will last many years; therefore, you will see the economy in paying a few cents more and eliminating your screen troubles. **Shipped from Millwork Factory in WESTERN OHIO.**

Window Screens.

Made of cypress and genuine white pine, woods of weather resisting qualities. All screens 1⅛ inches thick. The stiles, that is the pieces that run lengthwise, are 2 inches wide; the top rail is also 2 inches wide and the bottom rail 3 inches wide. This allows a small margin for trimming. Painted black. Carefully crated. Guaranteed to reach you in good condition. **Glass sizes given are for two-light windows. If you have four, eight or twelve-light windows order by the opening sizes.**

For prices on window screens one-half the height of any of the above openings deduct one-fourth from the price asked for the full height of that particular opening. These screens will be ⅞ inch thick, grooved at the sides, and we will include with them the necessary molding upon which they slide up and down.

Black wire is a high grade of steel wire covered with black enamel. Galvanized wire is a high grade steel wire heavily galvanized. Bronze wire is the most durable wire known as well as the most ornamental. All wire is standard mesh. Black and galvanized, 12 squares to the inch. Bronze, 14 squares to the inch.

SCREEN YOUR PORCH

A screened porch makes the most comfortable living room for spring, summer and fall. Fresh air and sunshine improve health and prolong life. All doctors recommend plenty of fresh air. Sleeping porches, dining porches, now very popular, can be made at a small cost by screening an open porch or open balcony. Measure your porch today, following the few simple directions given below, and send us your order. You will be surprised to learn how little this additional comfort will cost you.

HOW TO ORDER PORCH SCREENS

Draw a rough diagram of your porch and indicate on it the width, length and height of the porch.

Take the measurements along the line on which you intend to place the screens. Sometimes screens are placed outside the porch columns and sometimes they are placed inside the porch columns. Tell us which way you want yours.

Screen doors are not furnished with porch screens unless especially ordered. If door is wanted, indicate on the sketch just where the door is going to be. Pick out the door desired on the preceding page and allow $2.00 extra over the price of the porch screens and door to pay for the frame in which the door is set. The price of this frame includes the transom that goes above the door and the screen panel that sets in the transom.

In making your screens we will make them in sections of 3 to 4 feet in width. This will make them easy for handling and storage. For 15 cents per section extra we will groove these sections so they will fit together. All the woodwork will be neatly painted black.

Our porch screens are made in the same substantial manner as our screen doors and window screens and we guarantee them to give perfect satisfaction.

Prices are based on height of screens.

PRICES FOR PORCH SCREENS.

All Screen Windows and Doors Carefully Packed. Guaranteed to Reach You in Good Condition.

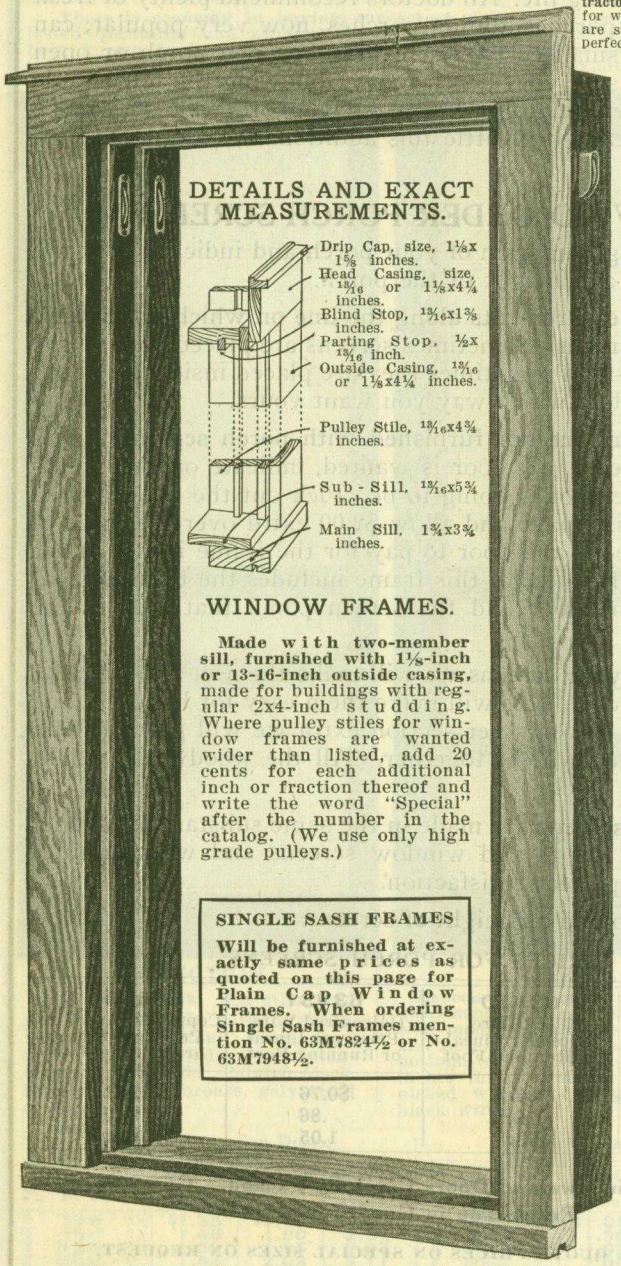
WE WILL QUOTE PRICES ON SPECIAL SIZES ON REQUEST.

Plain Drip Cap Window Frames and Single Sash Frames

NOTE—The outside casing and the sills of our window and sash frames are made of cypress, the very best wood for the purpose that can be secured. Opening size shown is the outside measurement of the window and the inside measurement of the frame.

High grade frames made of practically clear lumber are now within the reach of contractors and builders at reasonable prices. Frames are cut to the exact size of the window for which they are intended and all that is necessary is to nail them together. All frames are shipped in bundles, one frame to a bundle, so they will reach you in a clean and perfect condition. Bundles are wired together instead of being tied. They take a lower freight rate when shipped this way and there is no possible chance of breakage. As each part is cut to exact size they are easy to put together. Contractors claim our frames are the best and better than they can buy elsewhere.

All frames with 13/16-inch outside casing have blind stop rabbeted to receive 1⅛-inch storm sash and screens.



DETAILS AND EXACT MEASUREMENTS.
Drip Cap, size, 1⅛x1⅝ inches.
Head Casing, size, 13/16 or 1⅛x4¼ inches.
Blind Stop, 13/16x1⅜ inches.
Parting Stop, ½x 13/16 inch.
Outside Casing, 13/16 or 1⅛x4¼ inches.
Pulley Stile, 13/16x4¾ inches.
Sub-Sill, 13/16x5¾ inches.
Main Sill, 1¾x3¾ inches.
WINDOW FRAMES.
Made with two-member sill, furnished with 1⅛-inch or 13-16-inch outside casing, made for buildings with regular 2x4-inch studding. Where pulley stiles for window frames are wanted wider than listed, add 20 cents for each additional inch or fraction thereof and write the word "Special" after the number in the catalog. (We use only high grade pulleys.)
SINGLE SASH FRAMES
Will be furnished at exactly same prices as quoted on this page for Plain Cap Window Frames. When ordering Single Sash Frames mention No. 63M7824½ or No. 63M7948½.

Crown Mold Cap Window Frames

With Cypress Outside Casing and Sills.

The window frames listed on this page are strictly first class frames made of practically clear lumber with three-member crown mold cap. All frames are shipped knocked down, securely packed, complete frame to the bundle. We cut to the exact size of the opening for which they are intended. All that is necessary after receiving these frames is to nail them together, which takes but a few moments' time. Made for buildings with regular 2x4-inch studding.

All window frames with 13/16-inch outside casing have blind stop rabbeted to receive 1⅛-inch storm sash and screens.

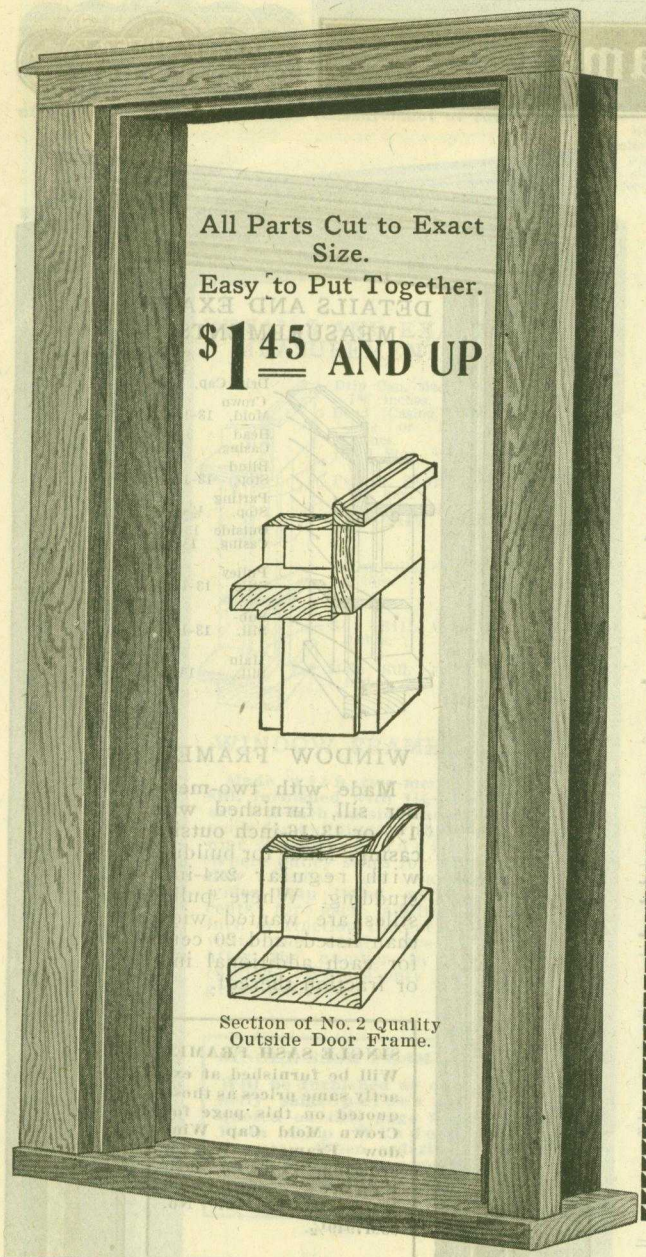
CROWN MOLD CAP WINDOW FRAMES.

WINDOW FRAMES.

Made with two-member sill, furnished with 1⅛ or 13/16-inch outside casing. Made for building with regular 2x4-inch studding. Where pulley stiles are wanted wider than listed, add 20 cents for each additional inch or fraction thereof.

SINGLE SASH FRAMES Will be furnished at exactly same prices as those quoted on this page for Crown Mold Cap Window Frames. When ordering Single Sash Frames mention No. 63M7828½ or No. 63M7949½.

No. 2 Quality Door and Window Frames



Section of No. 2 Quality Outside Door Frame.

To meet the demand for a low priced frame, we quote on this page door and window frames of No. 2 quality, one grade below our strictly first quality frames illustrated and described on pages 52, 53 and 55. Our No. 2 window and door frames contain but few defects such as solid knots and sap stains and will compare in quality with the frame that is sold by some manufacturers as a No. 1 quality frame. We recommend our strictly first class frames shown on pages 52 and 53 in preference to our No. 2 frames shown on this page because our No. 1 frames are much better value for your money.

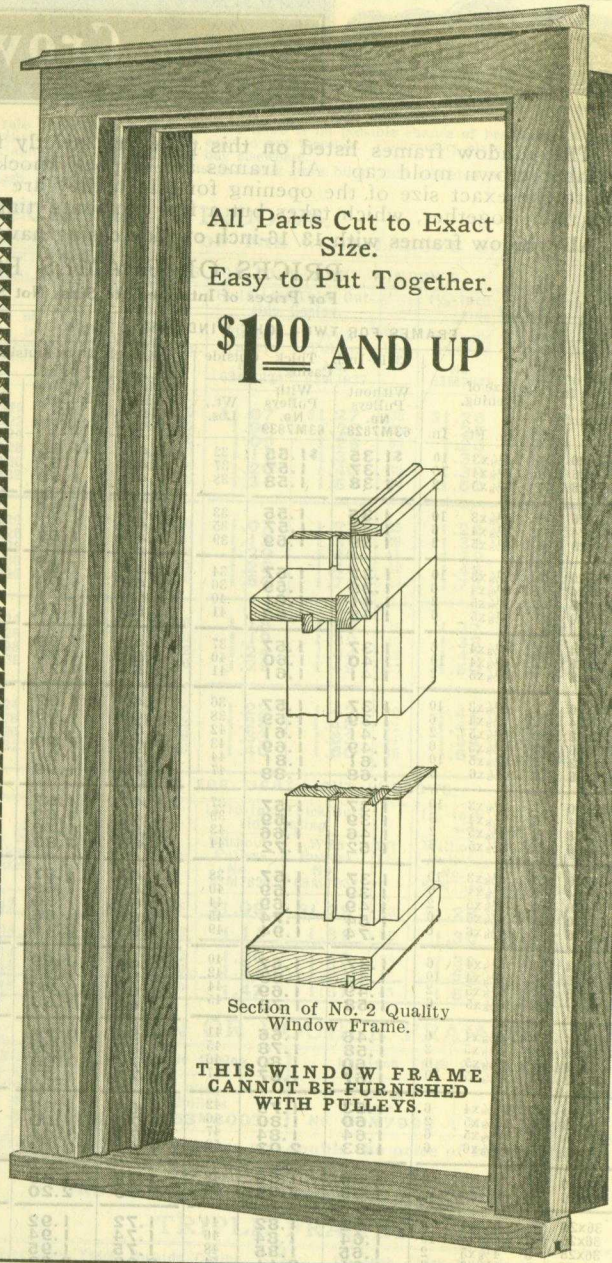
Shipped to you knocked down in bundles, in that way eliminating all possible chance of breakage while in transit. These frames furnished only with 13/16-inch outside casing. Blinds 1⅛ inches thick can be used with the 13/16-inch casing, as the blind stop is rabbeted on these frames. The window frame listed to the right is furnished with only a single sill and does not have the sub-sill as shown on the high grade frames listed on pages 52 and 53.

Door frames are furnished only in two sizes, 2 feet 8 inches by 6 feet 8 inches and 3 feet by 7 feet, from which they may be cut to fit any smaller size opening. **Window frames furnished in all sizes shown in our window list. When ordering give size of glass and number of lights in window.** For variety of sizes refer to page 52.

Double or twin frames are twice the price of one regular frame. Triple frames are three times the price of one regular frame.

All measurements on No. 2 frames are the same as our high grade drip cap frames with 13/16-inch outside casing. (See page 52.)

When ordering frames be sure to state whether they are to be used for hemlock or yellow pine studding. GIVE EXACT WIDTH OF STUDS.



Section of No. 2 Quality Window Frame.

THIS WINDOW FRAME CANNOT BE FURNISHED WITH PULLEYS.

A Complete Line of Quality Door Frames

DOOR FRAMES WITH OAK SILLS

We make our frames in large quantities by improved machinery, thus cutting down labor cost to the minimum. We use only thoroughly dried and seasoned lumber which is kept from the weather in mammoth warehouses, so that when our frames are cut and kept properly protected with paint there is little danger of warping or checking. Our frames will give better satisfaction than frames made on the job, or any of the so called stock frames.

Note the excellent material we use in our frames. Our contractor customers say they are best. We use practically clear Louisiana red cypress for the outside casings, moldings and jambs and **solid oak for the sills.** There is no better material for the manufacture of the various parts of the frame.

All frames are knocked down and bundled for shipment so that they will reach you in a clean and perfect condition and take the lowest freight rate. There is no chance for breakage when frames are shipped in this way. As each part is cut to exact size the frames go together readily.

When ordering frames be sure to give the thickness of the door for which the frame is wanted. State whether to be used with hemlock or yellow pine studding. GIVE EXACT WIDTH OF STUDS.

We carry about 10,000 frames of various sizes on hand and can ship promptly.

DEDUCT 25c FOR EACH FRAME IF ORDERED WITH SOFT WOOD SILLS

IMPORTANT—When ordering either window or door frames, be sure to give width first.

Everything as Represented and Plenty of Material.

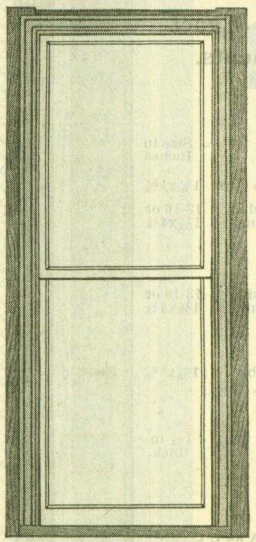
R. F. D. No. 2, Clayton, Mich.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—Our home is all completed now except the grille and screens. We are delighted with it and everybody admires our house. A great many people have come to see it inside and out. One of our carpenters is building the same house at Manitou Beach. I take pleasure in making this statement that **everything was as you represented it,** and plenty of all material.

JEFFERSON M. ADAMS.

WINDOW FRAMES FOR BRICK VENEER BUILDINGS.



This frame has a 1⅛x1⅝-inch clear brick mold, ⅞x3¾-inch blind stop, ⅞x5⅝-inch jamb including blind stop, ½x⅛-inch parting stop, 1¾x7½-inch sill. The blind stop, while made of a sound grade, need not be as good as the balance, as it is practically all covered up; the rest of the frame is made from good sound material, allowing but few defects.

PRICES INCLUDE PULLEYS.

MADE OF DIFFERENT KINDS OF WOOD, SHIPPED IN THE KNOCKDOWN, SECURELY BUNDLED.

Double Rabbet, ⅜x5½ Inch.

No. 63M8165	White Pine. Price, per 100 lineal feet	$4.90
No. 63M8166	Yellow Pine. Price, per 100 lineal feet	4.25
No. 63M8167	Oak. Price, per 100 lineal feet	8.75
No. 63M8168	Wisconsin Birch. Price, per 100 lineal feet	7.00
No. 63M8169	Cypress. Price, per 100 lineal feet	5.10

Single Rabbet, 1⅜x5½ Inch.

State if jamb is wanted with single or double rabbet, also give thickness of door. If wanted in special lengths add 15 per cent to prices quoted.

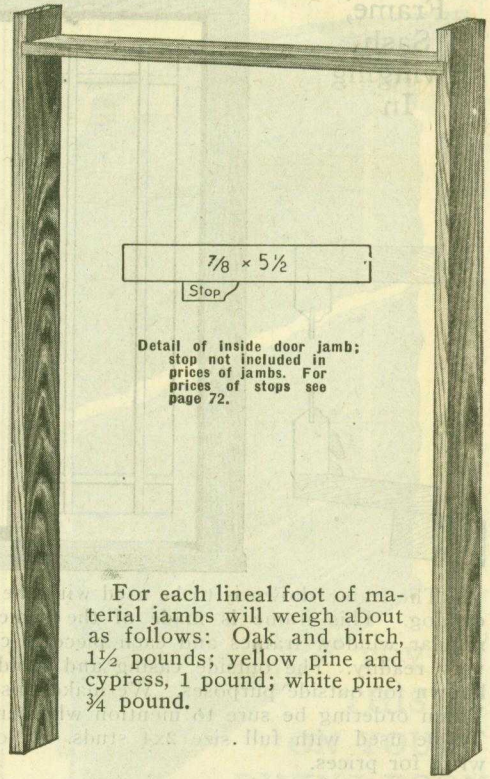
PLAIN INSIDE DOOR JAMBS.

Made of clear stock in the following woods: Genuine white pine, yellow pine, oak, Wisconsin birch and cypress. Carpenters and contractors cannot afford to make door jambs when high grade jambs such as we list on this page can be had at such reasonable prices. Every piece of lumber going into the manufacture of these jambs is first cut to ⅞x5½ inches, there being absolute uniformity in thickness. The side jambs are dadoed with a machine made for this particular purpose. The head jamb fits into this dado perfectly. All jambs are surfaced and **sanded** with our **heavy sanding machinery** and are ready for finishing when received. In other words, where it takes us but a few minutes to turn out a perfect jamb, it would take a carpenter much longer to make jambs which would not be anywhere near as perfect, owing to the work all having to be done by hand.

When inside door jambs are wanted with transom head, be sure to give height of transom when ordering. The prices shown below do not include stops, which should be ordered separately.

Shipped knocked down, carefully bundled for shipment, ready to set up.

IMPORTANT—The jamb is ⅞x5½ inches. If wanted wider than 5½ inches add for each additional inch or fraction thereof, 25 cents for white pine or cypress jambs, 20 cents for yellow pine jambs and 35 cents for oak or birch jambs.



Detail of inside door jamb; stop not included in prices of jambs. For prices of stops see page 72.

For each lineal foot of material jambs will weigh about as follows: Oak and birch, 1½ pounds; yellow pine and cypress, 1 pound; white pine, ¾ pound.

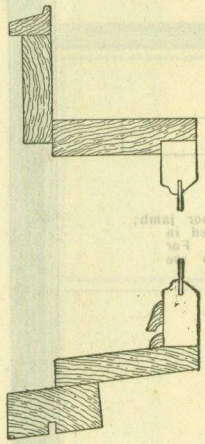
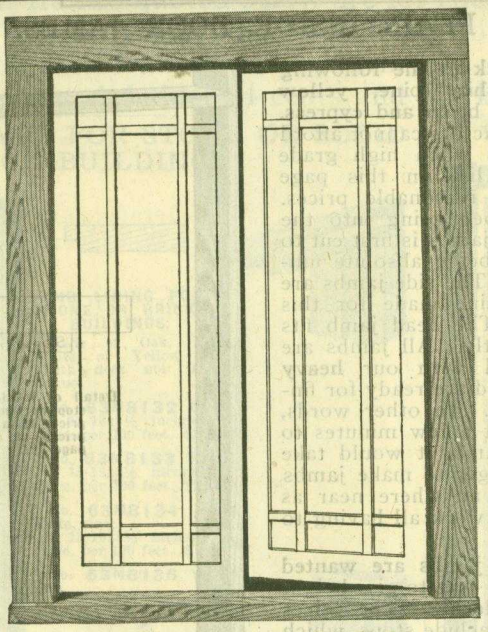
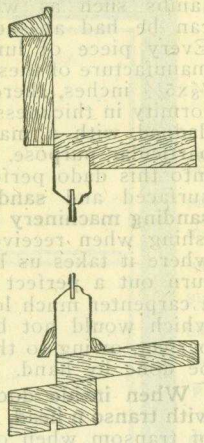
Frames for Casement Sash

Detail of Frame, Sash Swinging In





Detail of Frame, Sash Swinging Out



The frame shown is to be used with the casement sash on pages 38 and 39 of this catalog. This frame is made of the same high class material that goes into our regular window frames and each piece is cut to exact size so that it goes together very readily. The outside casing and molding are made of cypress, the best wood known for outside purposes. We make this frame for sash to swing either in or out. When ordering be sure to mention whether you want your sash to swing in or out. To be used with full size 2x4 studs. If other sizes than those listed are wanted, write for prices.

Price, per Frame, Knocked Down and Bundled.

Material for Beamed Ceilings, Wainscoting and Plate Railing

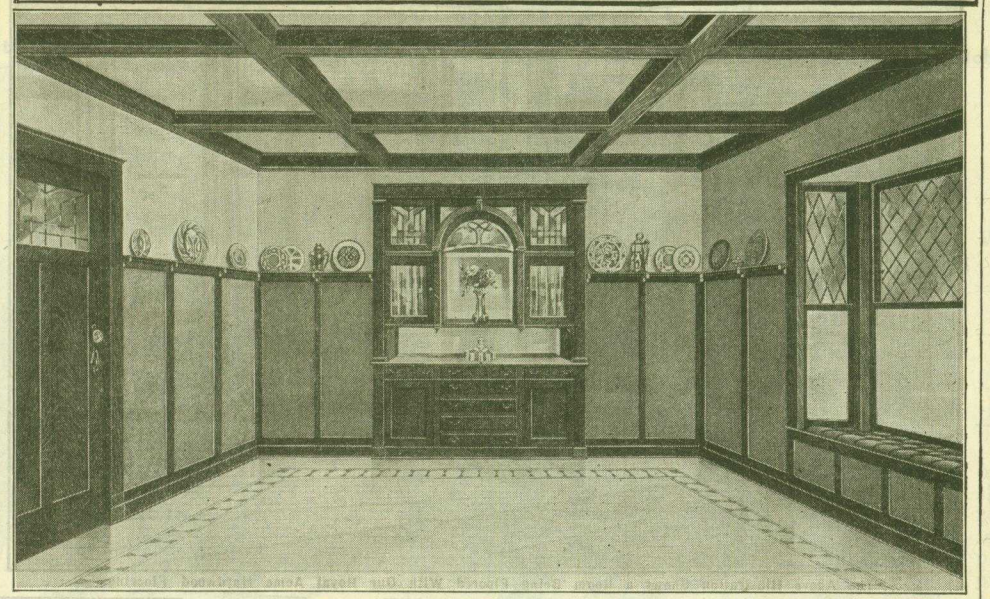
ESPECIALLY DESIGNED FOR STRICTLY UP TO DATE INTERIORS.

QUALITY GUARANTEED

In place of bare ceilings and bare walls build an artistic beamed ceiling and a Peerless Wall Board panel wainscot. It will add beauty and refinement to your home.

Beamed Ceilings Will Add Hundreds of Dollars to the Value of an Old House.

The cost of remodeling is very small and, by the addition of a few dollars in the cost of material and labor, an out of date house can be transformed into an up to date residence. The materials we furnish are shipped knocked down, carefully bundled. For such small cost a beamed ceiling is a splendid investment. Any carpenter can install it at small expense.

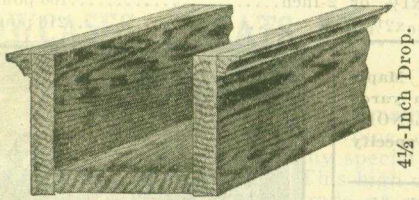


$5.88 For Yellow Pine — PAYS FOR ALL THE MATERIAL NECESSARY FOR A BEAMED CEILING IN A ROOM 12x12 FEET — **$10.08** For Oak

IN ORDERING BEAMED CEILINGS first decide whether narrow beams or wide beams are desired, bearing in mind that for a medium size room the narrow beams are preferable. For large rooms with high ceilings the wide beams may be used to good advantage.

IF IN DOUBT ABOUT THE QUANTITY OF MATERIAL YOU WILL REQUIRE, send us a rough sketch of the room you wish to finish and we will tell you to the penny what the material will cost and guarantee a big saving in price. **Order by number and state whether oak or yellow pine finish is desired.**

MEDIUM BEAM.



6 Inches Wide.

Composed of 5 members. Two pieces of cove molding, two drop boards and one face board. Price includes all 5 members.

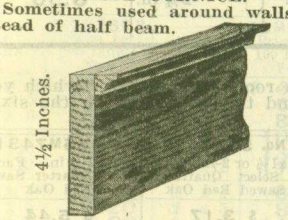
No. 63M4010 Yellow Pine. Price, per lineal foot.....8c

No. 63M4015 Plain Oak. Price, per lineal foot.....15c

Weight, about 2½ pounds per lineal foot.

WALL CORNICE.

Sometimes used around walls instead of half beam.



Composed of 2 members. One piece of cove molding and one drop board. Price includes both members.

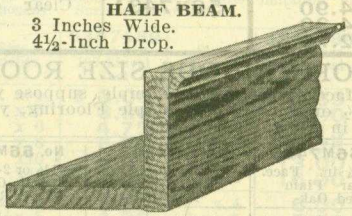
No. 63M4065 Yellow Pine. Per lineal foot.....4c

No. 63M4066 Plain Oak. Per lineal foot.....7½c

Weight, about 1 pound per lineal foot.

HALF BEAM.

3 Inches Wide.
4½-Inch Drop.



Composed of 3 members. One piece of cove molding, one drop board and one face board. Price includes all 3 members.

No. 63M4060 Yellow Pine. Per lineal foot.....5c

No. 63M4063 Plain Oak. Per lineal foot.....8½c

Weight, about 1½ pounds. per lineal foot.

LARGE BEAM.

13 Inches Wide.

Composed of 5 members. Two pieces of cove molding, two drop boards and one face board. Price includes all 5 members.

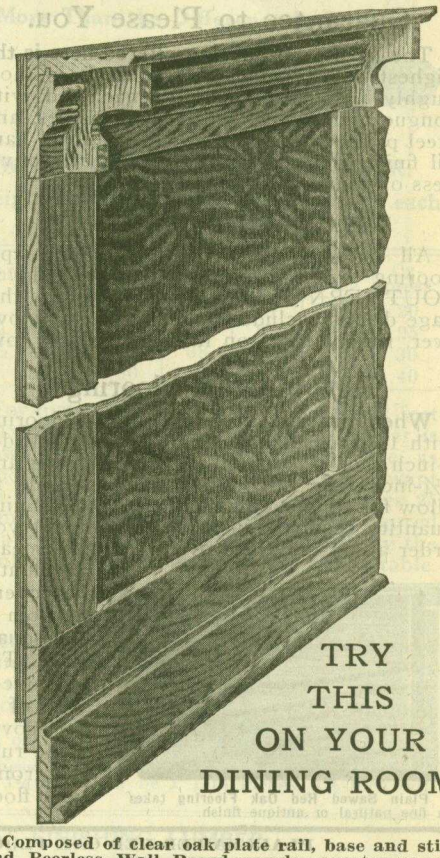
No. 63M4020 Yellow Pine. Price, per lineal foot.....12c

No. 63M4025 Plain Oak. Price, per lineal foot.....24c

Weight, about 3½ pounds per lineal foot.

SHIPPED IN RANDOM LENGTHS 8 TO 12 FEET. 10 PER CENT EXTRA FOR SPECIFIED LENGTHS.

WAINSCOTING.



TRY THIS ON YOUR DINING ROOM

Composed of clear oak plate rail, base and stile and Peerless Wall Board panels, quarter sawed oak finish, illustrated and described on page 96 of this book. From the illustration you will see that this makes a very effective combination of wainscoting and plate rail. Stiles and brackets are set 16 inches apart. Shipped knocked down, carefully bundled, ready to put up. Price includes everything needed for a complete job. Top of plate rail is 6 feet from floor. Base is made from 1-inch material and both members together will be 10 inches wide. Stile from ½-inch material 1¾ inches wide. Plate rail is the same as No. 63M7854 on page 72. Weights same as moldings.

No. 63M4041 Price, per lineal foot, 6 feet high....60c

In case you do not wish to use wall board panels we list below the price of plate rail, stile and base in both yellow pine and oak.

OUR ROYAL ACME HIGH GRADE HARDWOOD FLOORING

Send Us a Trial Order: We Guarantee to Please You.

The hardwood flooring offered here is the highest quality in each grade. It is thoroughly kiln dried, carefully machined, with tongue and groove on ends and sides, and steel polished. It will take a beautiful hard oil finish and add greatly to the attractiveness of your home.

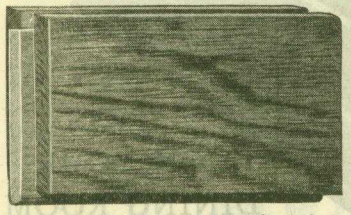
WE CAN SHIP PROMPTLY.

All sizes of oak and all sizes of maple flooring will be shipped from yards in SOUTHERN ILLINOIS. Prices on this page do not include freight charges. However, freight rates on lumber are very low.

How to Order Flooring.

When ordering, remember that flooring with 1½-inch face is counted 2 inches wide; 2-inch face is counted 2½ inches wide and 2¼-inch face is counted 3 inches wide to allow for tongue and groove. To determine quantity required, increase the amount you order about one-third over the actual measurement of the surface to be covered. For instance, a room 10x10 feet equals 100 square feet to be covered. To this you should add one-third, making 133 feet of flooring required for covering same. The same rule applies no matter from whom you buy your flooring.

The Above Illustration Shows a Room Being Floored With Our Royal Acme Hardwood Flooring.



Plain Sawed Red Oak Flooring takes a fine natural or antique finish.

Maple Flooring.

This is a very hard flooring, will stand extreme wear, easy to keep clean. Takes high polish.

Oak Flooring and Maple Flooring shipped from yards in SOUTHERN ILLINOIS. In ordering be sure to specify width of face wanted.

See table below showing how easy it is to order hardwood flooring for various size rooms.

QUALITY GUARANTEED

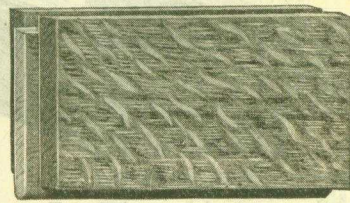
RULES FOR GRADING OAK AND MAPLE FLOORING.

CLEAR GRADE is the highest grade, being clear, as its name implies. Furnished in standard lengths.

SELECT GRADE is the next grade below Clear, containing some slight imperfections. This, however, is a very high grade of flooring and gives excellent satisfaction for moderate priced work. Standard lengths.

No. 1 Factory Maple Flooring is the next grade below Select, but will make a serviceable, medium priced floor where good wearing qualities are desired for purposes where a very fine finish is not necessary. This grade furnished only in 13/16-inch maple.

WEIGHTS—Oak and Maple Flooring per 100 feet.
3/8x1½ or 2-inch.....100 pounds.
13/16x2¼-inch .....210 pounds



Quarter Sawed Red Oak Flooring. Note the beautiful flaky grain shown in illustration. This is the most beautiful flooring obtainable.

TABLE SHOWING COST OF EACH KIND OF FLOORING FOR VARIOUS SIZE ROOMS.

An easy way to order flooring. No figuring to do. No danger of mistakes. In the first column below we show nine standard sizes of rooms and opposite each size the total cost for enough flooring to cover it with Maple, Plain Sawed Red Oak and Quarter Sawed Red Oak, according to the grade and width of face desired. For example, suppose you have a room 12x12 feet for which you want to order 3/8x1½ or 2-inch Clear Maple Flooring, you will find the price $7.68 on the sixth line, second column in the table below.

SIZE OF ROOM	No. 56M7440 3/8x1½ or 2-in. Face. Clear Maple	No. 56M7441 3/8x1½ or 2-in. Face. Select Maple	No. 56M7442 13/16x2¼-in. Face. Clear Maple	No. 56M7443 13/16x2¼-in. Face. WEIGHTS OF FINISHING LUMBER.

Weight, pounds, per 100 lineal feet, for each inch of width.

Thickness	Oak	Birch	White Pine	Yellow Pine	Cypress
1 inch	25	25	17	20	20
1¼ inches	31	31	21	25	25
1½ inches	38	38	26	30	30
2 inches	50	50	34	40	40

For instance, the weight of 100 lineal feet of 1x8-inch Clear Oak Finishing Lumber is shown in the second column, first line, as 25 pounds for each inch. The size you want is 8 inches, so it will weigh eight times 25 pounds, or 200 pounds. All sizes figured proportionately. Multiply the width by the number of pounds given in the above table.

For the handy man this page offers many opportunities. Here you have your choice lear kiln dried oak, birch, white pine, cypress or yellow pine. If you need a few es of hard or soft wood for any special purpose, you will find them here in practi- **all widths and thicknesses.** This high class material is carried only by large manu- urers. We offer it to our trade at manufacturers' prices. Every piece is well oned. A small outlay will supply you with enough high grade finishing lumber nake the articles you have in mind.

Handy men, or craftsmen, are furnishing their own homes by making bookcases, cabinets, desks, chests and seats. Cabinet makers and carpenters find a ready demand for everything in this line which they have time to produce. A home made cabinet or dresser is always prized more highly than the ordinary kind. To carpenters who may not be continually employed on house work our prices for high grade finishing lumber will be particularly attractive. Furnished in random lengths only. Cypress, yellow and white pine will come in lengths from 10 to 20 feet; oak and birch from 8 to 12 feet.

Finishing lumber will be a trifle scant in thickness on account of being planed smooth on both sides. 1-inch boards will be 13/16 inch thick, 1¼-inch will be 1 1/16 inches, 1½-inch will be 1 5/16 inches, 2-inch will be 1¾ inches.

PRICES OF CLEAR OAK, BIRCH, WHITE PINE, CYPRESS AND YELLOW PINE DRESSED BOARDS. ALSO KNOWN AS FINISHING LUMBER.

OAK.

r Plain Sawed Oak. Excellent material for r finishing or for the construction of articles niture. There will be no defects except an nal drying check, which is unavoidable.

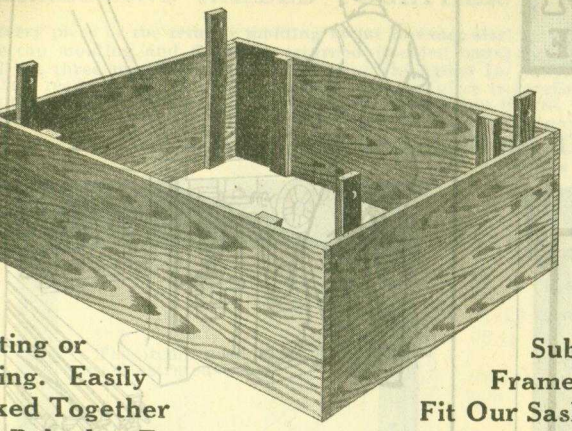
Sub-Frames for Hotbeds



ting or
ing. Easily
ked Together
Bolted to Frame.

Sub-Frames Fit Our Sash Frames Exactly.

Make the "Add-To" Sub-Frames Also

6 Feet Wide by 6 Feet Long.

ur SUB-FRAMES are made to fit our hotbed frames exactly; ou need do is to set the hotbed frame on top of SUB-FRAME bolt the two together. No nails required that will destroy rames in case you wish to move the hotbeds to a different ity. Bolts are included in price of SUB-FRAMES.

emember, our STARTING SUB-FRAMES and our "ADD-TO" FRAMES are at least 20 per cent cheaper than you can buy elsewhere.

UR CYPRESS BOARDS for Sub-Frames are 1 inch thick and ut to length, saving our customers the labor of sawing them ithout waste.

ipping weight of starting frames, approximately 100 pounds; -To" frames, 75 pounds.

e recommend the use of cypress boards for Sub-Frames se cypress is the best known wood for this purpose.

ADD-TO" SUB-FRAMES consist of two complete ends and omplete side of a sub-frame, so that one side of the starting rame will be used as one side of the "Add-To" sub-frame.

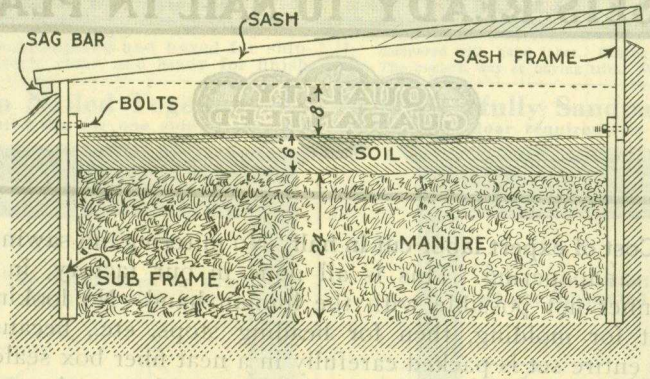
o. 63M7227
ce of "Add-To" Sub-Frames,
EACH
$2.80
uding Bolts.
ght, 90 pounds.

On an order for two Starting Sub-Frames and twenty-two "Add-To" Sub-Frames we saved one customer $24.00.

No. 63M7228
Price of Starting Sub-Frames,
EACH
$3.95
Including Bolts.
Weight, 100 pounds.

n't overlook the fact that our Hotbed Sash Frames are made press—not pine, red wood, fir or other lower priced woods ally used for this purpose. Cypress wears twice as long as woods. Insist on getting Cypress Hotbed Sash. Even h you pay more for cypress it is cheaper in the end.

The Correct Way to Make a Hotbed



Section Through a Hotbed.

Hotbeds should be protected from the north winds as much as possible, and located where the subsoil permits of good drainage.

The size of hotbeds seems to have become standardized, namely, 6 feet wide by 6 feet long, with a pit 2 feet deep below the surface of the ground. For this reason we quote all the material necessary for hotbed construction for this size.

If when digging the pit the nature of the soil is of a kind that falls away, the pit must be lined with boards, and for this purpose we recommend our cypress sub-frames.

After you have dug and lined the pit, proceed to fill it with rich horse manure in 6-inch layers, allowing each layer to become thoroughly heated. Two days should elapse between the spreading of each layer, and each layer should be thoroughly tamped.

When the manure has been brought to a point 6 inches below the top of the ground, put on the sash for three or four days before adding the soil.

The soil, of course, must be the richest you can find in your locality, and a layer 8 inches thick (loose) spread on top of the manure. It should then be covered and left to stand for about one week to permit it to get warm and the weed seed to germinate.

After one week has elapsed, rake the soil over evenly, and press it firmly with the aid of a wide board; your hotbed is then ready for the seed. Top of soil should be about 8 inches below the glass. The hotbed should be made about two weeks before the time to sow seed.

We wish to particularly call your attention to the fact that vegetables and flowers must have fresh air every day, and for this purpose the sash should be raised every morning for ventilation; but do not allow the cold air to strike directly on the plants.

Close the sash at night in order to retain the heat.

The matter of ventilation is important, and must be attended to once every twenty-four hours.

The cultivation of vegetables in hotbeds is interesting, instructive and profitable. It can be carried on successfully and at small cost when the necessary materials used in the construction of a hotbed are purchased from us. Hotbed cultivation is being extensively practiced and is by no means confined to extensive growers. Every family should have two or three hotbeds for the production of vegetables in off seasons. Several dollars can be saved on table dainties by means of a hotbed and, besides, you have the satisfaction of knowing that you have grown and cultivated everything so produced. You can find a ready market at big prices for everything not needed by your own family, while the pleasure you will derive from the cultivation of the vegetables will in itself be worth more than the initial cost.

All Hotbed Material Made of Cypress, the Best Wood for the Purpose.

HOTBED FRAMES.

With one of these starting frames it is only necessary to have a three-quarter frame for each additional bed. There is economy in buying our "Add-To" frames.

Specifications.

Made of 1⅛-inch cypress.

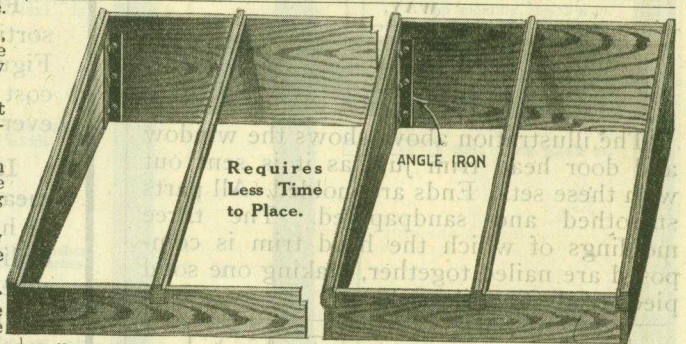
Height of frame at front, 8 inches; at back, 16 inches.

Corners bolted with angle iron running from bottom of frame to sash bar.

Bolts on one side are long enough to run through and catch angle iron on "Add-To" frame.

All parts cut to exact size and easy to put together.

"Add-To" frame consists of two complete ends and one complete side with rabbeted sash bars for each side and center so that one side of the starting frame can be used as one side of the "Add-To" frame. The "Add-To" frame can be placed on the right or left of starting frame, as you choose.



"Add-To" Frame — Starting Frame

Hotbed Frames

Made of Cypress, Known as "The Wood Eternal." Cypress Defies Decay.

No. 63M7281
"Add-To" Frame, size 6 feet by 6 feet for two sash, each measuring 3 feet by 6 feet.
Price,
$3.75
Including Bolts.
Weight, 75 pounds.

Each Frame and "Add-To" Frame, 6 feet wide and 6 feet long. Big enough for two sash, with sash bars as shown in illustration.

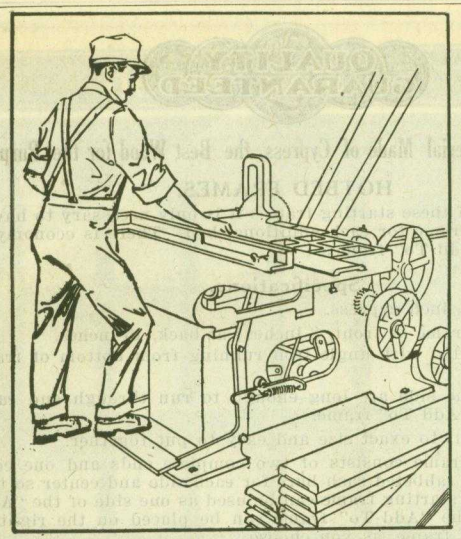
No. 63M7282
Starting Frame, size 6 feet by 6 feet for two sash, each measuring 3 feet by 6 feet.
Price,
$5.25
Including Bolts.
Weight, 85 pounds.

Sagging of the sash loosens the putty and permits dust to settle between the glass laps. Consequently leaks occur and there is about 14 per cent more shadow on account of the laps becoming full of dirt.

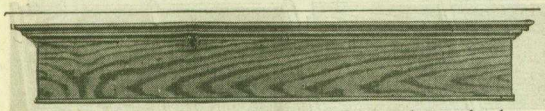
Our Sash Are of Strong Rigid Construction and Will Not Sag.

Before we set the glass for Hotbed Sash the sash are primed with a special linseed oil compound.

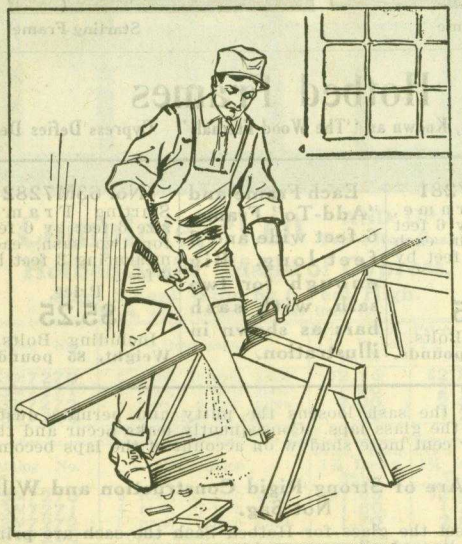
WINDOW AND DOOR TRIM
IN SETS READY TO NAIL IN PLACE



CUTTING CASING BY MACHINE—THE MODERN WAY.



The illustration above shows the window and door head trim just as it is sent out with these sets. Ends are molded. All parts smoothed and sandpapered. The three moldings of which the head trim is composed are nailed together, making one solid piece ready to nail in place.



WHY CUT CASING THIS WAY?

QUALITY GUARANTEED

Cost of expert labor cut in half. No mitering, no sawing, no sandpapering. This is all done in our factory, in a manner not possible with the human hand. No looking first for molding, then for heading stops, etc., because the entire set is packed carefully in a neat fiber box sealed against dust, dirt or discoloration due to the weather.

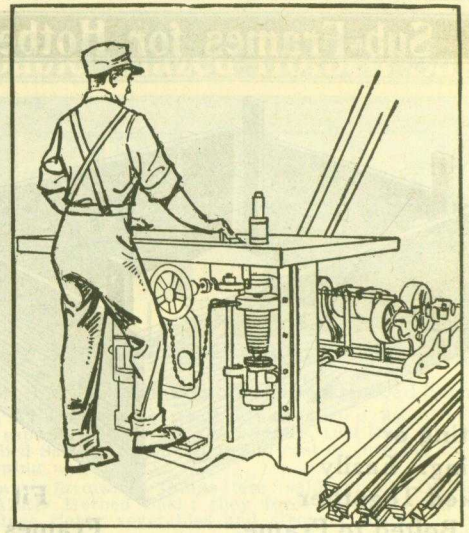
Figure it out yourself. Compare your cost of specially sorting out first the side casing, then head stops, etc. Figure the cost of mitering the head casing and cap, the cost of sawing each and every piece and then sandpapering every piece by hand.

It will pay you to buy your trim ready cut to exact measure, all ready to nail into place, because any carpenter or handy man can put it in place in a few moments. With ordinary window and door trim (including "sides of trim" where pieces are merely cut to convenient length) this work has to be done by the most expert and highest priced mechanic on the job.

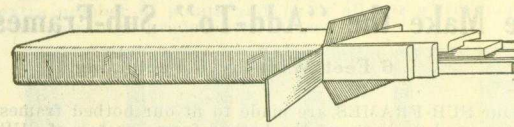
QUALITY GUARANTEED

Illustration above shows cap molding with end molded on the solid wood. Being machine made, the cut is clear and true. Be up to date. Save money, time and labor, buy your trim already made, ready to nail in place.

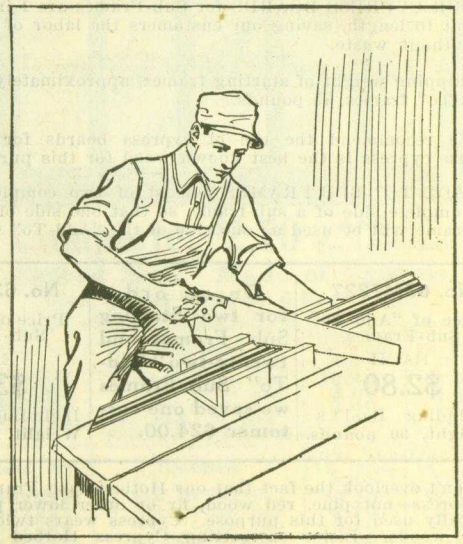
The illustration above shows the usual method of mitering the end of cap molding. This does not make a good job as it leaves a joint at the corner which is liable to open, revealing an unsightly crack.



RETURNING ENDS OF CAP BY MACHINE—T MODERN WAY.



This shows how we pack our trim sets for shipm Each fiber board carton contains one set with the marked on the outside. It is sealed so as to be d proof and lightproof. Moldings will be clean bright when received. When packed in this manner possibility of shrinking is greatly reduced and moldings are protected against moisture.



COSTS TIME AND MONEY TO DO IT THIS WA

EACH PIECE CUT TO EXACT LENGTH. HEAD MOLDINGS RETURNED AND NAILED TOGETHER.

Every piece of the trim or molding is cut to exact size. e cap molding and fillet are returned (molded ends) l the three members of the head trim are nailed together, ready to put in place. Each member or piece is carefully sandpapered and boxed for shipnt (one set in a box), so that when it reaches you it will be fresh, clean and ready for finish.

WINDOW AND DOOR TRIM IN SETS READY TO NAIL IN PLACE

EACH PIECE CAREFULLY SANDPAPERED. EACH PART READY TO NAIL IN PLACE AND VARNISH.

There is no waste in the cutting, as it is cut to exact length. The sandpapering, returning, etc., are done at the mill where a great saving is effected by the use of modern machinery and skilled workmen, as compared with hand labor. Buying your trim in this manner means, first, a saving in material; second, a saving in labor. The modern way of buying trim. Window and Door Trim will weigh about 1 pound for each lineal foot of material.

Cap Molding Returned—Head Trim Nailed Together—All Parts Carefully Sandpapered—Carefully Boxed for Shipment.

Prices quoted are for one side of trim only. Each inside door requires two sides of trim.

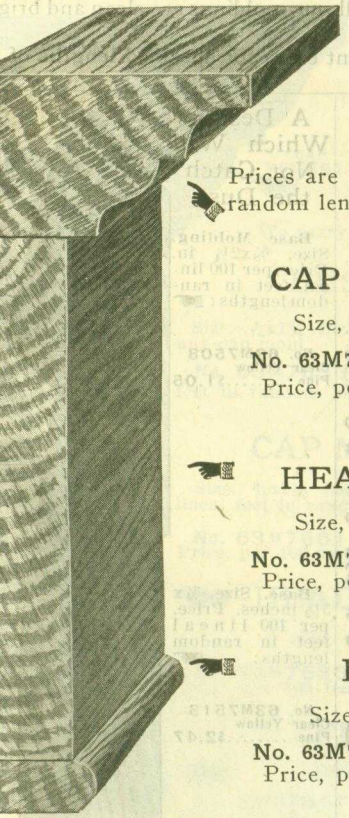
High Grade Oak and Yellow Pine Interior Moldings

We illustrate on this page two very neat designs in Door and Window Cap Trim. At the left is shown our Three-Member Cap Trim, consisting of cap molding, head casing and fillet. On the right hand side is a Four-Member Cap Trim, in which we use embossed molding and dust cap. **Yellow pine molding comes in random lengths from 6 to 16 feet, oak from 8 to 12 feet, the majority of pieces being over 10 feet long. We charge 10 per cent extra for specified lengths.** Write for special quotations on oak moldings over 12 feet long.



The illustration at the left shows a neat and tasty design for cap trim and the manner in which it is put up. Prices are for 100 lineal feet in random lengths.

CAP MOLDING.

Size, 1⅜x2½ inches.

No. 63M7622 Clear Oak.
Price, per 100 feet.....**$4.68**

HEAD CASING.

Size, ¾x4⅝ inches.

No. 63M7637 Clear Oak.
Price, per 100 feet.....**$4.68**

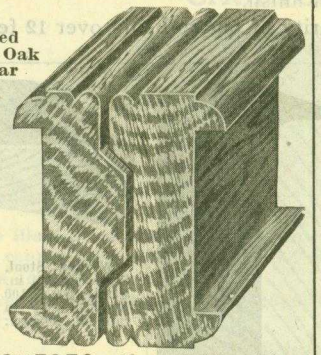
FILLET.

Size, 7-16x1 inch.

No. 63M7648 Clear Oak.
Price, per 100 feet.....**83c**

SLIDING DOOR ASTRAGALS.

Furnished in Clear Oak and Clear Yellow Pine.



No. 63M7970 Clear Yellow Pine. For 1⅜-inch door, 8 feet high or less. Price, per pair.....**50c**

No. 63M7972 Clear Yellow Pine. For 1¾-inch door, 8 feet high or less. Price, per pair.....**50c**

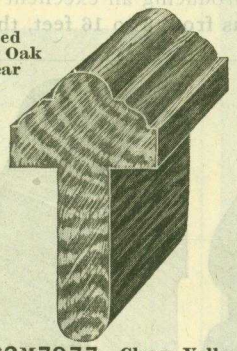
No. 63M7971 Clear Oak. For 1⅜-inch door, 8 ft. high or less. Per pair.**90c**

No. 63M7973 Clear Oak. For 1¾-inch door, 8 ft. high or less. Per pair.**90c**

We illustrate above our Two-Member Oak Astragal used for inside sliding doors. Astragals of this kind add much to the general appearance of a room and are necessary to make a tight joint when the doors are closed. We carry these astragals in stock for both 1⅜-inch and 1¾-inch doors. **When ordering be sure to state thickness and height of doors.**

FOLDING DOOR ASTRAGALS.

Furnished in Clear Oak and Clear Yellow Pine.



No. 63M7977 Clear Yellow Pine. For 1⅜-inch door, 8 feet high or less. Price, each.....**40c**

No. 63M7979 Clear Yellow Pine. For 1¾-inch door, 8 feet high or less. Price, each.....**40c**

No. 63M7978 Clear Oak. For 1⅜-inch door, 8 feet high or less. Price, each.....**50c**

No. 63M7982 Clear Oak. For 1¾-inch door, 8 feet high or less. Price, each.....**50c**

This single "T" Astragal is used for double folding doors. It is nailed to the edge of one of the doors and forms a rabbet or shoulder against which the other door can swing. **When ordering this astragal be sure to specify thickness and height of doors for which it is intended.**

DOOR AND WINDOW STOP.

Door and Window Stop is carried in sizes as listed below. Prices are for 100 lineal feet in random lengths.

Size, Inches	No. 63M7778 Clear Oak. Per 100 Lineal Feet	Size, Inches	No. 63M7778 Clear Oak. Per 100 Lineal Feet

REPEAT ORDERS PROVE THAT WE SATISFY OUR CUSTOMERS AND SAVE THEM MONEY.

Aberdeen, Md.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I have used your material in two of the houses I have built, my own built in 1907 being the first. The doors, trim and stair material were the best I have ever used; the doors have not warped nor shown any defects anywhere in the house, but I had to get two more doors here at home as I did not order enough and they cost me 85 cents apiece more, and they warp a different way every time a wet spell comes.

Yours truly, WALTER WAREAM.

FROM A CONTRACTOR.

Fifield, Wis.

Sears, Roebuck and Co.,
Chicago, Ill.

Dear Sirs:—It is a great pleasure to say a few words about your mill work. I handled mill work as contractor and especially as paint contractor over twenty-five years and must say that your mill work is far above any mill work I ever handled. The nice smooth finish from the doors to the quarter round is unexcelled. The painted doors are also exactly as represented. I have used in my houses painted doors received from you four years ago, but there is today not the slightest warp or shrinkage of any kind. Nobody will believe that these are the cheapest grade of doors and I have saved from 25 to 40 per cent compared with the average factory prices

Yours very truly,
HERMAN BECKER.

SAVED $300.00 ON AN ORDER OF $850.00.

Massena, Iowa.

Sears, Roebuck and Co.,
Chicago, Ill.

Gentlemen:—I received the carload of mill work lumber within a few days from the time I ordered it. I was surprised to find it in such fine shape, so well packed and crated, and nice bright new clean material. My carpenter said it was the best lot of finished lumber he ever looked at. On this order of $850.00 I have saved $300.00.

Yours very truly,
JOHN P. WATERS.

A PLEASED CUSTOMER.

Long Pine, Neb.

Sears, Roebuck and Co.,
Chicago, Ill.

Dear Sirs:—I was more than pleased with all mill work purchased of Sears, Roebuck and Co. I was building a residence for myself and as it is now completed will not require any more mill work for the present, but rest assured if I need any mill work at any future time you shall certainly receive my order.

Yours truly,
THOMAS C. WRIGHT.

Head, Base and Corner Blocks

CORNER BLOCKS.

Corner Blocks are carried in stock in woods and sizes listed below. The pattern permits any size to be trimmed down to smaller sizes if desired. **Be sure to state size wanted when ordering. Weight, 55 pounds per hundred blocks.**

Best Moldings for Outside Use

Cypress is known everywhere as "the wood eternal" and there are cases on record where this wood has withstood the effects of the elements for 100 years. From this you will see why we selected cypress as being the most suitable material for our highest grade of outside molding. We permit nothing but absolutely clear lumber to be used in the manufacture of these moldings.

Soft wood moldings are made of gumwood, poplar, hemlock, etc., perfectly machined and are suitable for paint finish, perhaps plenty good enough for low priced building. We recommend our cypress moldings in preference to soft wood for exterior use. Furnished in random lengths from 8 to 16 feet, most pieces being over 10 feet. **We charge 10 per cent extra for specified lengths.** Cypress and soft wood moldings weigh about 12 pounds per 100 lineal feet for each inch of width.

CROWN MOLDING.

No. 63M8070 **Columns for interior work shown on page 83.** **No. 63M8073** **No. 63M8076** **Columns for interior work shown on page 83.** **No. 63M8079**

We illustrate above four designs of our Colonial Lock Joint Built-Up Columns. These columns are constructed to withstand the worst weather conditions. They are made from selected fir lumber, pra tically clear and smooth, thoroughly kiln dried, and if painted immediately upon receiving them they are guaranteed not to check or warp.

A comparatively small amount of money invested in a porch will add greatly to the selling or rental value of your home, to say nothing of the added beauty and comfort. You can pick from th catalog the same quality of material that is used on the handsomest porch in your vicinity and you will be surprised at the small cost. The columns with the plain shafts may be cut down to fractional parts of a foot. The columns that we list herewith are strictly high grade and when you receive them they are oiled, not painted. Note the fine workmanship and lumber used throughout their manufacture.

QUALITY GUARANTEED

IMPORTANT WHETHER YOU BUY THE BUILT-UP COLUMNS OR SOLI COLUMNS, WE WOULD SUGGEST THAT YOU GIVE THEM A GOOD COAT OF PRIMING AS SOON AS RECEIVED TO KEEP OUT MOISTURE

Colonial Porch Columns and Porch Newels

SQUARE PORCH COLUMNS.

Made of clear fir. Corners are made of heavy 2-inch stock and panels are securely locked by our patent lock joint. Columns diminish in width from bottom to top, giving the proper architectural effect. Prices include cap and base. **In ordering give size and length wanted.** For dividing or splitting add 10 cents.

No. 63M8074

SOLID COLONIAL PORCH COLUMNS.

No better solid bored column on the market at our price. Hand turned from high grade timber, with the heart bored out, which prevents splitting.

Straight grained timber which has been tested for strength is the only kind used in these columns.

Carefully painted with a good grade of silver gray paint. These columns are architecturally correct. Prices include caps and bases, which we pack separately. All columns are carefully crated to prevent damage in shipping. **In ordering state diameter and height wanted.**

SOLID NEWELS.

About Sizes.

The turned column to the right and newels illustrated herewith are made of clear fir, the very best wood known from which to manufacture solid porch columns and newels. Sizes shown are for columns before planing. After planing and finishing columns and newels will measure about ½ inch less than sizes given. This refers to solid turned columns and newels only. The height given is exact.

Starting Newels.

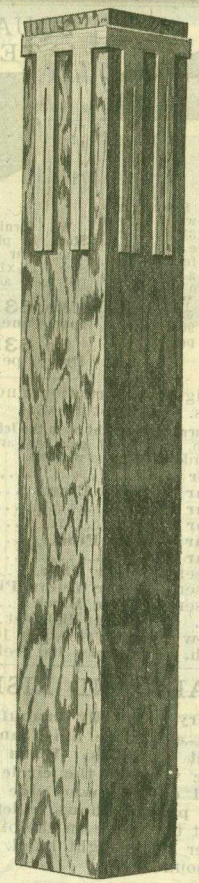
No. 63M8312 Clear Oak $3.15

No. 63M8313 Clear Yellow Pine...$2.85

This Newel has shaft 6 inches square, paneled on four sides below and on three sides above. The base is 8 inches square, 18 inches high. Trimmed with acorn top. Height of post, including acorn, 4 feet 6 inches.



Starting Newels.

No. 63M8310 Clear Oak $2.15

No. 63M8311 Clear Yellow Pine...$1.85

This Newel has plain shaft 6 inches square, 4 feet long. The ornamentation at the head of the newel is obtained by a thin veneer glued or planted on the newel. When staining the newel for effect shown in the illustration, the ornamentation should be left in the white and varnished.

Starting Newels.

No. 63M8316 Clear Oak $4.80

No. 63M8317 Clear Yellow Pine...$4.50

The shaft is 6 inches square, paneled on four sides below and three sides above. Base is 8 inches square, 18 inches high. Panels are molded with turned bead moldings. All other moldings are egg and dart design. The cap is hand carved.

Angle Newels.

No. 63M8324 Clear Oak $2.10

No. 63M8325 Clear Yellow Pine.....$2.00

This neat Angle Newel may be used with any of our starting newels or may be sawed off 4 feet long and used as a cheap starting newel. The shaft is 5 in. square. Length, 5 ft. 6 in. (not measuring the ornaments at top and bottom).

All our stair newels are made from thoroughly kiln dried selected stock, 1 inch thick, carefully built, smoothly finished and guaranteed. The 18-inch base on the starting newels may be used for either open or closed string board and will receive either one or two risers. They are carefully packed in dustproof, lightproof fiber board cartons for shipment and are guaranteed to reach you bright and clean. We carry a large stock on hand at all times and can ship promptly. **Send us a trial order.** Starting Newels weigh about 35 pounds and Angle Newels 38 pounds, each.

WE CAN SAVE YOU $50.00 TO $100.00 ON A FLIGHT OF STAIRS.
(See pages 80 and 82.)

High Grade Stair Material

Made of Absolutely Clear Stock and Carefully Smoothed and Sanded

TREADS AND RISERS.

TONGUED AND GROOVED.

Stair Treads weigh about 3½ pounds each lineal foot. Risers, about 1½ pounds. Winders weigh about 90 pounds per set.

Tongued and grooved treads and risers make a rigid construction and do not permit the treads to pull away from the risers or show open joints. Will not creak.

In ordering winders be sure to state whether you want them to turn to the right or to the left as you go upstairs. For instance, winders used on stairway No. 63M40 on page 80 are left hand winders. If you want them to turn in the opposite direction, order right hand winders.

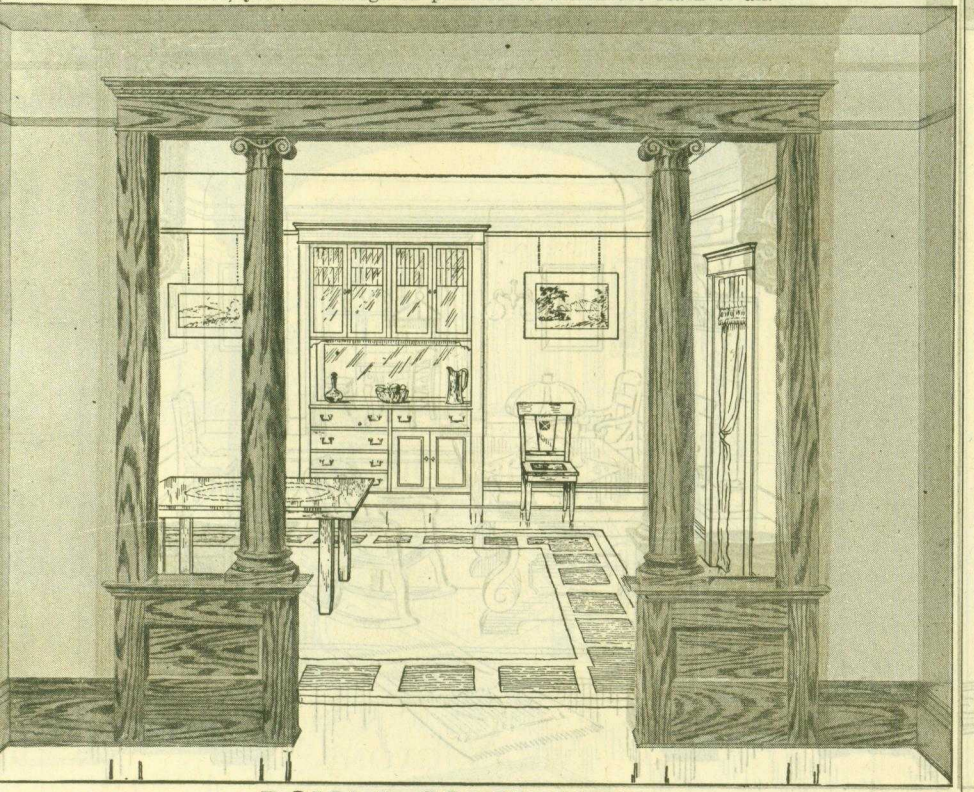
Colonnade and Colonial Interior Columns

Orders for Colonnades or Grilles to be filled and varnished should be accompanied by a small sample of wood showing the color of finish that is wanted.

WILL ADD MATERIALLY TO THE SELLING OR RENTAL VALUE OF ANY HOUSE.

The Roman Colonnade listed below is a neat and massive design suitable for any interior. p to date and attractive, yet low enough in price to be within the reach of all.



ROMAN COLONNADE.

Made with a solid carved wood cap (see illustration above) or with plain turned cap. Height pedestals and panel work, 24 inches. Top over pedestal and panel work, 10 inches wide and ade to fit on each side of jambs 5½ inches wide. The column base resting on the pedestal is 7½ ches in diameter. Size of column at base, 6 inches in diameter. Size of column at top, 5 inches in ameter. Use but one column and pedestal for openings less than 7 feet wide, and allow but half e price of a pair.

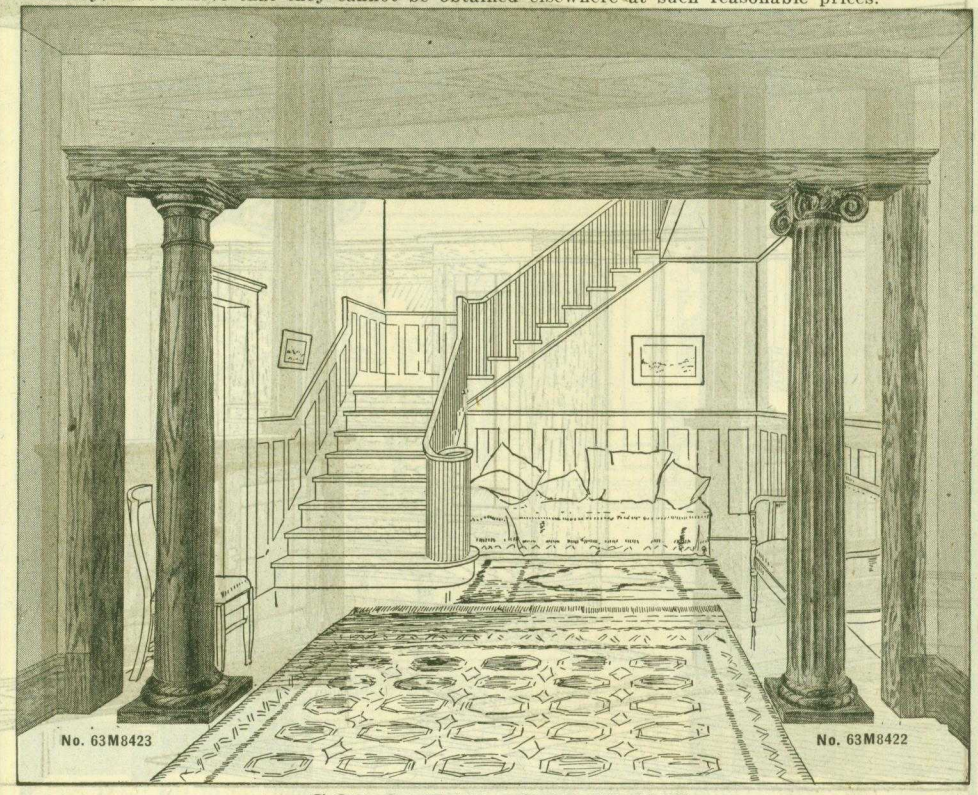
When ordering give exact width of opening from jamb to jamb and exact height from floor to ad jamb, being sure to always specify the width first, stating kind of wood wanted and whether is to be in the white or filled and varnished, also give width of jambs not including the casings. Furnished in plain sawed clear oak or clear yellow pine at following prices. **State kind of wood anted.**

No. 63M8461	**Clear Yellow Pine,** with plain turned cap. Price, per pair	**$12.00**
No. 63M8462	**Clear Oak,** with plain turned cap. Price, per pair	**12.50**
No. 63M8463	**Clear Yellow Pine,** with carved wood cap. Price, per pair	**12.95**
No. 63M8464	**Clear Oak,** with carved wood cap. Price, per pair	**14.25**

The above prices are for the colonnade in the white. Any height up to 8 feet 6 inches. For each ditional foot or fraction thereof in height add 75 cents extra. If jambs are wanted wider than 5½ ches, add $1.00 to above prices. When jambs are 9 inches wide we suggest letting the end of destal up against jambs like the Colonial Colonnade.

If wanted filled, shellacked and varnished, price $4.25 extra. Shipping weight, about 200 pounds.

Colonial Interior Columns are being specified for fine homes by the leading architects of the country. We believe that they cannot be obtained elsewhere at such reasonable prices.



No. 63M8423 No. 63M8422

COLONIAL COLUMNS.

If you are thinking of introducing a touch of the Colonial style in your new home be sure to order a pair of these columns. To the left of the above illustration is shown a column with plain shaft and plain wood cap. To the right is shown a column with fluted shaft and composition cap. All columns are made 10 inches in diameter and in any height up to 8 feet.

PRICES OF YELLOW PINE COLUMNS.

No. 63M8423	**Plain Shaft,** plain wood cap. Price, each	**$ 8.00**
No. 63M8434	**Plain Shaft,** composition cap. Price, each	**10.00**
No. 63M8422	**Fluted Shaft,** plain wood cap. Price, each	**9.75**
No. 63M8435	**Fluted Shaft,** composition cap. Price, each	**12.00**

PRICES OF OAK COLUMNS.

No. 63M8424	**Plain Shaft,** plain wood cap. Price, each	**$ 9.00**
No. 63M8427	**Plain Shaft,** composition cap. Price, each	**11.00**
No. 63M8432	**Fluted Shaft,** plain wood cap. Price, each	**10.75**
No. 63M8433	**Fluted Shaft,** composition cap. Price, each	**13.00**

BE SURE TO GIVE EXACT HEIGHT OF COLUMNS.

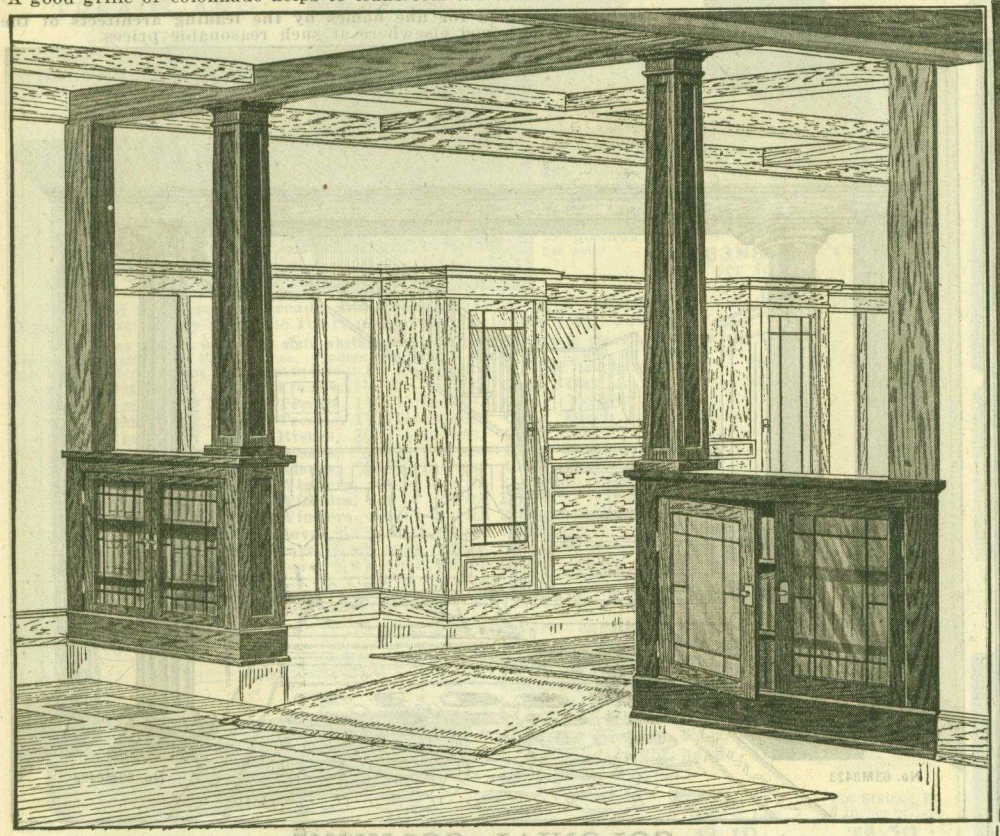
If wanted filled, shellacked and varnished, add $2.00 extra for each column and send sample showing color. If wanted higher than 8 feet, add $1.00 for each additional foot or fraction thereof. Shipping weight, each, about 65 pounds.

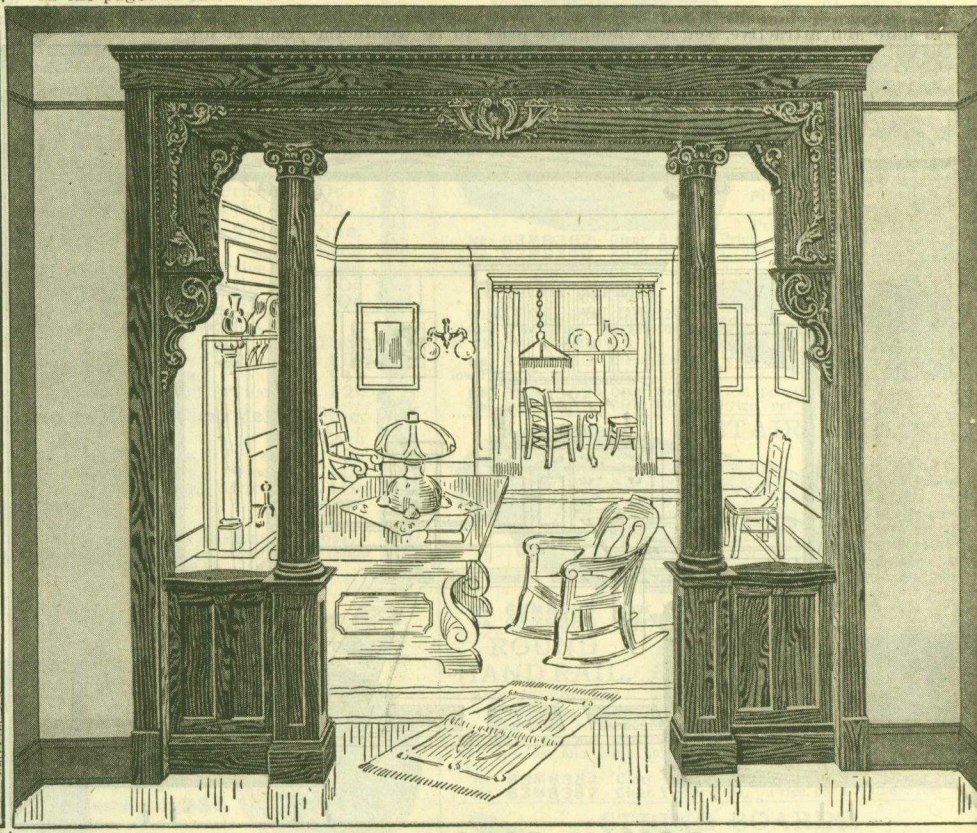
All Colonnades and Columns are made special to your order. To insure the best kind of a job, it is necessary to allow from five to ten days to make shipment. **Shipped direct from the grille factory in CHICAGO** and cannot be shipped with other mill work and building material. **The casings and inside jambs, base blocks or trim are not a part of the colonnade** and therefore, if wanted, must be ordered extra. For prices of casing see molding pages in this book.

Grilles and Colonnades at About One-Half Regular Retail Prices

The grilles and colonnades illustrated on this and other pages of this book are acknowledged by authorities on architecture to be correct in style and design. Choose a good grille or colonnade. A few extra dollars spent for a furnishing of this kind adds greatly to the value of your building. A good grille or colonnade helps to transform the interior of an old house into that of a new one.

By using the proper kind of grille two rooms can be joined and the beauty of either room is no lost or screened by doors or curtains. The very best, most modern buildings of today are considered incomplete unless furnished with stylish and up to date colonnades and grilles, such as we illustrat on the pages of this book.





BOOKCASE COLONNADE.

Perfectly proportioned and made by skilled workmen. It will add a tone of refinement and luxury to your home. This bookcase colonnade can be used for any width of room. The cases are made 3 feet 2 inches wide. The ends of the cases are made to set over a jamb 5½ inches wide. The backs of the cases have two wood panels same height as the cases in front. We will furnish the colonnades in any height required. All the bookcases are 3 feet 6 inches high from the floor to the top shelf on which the colonnades rest. Each bookcase is 12 inches deep and has two shelves.

The corner pilasters of the columns are made of solid wood, there being no glued joints whatever. Columns are 10 inches square at the bottom and taper to 8 inches square at the top. Paneled on four sides and have molded caps and bases.

No. 63M8465 Bookcase Colonnade. Cases 3 feet 2 inches wide, for opening any height up to 8 feet. Furnished in plain oak, birch or yellow pine (not oiled or varnished). **Shipped from either our factory in CHICAGO or WESTERN OHIO.**
Price..... **$32.50**

For each additional foot or fraction thereof in height required for columns add 75 cents extra.

Weight, 300 pounds.

If filled, shellacked and varnished, add $4.00 extra.

QUALITY GUARANTEED

LORRAINE COLONNADE.

The Lorraine Colonnade illustrated above is one of the greatest sellers in our line, having found favor everywhere. Contractors and builders after sending us a trial order invariably send us repeat orders, as it is considered one of the best high grade grilles made, and our price is from one-third to one-half less than the same colonnade would cost if bought from regular makers or dealers. Made from selected lumber, very massive and effective, yet arranged in such a way as not to be an obstruction.

Pedestal below column is 7 inches square opposite panel work.

Fluted Column, 6-inch shaft, tapering to 5 inches at top neck. Column fluted two-thirds length.

Panel Wainscoting measures 30 inches from floor line to top of shelf; distance from jamb to inside of column, 17 inches.

Carvings or Trimmings and Column Capitals are made of high grade composition work, which is a close imitation of wood. Side beams extend down 3 feet 8 inches at the bottom of the bracket and are 4 inches thick.

Not suitable for openings less than 7 feet wide.

No. 63M8405 Lorraine Colonnade. 9 feet wide by 9 feet high or less, furnished in oak, birch, yellow pine or cypress in the natural wood (not oiled or varnished). **Shipped from factory in CHICAGO.** Price... **$32.00**

If the beam only is wanted (no columns, pedestals or paneled wainscoting) price will be $14.75.

If filled, shellacked and varnished, add $5.00 extra. If ordered in quarter sawed oak, add $4.00 ext Weight, 250 pounds.

For grilles wider than 9 feet add $1.50 for each additional foot or fraction thereof.

For grilles higher than 9 feet add 75 cents for each additional foot or fraction thereof.

Will furnish this carved all wood cap in place of the composition cap, if wanted, without extra charge.

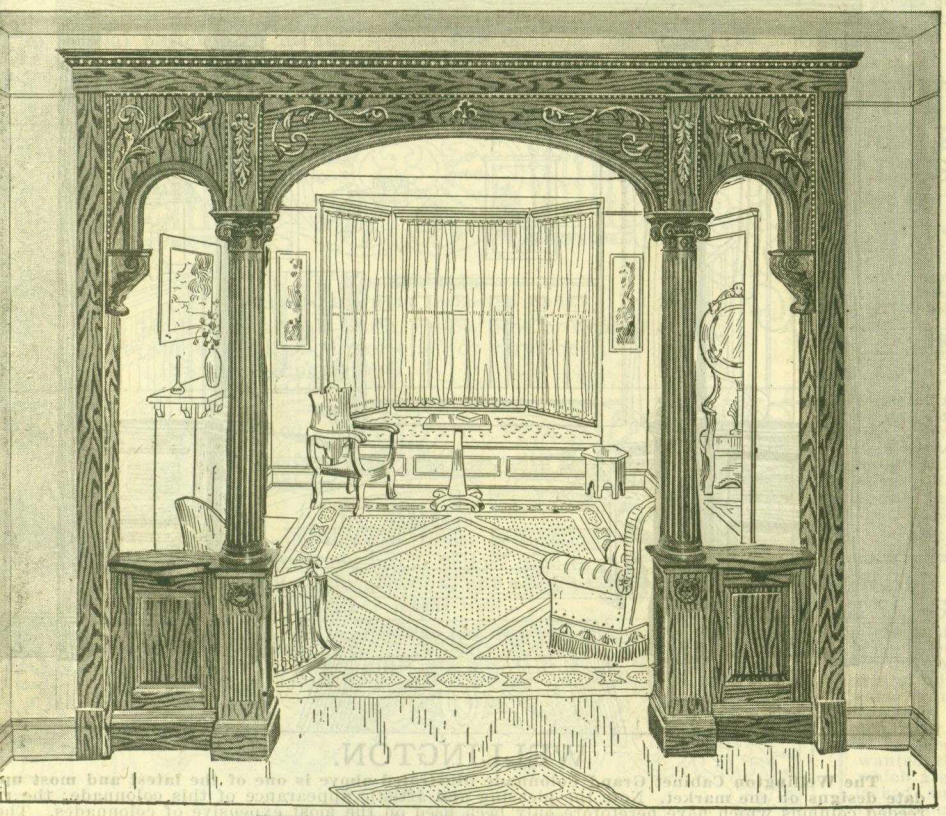
Be sure to write the word "Special" after the catalog number if ordering with carved wood cap.

NOTE—When ordering be sure to give width and height, the kind of wood wanted and whether the grille is to be finished or in the white.
Prices do not include jambs, casing, base blocks or head trim.

Cabinet Grand Colonnades and Grilles

WILL ADD 100 PER CENT TO THE APPEARANCE OF ANY HOUSE.

On this page we illustrate two up to date and attractive designs which will harmonize with the terior of the finest homes. Many people by installing one of our Cabinet Grand Colonnades or rilles convert the interior of an out of date house into a strictly up to date twentieth century terior. At our extremely low prices nearly anyone can afford to install the high grade and most attractive styles we illustrate on these pages. Our colonnades and grilles are made of fine selected material, machined and assembled by expert grille makers, and are most attractive inside work. All parts, in fact every inch of surface, are carefully sanded by hand and if ordered in the white without varnish can be given piano finish. Please remember that grilles of equal style and quality in many localities sell at double our prices.



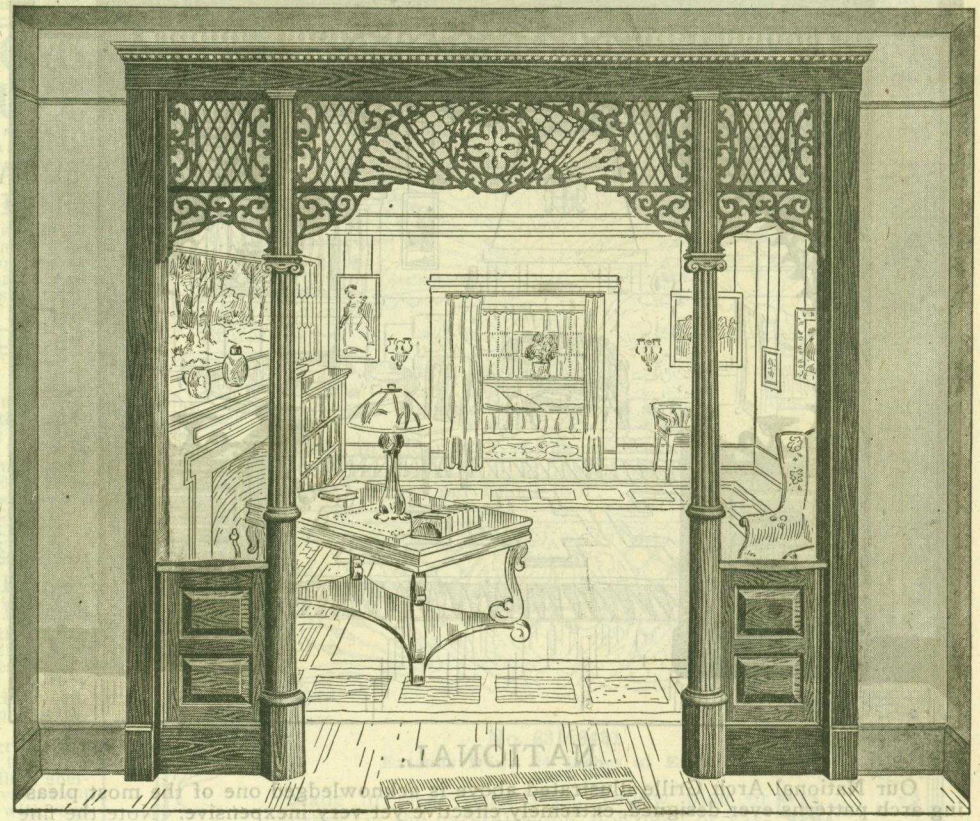
PERFECTION COLONNADE.

Perfectly proportioned and made by skilled workmen. It will add a tone of refinement and luxury to your home that afforded by no piece of furniture. **The illustration in no way does justice to this beautiful colonnade.** All carvings e in genuine wood, with the exception of the column caps, which, on account of their peculiar artistic shape, are made composition laid on wood form, and so closely imitate wood that an expert could hardly tell that they were not hand rved wood. **Center segment** and **two half circles** at the sides are made from bent lumber, which is aced in forms, steamed and held in place until thoroughly dry; it is the only correct way that segments d circles of this kind can be made, and being made in this manner show the beautiful grain of the od to the best advantage.

Pedestal Base is 7 inches square, measures 30 inches from the floor to the top of pedestal.
Columns, diameter at base 6 inches, tapering to 5 inches at the top.
Center Arch, thickness 4½ inches; depth in the center, 6 inches; drop at sides, 34 inches.
Genuine Wood Hand Carvings.
Not suitable for openings less than 7 feet wide.

No. 63M8160 Perfection Colonnade. For opening 9 feet wide by 9 feet high, or less, furnished in ear oak, birch, yellow pine or cypress (in the natural wood, not oiled or varnished). Price..... **$39.50**

Weight, 290 pounds. **Shipped from factory in CHICAGO.**
For grilles wider than 9 feet add $1.50 for each additional foot or fraction thereof.
For grilles higher than 9 feet add 75 cents for each additional foot or fraction thereof.
If filled, shellacked and varnished, $6.00 extra. If made of quarter sawed oak, add $5.00 extra. If ordered finished to atch interior woodwork, be sure to say whether light or dark finish is desired. We advise that you send us a small ip or piece of wood showing grain and color of finish desired, which will enable us to match your woodwork.



ELITE.

The Elite Cabinet Grand Colonnade and Grille illustrated above is one of the best medium priced colonnades and grilles on the market; in fact, the quality of material is the same and the workmanship is executed in the same careful manner as our higher priced grilles, the only difference being that it is not nearly so massive. Identically the same grille is sold in many localities at double our price.

Pedestal opposite shelf is 4½ inches in diameter and measures 30 inches from the floor to the top of shelf.

Columns are formed by an octagon base 6 inches in diameter, plain turned part 4½ inches, and the fluted shaft is 4 inches and is trimmed with genuine wood carved ornament. Wainscoting measures 16 inches from the inside of the post to the jamb.
Not suitable for openings less than 6 feet 6 inches wide.

No. 63M8456 Elite Cabinet Grand Colonnade and Grille, for opening 8 feet wide by 8 feet 6 inches high, or less, furnished in clear oak, birch, yellow pine or cypress (in the natural wood, not oiled or varnished). Price.... **$16.50**

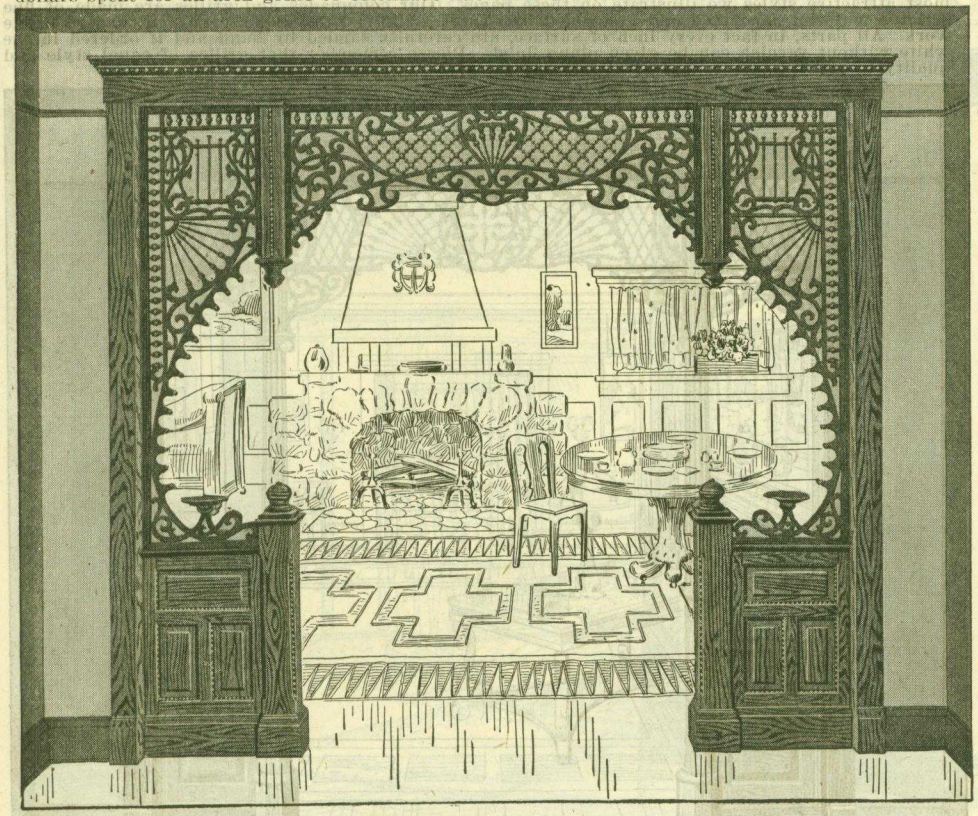
Weight, 150 pounds. **Shipped from factory in CHICAGO.**
If filled, shellacked and varnished, add $4.25 extra. For grilles larger than the above mentioned size, add for each additional foot or fraction thereof $1.50 extra, and for each additional foot in height add 75 cents extra.
If carved wood cap such as we show on the bottom of page 84 is wanted instead of composition cap shown on columns, we will furnish same without any additional charge.

ALL GRILLES, COLONNADES AND COLUMNS ARE MADE SPECIAL TO YOUR ORDER.

To insure the best kind of a job it is necessary to allow from five to ten days to make shipment. Items illustrated on this page are shipped direct from the grille factory and cannot be shipped with ther mill work and building material. Casings and inside jambs are not a part of the grille and, therefore, if wanted must be ordered extra. For prices of casings see molding pages in this book.
OTE—When ordering be sure to give width and height, the kind of wood wanted and whether the grille is to be finished or in the white. Prices do not include jambs, casing, base blocks or cap trim.

Arch Grille and Colonnade of High Quality

The National Grille and Wellington Colonnade are two of our best selling designs. A few dollars spent for an arch grille or colonnade like those illustrated below will increase the value of your building greatly. It transforms the interior of an old house into that of a new one, and no new house is really complete without one of our fine Cabinet Grand Grilles or Colonnades.



NATIONAL.

Our National Arch Grille illustrated above is acknowledged one of the most pleasing arch patterns ever designed, extremely effective yet very inexpensive. Note the fine scroll work, beautiful panels and posts, and you will then appreciate what a wonderful value we offer in our National Arch Grille. All cross grained sections and joints are reinforced by wooden dowels, making it very strong and durable.

Pedestal Columns are 5 inches square at the base and measure 34 inches from floor.

Posts, 5 inches square, handsomely ornamented beaded molding on each side and have hand turned tops. Grille work drops from 12 to 15 inches from the head jamb at the center.

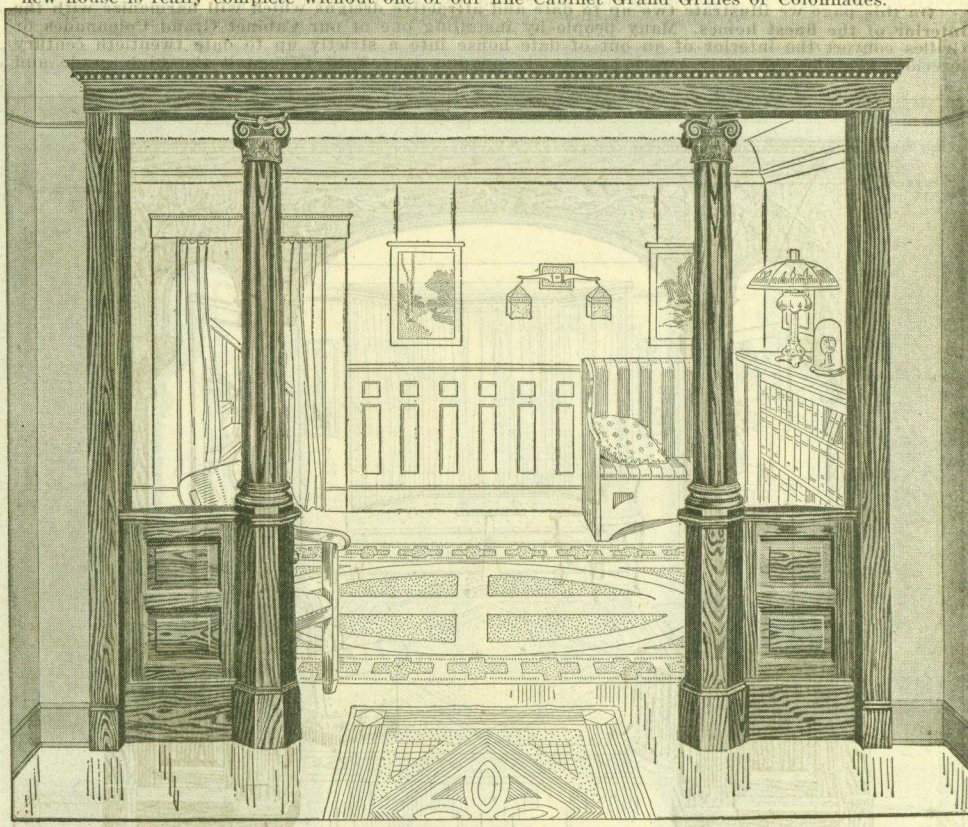
Wainscoting consists of panels which are raised on each side, making a heavy finished appearance.

Not suitable for openings less than 6 feet 6 inches wide, or 7 feet 6 inches high.

No. 63M8460 National Colonnade and Grille for opening 9 feet wide by 9 feet high, or less, furnished in clear oak, birch, yellow pine or cypress (in the natural wood, not oiled or varnished). Price. **$23.50**

Weight, 180 pounds. **Shipped from factory in CHICAGO.**

If filled, shellacked and varnished, add $3.00. If ordered in quarter sawed oak, allow $2.50 extra. For grilles wider than the above mentioned size, add for each additional foot or fraction thereof $1.50 extra. For each additional foot in height add 75 cents.



WELLINGTON.

The Wellington Cabinet Grand Colonnade illustrated above is one of the latest and most up to date designs on the market. Note the pleasing and artistic appearance of this colonnade; the rich reeded columns which have heretofore only been used on the most expensive of colonnades. These columns are made with lock joint by specially constructed machinery. They will give much better satisfaction, wear longer and there is no possibility of the joints opening. Every inch of this fine cabinet work is made by skilled workmen. Each and every part of the columns and pedestals is smoothed and sanded by hand, which assures you receiving a colonnade that will beautify your residence and delight your friends.

Octagon Base opposite panels, 7¾ inches in diameter. Base at floor, 9¼ inches in diameter.

Cap is 10 inches in diameter.

Column above pedestals is 6 inches at the base, tapering to 5 inches at the top.

Octagon Base on top of shelf on which the reeded column rests is 7¾ inches in diameter. Distance of panel work between column and casing, 16 inches. Top of shelf is 30 inches above the floor line. High quality composition capitals adorn the columns. Shipping wt., per pair, 200 lbs.

Not suitable for openings less than 7 feet wide.

No. 63M8400 Two columns, pedestals and panel wainscoting, for opening 8 feet 6 inches in height, or less, furnished in oak, birch, yellow pine or cypress (in the natural wood, not oiled or varnished). Price, per pair..... **$17.00**

If filled, shellacked and varnished, add $4.00 extra to the above price, which includes two columns, pedestals and wainscoting. For each additional foot in height add 75 cents extra.

In case only one column and wainscoting is wanted, mark the word "Special" after the catalog number, and allow but one-half the price of our regular No. 63M8400, or $8.50.

No. 63M8401 Columns, without wainscoting, for opening 8 feet 6 inches in height, or less, furnished in clear oak, birch, yellow pine or cypress (in the white). Price, per single column..... **$7.25**

Weight, single column, 75 pounds. **Shipped from factory in CHICAGO.**

QUALITY GUARANTEED

NOTE—When ordering be sure to specify width and height, the kind of wood wanted and whether it is to be finished or in the white. Jambs, casing, base blocks and head trim are not a part of the grille or colonnade and are not included in prices.

Artistic Grilles Will Beautify Your Home

NO FINER LINE MADE AT OUR PRICE. OUR PRICES ARE ABOUT ONE-HALF REGULAR PRICES. CANNOT URNISH GRILLES OVER 7 FEET WIDE AT THESE PRICES. IF GRILLES ARE WANTED OVER 7 FEET WIDE ADD 10c PER FOOT TO PRICES SHOWN.

Can be taken out and refitted in the same size opening at any time without injury to the grille. Our Patent Adjustable End Shoe is only furnished with
Grille No. 63M8428
Grille No. 63M8431
Grille No. 63M8430

WHEN ORDERING GRILLES

please note the prices quoted on this page are for grilles "in the white," just as they come from the woodworker's hands without filler or varnish. If finished grilles are wanted, that is, grilles which are filled, shellacked and varnished to harmonize with your interior woodwork, add 15 cents per lineal foot to the price in the white and write the word "finished" after the catalog number. In order to insure a perfect match to your woodwork, kindly state whether light or dark finish is wanted, and if possible enclose a sample showing the grain and color. We charge 35 cents per foot extra for finishing in white enamel.

All grilles shown on this page are shipped direct from the grille factory at CHICAGO and cannot be shipped with other mill work or building material.

All grilles illustrated in the column at the right hand side of this page are made with the patented adjustable end shoe (see Fig. 1 in middle column); simple, easy to fit, a most satisfactory feature. Carpenters, in fact anyone who is handy with a hammer, can fasten this end shoe into place in a few minutes. With the adjustable end shoe it is not necessary to do any sawing or trimming. All that is necessary is to put the grille into place, drive nails in each side of the shoe and the job is complete. The groove in the shoe takes care of all vibration of the frame, prevents cracking or breaking due to expansion or contraction. This excellent feature is only to be found in the grilles illustrated and described in the right hand column of this page, catalog Nos. 63M8428, 63M8431 and 63M8430.

No. 63M8428
Extends Down 24 Inches at Ends.

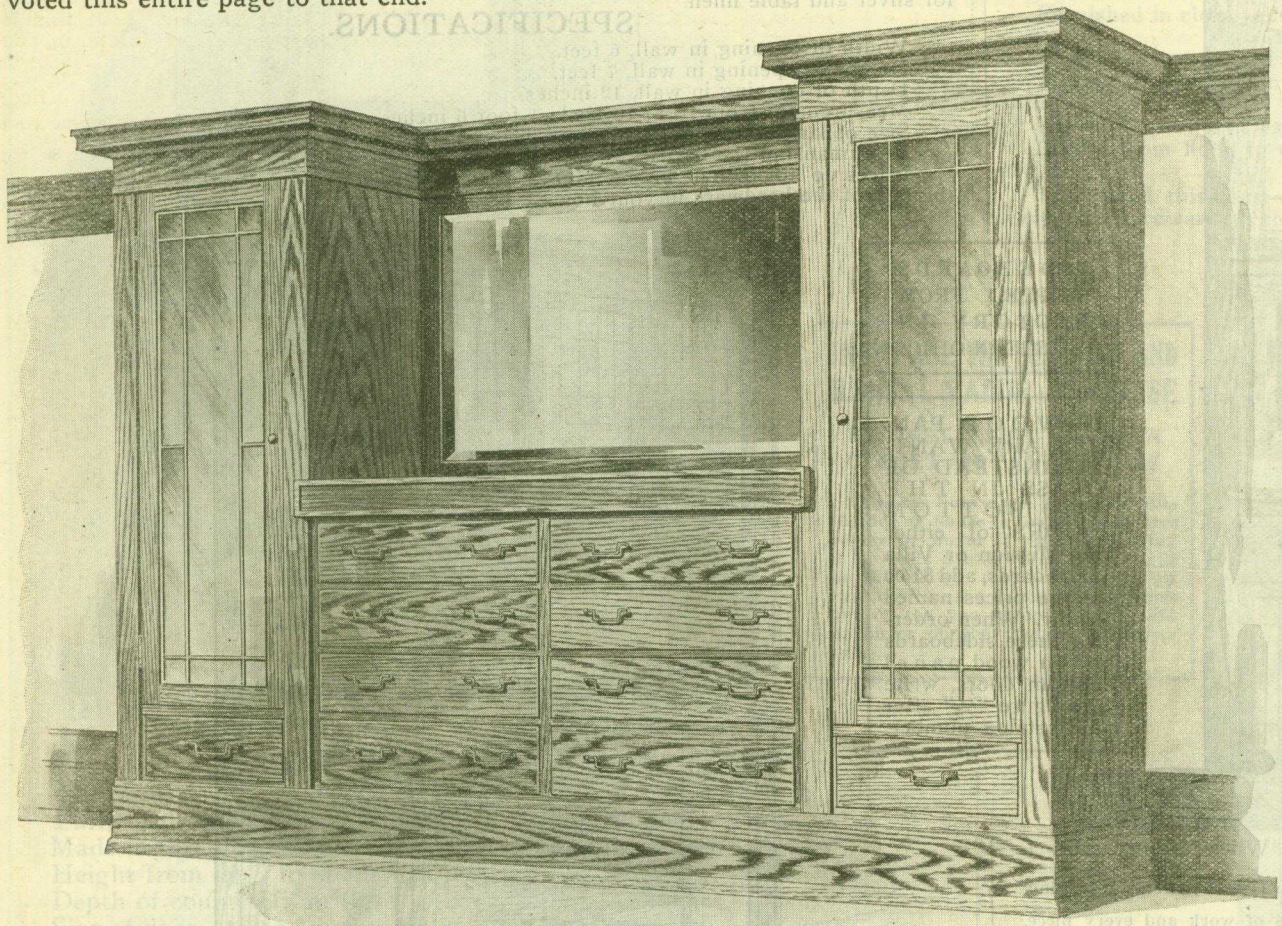
Craftsman China Closet and Buffet

A glance at the illustration below of our Craftsman China Closet and Buffet will give you a better idea of its simple elegance and beauty of design than mere words could express, even though we devoted this entire page to that end.



Being installed in high priced flats and the finer class of residences. This combination china closet and buffet is primarily of Craftsman design, but your house does not necessarily have to be finished in the Craftsman style in order to use it, as the design is such as will harmonize perfectly with almost any interior. Another of its advantages is that it can be installed in an old house as readily as in a new one. It is not set back in an offset of the wall as are most built-in china closets and sideboards.

SPECIFICATIONS: Width over all, 7 feet 10 inches; height over all, 5 feet 6 inches; measurement from front to back, 1 foot 7 inches; size of doors, 1 foot 5 inches by 4 feet; size of mirror, 3 feet 6 inches by 2 feet. Shipping weight, about 550 pounds. Furnished in plain red oak or birch. Prices do not include knobs, hinges and drawer pulls, as this hardware should match the rest of the hardware in your house. **Be sure to state kind of wood wanted.**

No. 63M8627 **Clear Oak or Birch** (not oiled or varnished), with clear leaded glass in doors. Price.....**$43.50**

No. 63M8626 **Clear Oak or Birch** (not oiled or varnished), with clear double strength glass in doors. Price. **40.00**

China Closets and Buffets shipped from factory in WESTERN OHIO.

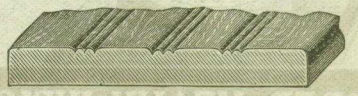
SINK APRONS.



No. 63M7794 Oak Sink Aprons. Size, ⅞x7 inches. Price, per lineal foot.....6c
Weight, per foot, about 1½ pounds.

BUY HEAVY WEIGHT SLATE SURFACED ROOFING

ROOFING 85 TO 90 POUNDS TO THE ROLL MEANS A GUARANTEED 15-YEAR ROOF

Why Oriental Slate Surfaced Roofing and Oriental Fire-Chief Shingle Roll Roofing Which Weigh 85 Pounds to the Roll Are the Roofings for You to Buy.

1—**It is manufactured under a formula that insures strength and durability.** It is to our interest as well as to yours that it should wear fifteen years, because the more satisfaction it gives the greater will be our sales.

2—**There is no tar or animal oil in this roofing.** We use high grade roofing felt and high grade asphalt in its composition. We put 15 extra pounds of asphalt in the coating to make sure that the genuine slate surfacing when applied will stay there during the term of our guarantee.

3—**The extra heavy asphalt coating and the thoroughly embedded slate surface** defy the elements, making your roof absolutely watertight and practically fireproof.

4—**The colors never fade. No paint or stain ever needed.**

5—**Oriental Slate Surfaced Roofing is not an experiment.** Hundreds of thousands of rolls have already been sold. It has been tested in nearly every state in the Union. We have received hundreds of letters containing expressions of approval from all parts of the country.

Read the description and note the colored illustration of this roofing on opposite page. Send for samples and note the firmly embedded slate surface, the extra heavy coating and the deep saturation all through the felt base. Then you will agree with what our customers say, that Oriental Slate Surfaced Roofing is **the most beautiful, the strongest and most durable roofing made anywhere at any price.**

FINAL CAUTION! No matter where you buy slate surfaced roofing, insist on getting 85 pounds to the roll.

LIGHT WEIGHT ROOFING MEANS A SHORT LIVED ROOF. COSTS MORE IN THE END

Why Light Weight Slate Surfaced Roofing Makes a Short Lived Roof. Fifteen Pounds Less in Weight Means Shorter Life. Will Wear Only About Half as Long as 85 to 90-Pound Roofing.

1—**The coating in which the slate surface is embedded** is not heavy enough or deep enough to hold the slate particles. Hail, rain and wind work them loose.

2—**When the slate surface is being blown away,** it takes the asphalt coating with it, leaving the felt surface exposed in spots.

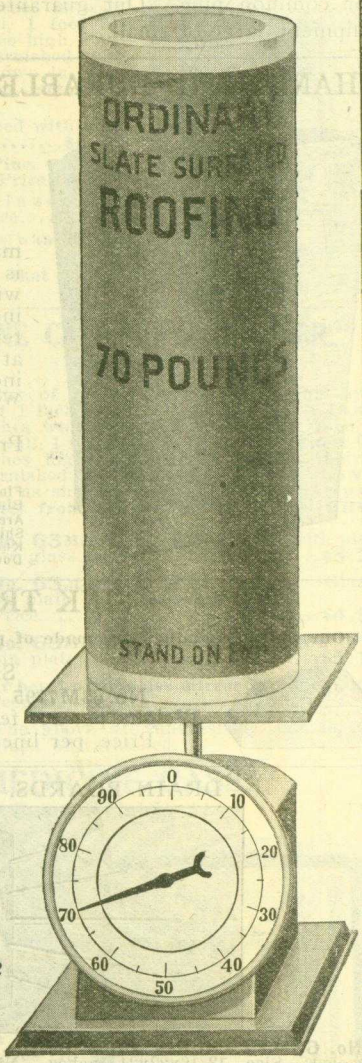
3—**With the slate surface and the asphalt coating gone,** the felt body is not protected against the elements and disintegrates more rapidly than it would if protected with slate and coating.

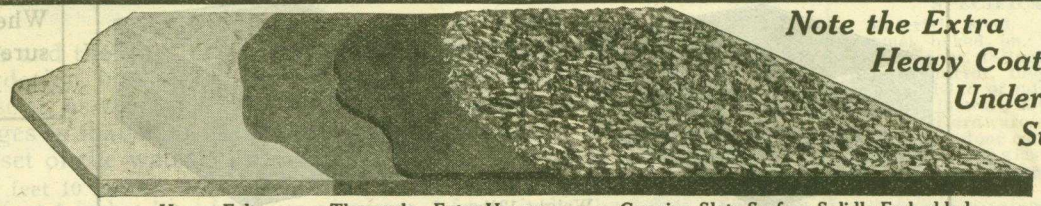
4—**The loss in weight is in the asphalt coating,** the most important item in the manufacture of prepared felt roofing. Roofing guaranteed to wear fifteen or even ten years should have an **extra heavy asphalt coating.** Unless the complete roll weighs 85 pounds, you run a chance of being compelled to put on a new roof in a few years, so that light weight slate surfaced roofing in the end will cost you nearly twice as much as the guaranteed 85-pound kind.

Consider this matter very carefully. It means a good deal to you and to every man who is in the market for a roofing that will wear for fifteen years. Insist on the weight; insist on getting a guarantee that protects you fully.

WE COULD MAKE A SLATE SURFACED ROOFING of poor ingredients, such as inferior grades of felt, animal oil or tar, and sell it to you for less than $1.50 a roll, but we could not guarantee it to wear fifteen years. It is much better to buy a good light weight smooth finished roofing than an inferior grade slate surfaced roofing, simply because there is nothing to hold the slate surface and when that surface is gone the roof will deteriorate rapidly.

WARNING! Many of the so called Slate Surfaced Roofings now on the market are really surfaced with crushed brick or colored soft stone. These have not the wearing qualities of roofing covered with genuine crushed slate. Investigate the matter thoroughly before placing your order.

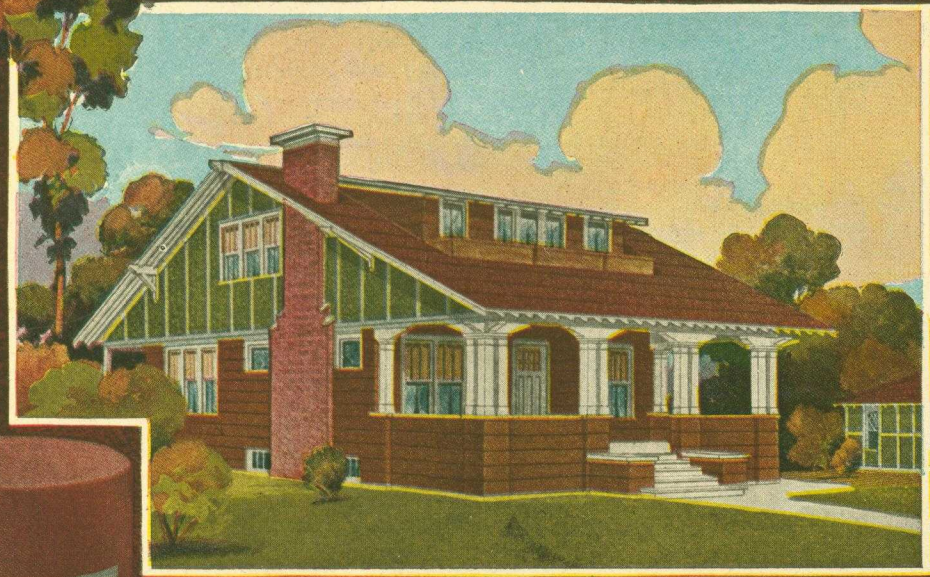


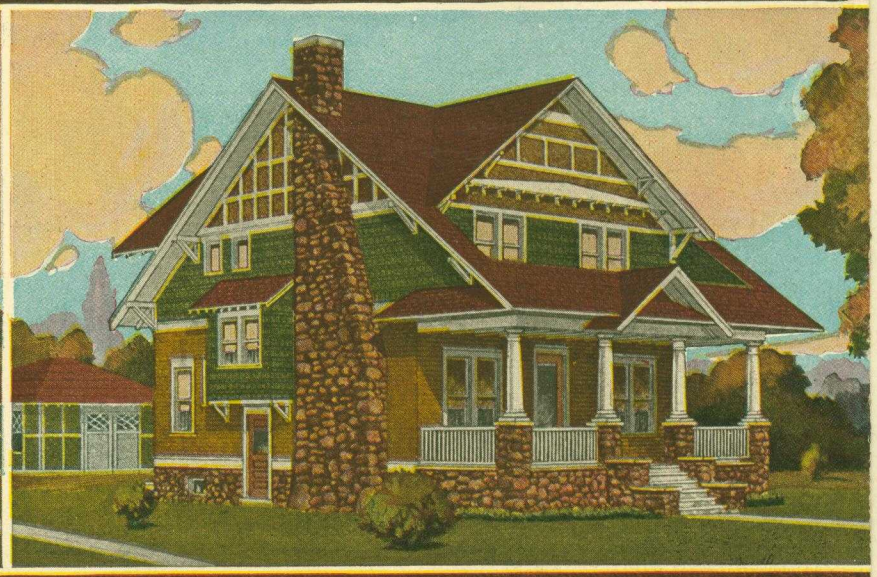


Note the Extra Heavy Coating Under Slate Surface

Heavy Felt. Thorough Saturation. Extra Heavy Coating. Genuine Slate Surface Solidly Embedded. Not Brick or Soft Stone.

ORDER HEAVY WEIGHT SLATE SURFACED ROOFING FROM SEARS, ROEBUCK AND CO., CHICAGO





GUARANTEED FOR FIFTEEN YEARS.

Approved by Underwriters' Laboratories, Inc., Under Direction National Board of Fire Underwriters.

240 Pounds to the Square.

$5.25 A SQUARE CUT AS SHINGLES

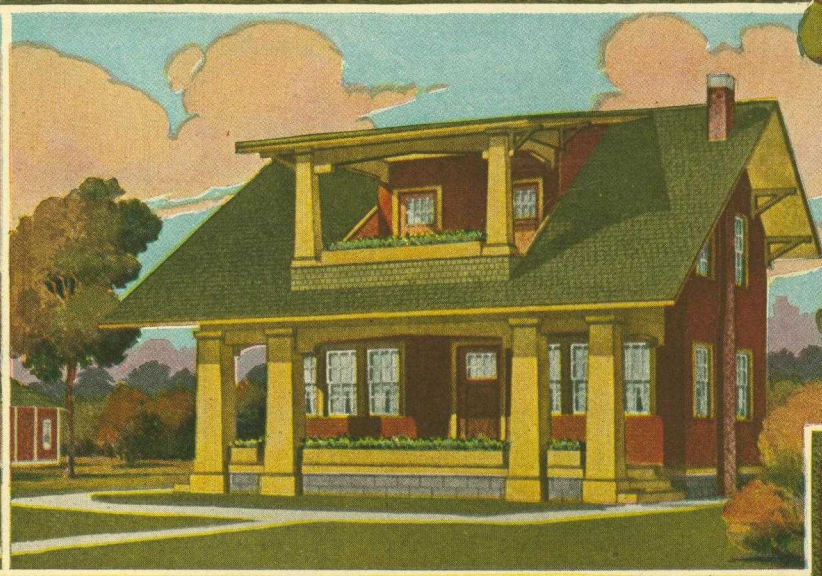
ORIENTAL SLATE SURFACED SHINGLES retain their rich color always. They are surfaced with real red or sea green crushed slate in natural colors. **GUARANTEED TO OUTWEAR WOOD SHINGLES. Waterproofed CLEAR THROUGH the roofing felt with asphalt saturation.** The crushed slate embedded in extra asphalt coating furnishes a never fading color, and makes the roof practically fireproof.

We guarantee these shingles to wear fifteen years without painting or any attention whatever. Oriental Shingles will not warp, curl or flap in the wind.

ALL SHINGLES ARE OF UNIFORM SIZE, 8x12¾ inches. Unlike wood shingles there are no culls to be thrown away; there is no labor wasted in selecting the proper size shingles for the proper place. Can be laid with less labor than wood shingles, and look better than a slate roof. **Twenty to forty pounds to the square heavier than similar shingles.** For standard weight shingles at $3.95 a square and Oriental Shingles (unapproved) at $4.95 a square see page 105.

Packed four boxes to the square, each box containing enough shingles to cover 25 square feet when laid 4 inches to the weather and ½ inch apart; 425 Oriental Shingles will lay one square of 100 square feet, or will cover as much surface as 900 wood shingles laid 4 inches to the weather. Can be laid on the same sheathing as wood shingles, even if roof boards are from 1 to 2 inches apart. This means quite a saving when old wood shingles have to be removed and Oriental Shingles applied. **Shipped from our CHICAGO store, or factory in CINCINNATI, OHIO.**

Catalog No.	Surfaced With	Price, per Square, 425 Shingles	Shipping Wt., per Square, Pounds
48M2926	Crushed Red Slate	$5.25	240
48M2927	Crushed Sea Green Slate	5.25	240



IN ROLLS OF 108 SQUARE FEET $2.40

85 Pounds to the Roll.

ORIENTAL ROOFING IS GUARANTEED FOR FIFTEEN YEARS. Needs no coating. Will not catch fire from flying embers as wood shingles do. **Comes in rolls 32 inches wide,** each roll containing 108 square feet with a covering surface of 100 square feet. **Fifteen pounds to the roll heavier than similar roofing.**

ORIENTAL SLATE SURFACED ROOFING is a most beautiful roofing. Fine enough for the most expensive residence. Made under our own formula with high grades of roofing felts and fine asphalts. A roofing that has stood the test of time, hence guaranteed by us for fifteen years. It is coated with fine asphalt in which the genuine crushed slate is thoroughly embedded. **We don't use crushed brick or soft stone.**

It is furnished in two colors, red or sea green. These colors will not fade, as they are the natural colors of the slate. Suitable for roofs with a pitch of 1½ inches or over to the foot.

Here's a chance to reduce the cost of your building, adding to its beauty, reducing its cost of upkeep, as no painting is ever required. Whether you use Red or Sea Green Slate Surfaced Roofing you have the satisfaction of knowing that neither need be touched for at least fifteen years. **Anyone can lay it. Complete directions go with every roll. Cement and plenty of galvanized nails included at the prices. Be sure to ask for long nails if the roofing is to be used over shingles.**

Shipped from our Chicago store, Albany, N. Y., Cincinnati, Ohio, Kansas City, Mo., Pittsburgh, Penn., or St. Paul, Minn., at $2.40 a roll. Shipped from Atlanta, Ga., at $2.60 a roll.

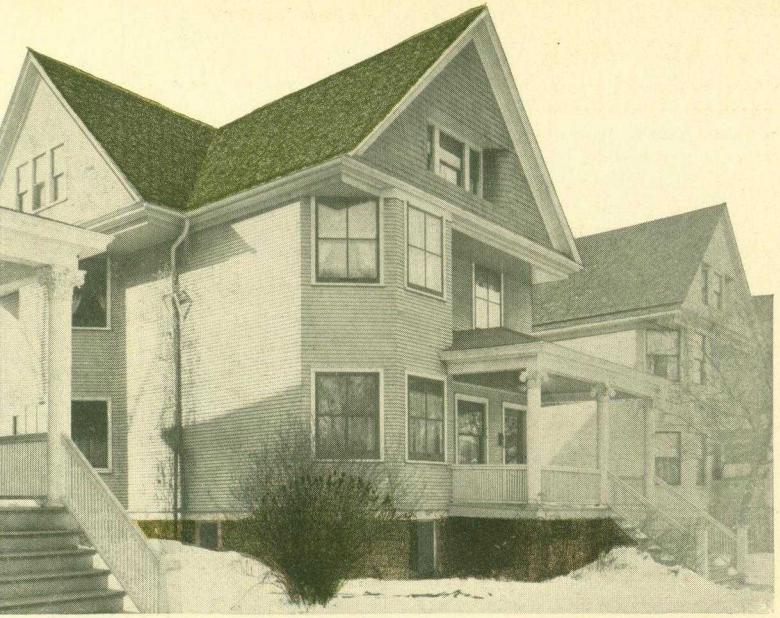
RIENTAL SHINGLES BEAUTIFY THE FINEST RESIDENCES



"A FRIEND IN NEED"

THE MEDICAL AID AND BURIAL ASSOCIATION OF CHICAGO

SUITE 310 320 330 340 MONON BUILDING

Sears, Roebuck & Co.,
Chicago, ILL.

Gentlemen:-

I am pleased to advise you that I am entirely satisfied with the Oriental shingles applied on my residence. They have not only made a satisfactory, durable and water-proof roof, but I consider they have added attractiveness to my dwelling. The artistic features as well as the practicability of these shingles has caused any number of people to call on me seeking information regarding these shingles. The shingles lay perfectly flat as if one solid sheet of roofing and I have been convinced that there is no danger of them cracking or curling. The color I think is richer than when they were applied sometime ago.

I would take pleasure in recommending these shingles to anyone who is desirous of securing a water-tight and durable as well as attractive roofing. It required 19-1/2 squares to cover my dwelling on which I figured a saving in labor as well as material of $4.25 per square over what it would have cost to have applied the best grade of wood shingles.

Yours very truly,

William A. Munson

(P.O. ADDRESS STA. "E").

Subject:
Sears, Roebuck & Co.,
Chicago, Ills.

Gentlemen:-

In the spring of 1912 you roofed my house with what is known as "Oriental Asphalt Shingles".

My house is a white house and I think that the red roof gives it a setting off that adds very much to its appearance.

The shingling and workmanship indicates from the nonleakage that the job was well done and I have no doubt that it will outlast its guarantee.

Yours truly,

R. Quayle

NUINE ORIENTAL SLATE SURFACED SHINGLES ARE SOLD ONLY BY SEARS, ROEBUCK AND CO.

PEERLESS WALL BOARD—Finished Like Quarter Sawed Oak

DAMPPROOF. *Also Finished Like Circassian Walnut.* *VERMIN PROOF.*

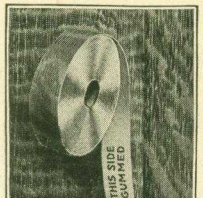
NO STAIN OR PAINT REQUIRED AT ANY TIME

For years contractors and builders have been looking for something of this kind. It is used in place of lath and plaster, but unlike lath and plaster there is no dirt or dampness, no papering, kalsomining, painting or staining. **Peerless Wall Board in either quarter sawed oak or Circassian walnut finish** can be used effectively in combination with the plain brown finish wall board in all cases where it is desired to show wainscoting in a room or hallway, the upper portions of the walls to be painted. We do not claim that Peerless Wall Board is actually better than first class lath and plaster for all kinds of buildings, although it has many advantages which plaster has not, but we do say that if you are looking for something to take the place of lath and plaster, Peerless Wall Board will give satisfactory results. We sell Peerless Wall Board in either the quarter sawed oak or Circassian walnut finish for only a few cents more than the plain brown finish and guarantee to get it to your station in first class condition.

Lasting and Inexpensive

Peerless Wall Board is wear resisting. It will last practically as long as the building in which it is used. The two layers of refined asphalt which cement the three plies of heavy compressed cardboard make the sheet dampproof and vermin proof. When applied, Peerless Wall Board, whether in the plain brown, quarter sawed oak or Circassian walnut finish, will make a room as comfortable as solid wood or lath and plaster. The asphalt is a non-conductor of heat and cold.

If you are looking for something to take the place of lath and plaster at an exceedingly low price, Peerless Wall Board is the material for you to buy. Any handy person can put it on and thus save the cost of employing a high priced mechanic. Full instructions are included with every shipment of Peerless Wall Board which, if faithfully carried out, will insure a satisfactory and lasting job.



To the left we illustrate Joint Tape, to be used where wood panel strips over the joints are not desired. This tape matches our wall board in color and enables you to get a perfectly flat surface. Shipped with wall board.

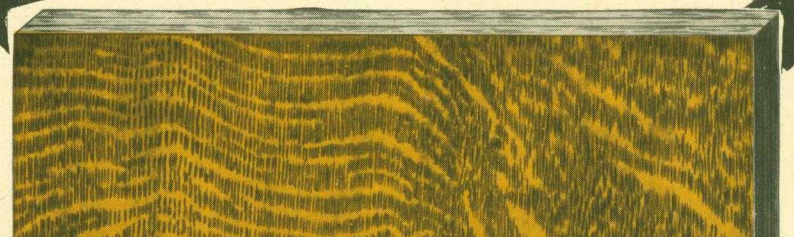
No. 48M2950 Plain brown finish. Price, per roll of 100 feet **25c**

No. 48M2951 Oak grain finish. Price, per roll of 100 feet..... **25c**

No. 48M2952 Circassian walnut finish. Price, per roll of 100 feet..... **25c**

No. 48M2953 Plain cream color, for Wood Fiber Wall Board. Price, per roll of 100 feet..... **25c**

Allow 3 cents extra per roll for postage if Joint Tape is to be shipped by mail.



This Is an Exact Reproduction of a Piece of Quarter Sawed Oak Finish Peerless Wall Board.

Prices of Peerless Wall Board—Finished Like Quarter Sawed Oak or Circassian Walnut.

Sold in the following sizes only. When ordering give length of sheets.

Length	Width	Number of Square Feet to the Sheet	Shipping Weight, per Sheet	No. 48M3014 Finished Like Quarter Sawed Oak. Price, per Sheet	No. 48M3008 Finished Like Circassian Walnut. Price, per Sheet
8 feet	32 inches	21⅓ square ft.	17 lbs.	56c	57c
9 feet	32 inches	24 square ft.	19 lbs.	63c	64c
10 feet	32 inches	26⅔ square ft.	21 lbs.	70c	71c
11 feet	32 inches	29⅓ square ft.	23 lbs.	77c	79c
12 feet	32 inches	32 square ft.	25 lbs.	84c	86c

PEERLESS WALL BOARD is carefully packed in wood crates, thus insuring our customers receiving it in perfect clean condition. **Shipped direct from NORTH EASTERN ILLINOIS or from factory in SOUTHERN OHIO.** Allow five days extra for North Eastern Illinois shipments.

Can Be Used for Many Purposes

Peerless Wall Board finished like quarter sawed oak or Circassian walnut can be used for many purposes. It is excellent for smoking rooms, libraries, dens, hallways, wainscoting, show windows, etc. If you are doing any remodeling and wish to convert an unsightly garret into a playroom or extra room for any purpose, this wall board will enable you to do the work at small cost. Churches, schoolhouses or other public buildings can be decorated with very fine effect when Peerless Wall Board in quarter sawed oak or Circassian walnut finish is applied and the joints covered with panel strips.

Consider the time you save on any job and the ease with which the work is done when Peerless Wall Board is used instead of lath and plaster. Before the last sheet is applied the carpenter can put on the trim and the painter can apply the stain or varnish to it—three operations going on at about the same time. No waiting for plaster to dry and no dampness in the building after the work is done. You can put on this wall board right over the studding or apply it to old plaster if you wish. Can be sawed like wood and solidly nailed without danger of splitting. Peerless Wall Board is furnished in sheets from 8 to 12 feet long, each sheet being 32 inches wide.

Your Choice of the Two Leading Brands of Wall Board at a Saving of About One-Third

WOOD FIBER WALL BOARD

FINISHED IN A PLAIN CREAM COLOR.

WOOD FIBER WALL BOARD, as its name implies, is made entirely of white spruce wood fiber, reduced to pulp and then made by a special process into strong, durable sheets about 5/16 of an inch thick. Cuts easily with a saw, making neat, even joints. This material under another name **sells at much higher prices** and is in greater demand for new buildings and the remodeling of old ones than any other wall board.

IT IS CLEAN, DRY, SANITARY AND DURABLE. Can be painted or tinted any color desired, and is specially treated, making it dampproof. Any handy person can apply it with satisfactory results. Rooms are ready for occupancy as soon as applied and look more decorative in many instances than rooms where good lath and plaster are used.

IT IS FINE FOR SCHOOLS, LODGE HALLS, OFFICE BUILDINGS AND DEPARTMENT STORES, where quick work, decorative possibilities and sound deadening qualities are desired. Very effective when wood panels are used over the joints. **It will last practically as long as the building** and there never will be any danger of it cracking or falling off. Furnished only in lengths specified below, and 32 or 48 inches wide. Carefully bundled for shipment. **Shipped from factory in WESTERN NEW YORK only. When ordering be sure to give size of sheets wanted, stating width and length.**

Prices of Wood Fiber Wall Board.

Length, Feet	No. of Sq. Ft. to the Sheet	Shpg. Wt., per Sheet, Crated	No. 48M3196 Plain Light Cream Finish. Price, per Sheet	
8	21⅓	15 lbs.	50c	For sheets 48 inches wide add one-half extra to these prices.
9	24	17 lbs.	56c	
10	26⅔	19 lbs.	62c	
11	29⅓	20 lbs.	68c

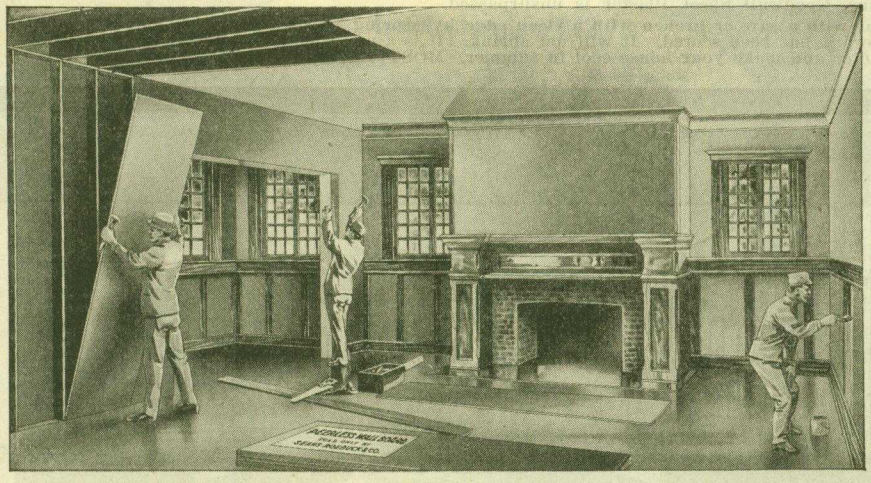
Panel Strips.

To be used over the joints of wall board. Carried in stock in the sizes listed below. Prices are for 100 lineal feet. Weight, per 100 feet, 18 pounds.

Catalog No.	Kind of Wood	Size, Inches	Price, per 100 Lin. Ft.
48M7922	Yellow Pine	5/16x1¾	55c
48M7923	Plain Red Oak	5/16x1¾	98c

Shipped With Wall Board.



The picture above shows how simple and easy it is to apply wall board; simply order in the lengths required. It is best to order lengths which reach from the floor to the ceiling for the side walls and lengths which will reach from one side of the room to the other for the ceiling. Nail them to the studding and joists with 6-penny common wire nails. When the last sheet is applied the room is ready for occupancy.

WALL BOARD is now being used in buildings of all descriptions, including residences, summer homes, cottages, factories and office buildings, garages, portable houses and even in barns and chicken houses.

IF IN DOUBT ABOUT THE AMOUNT YOU REQUIRE, send us dimensions of side walls and ceilings, with a rough sketch of doors and windows, and we will make up your order for the exact amount you need.

Waterproof Wall Board

For Outside Use.

This is our latest product in the wall board line. It can be used for a great many outside purposes, including chicken houses, garages, tool sheds, wagon houses, etc. The three sheets of heavy cardboard, before being cemented together with asphalt, are saturated in a waterproof asphalt composition which makes them absolutely waterproof. This wall board needs no paint and will withstand the elements for years. It will save you quite a sum of money when used in place of lumber for such buildings as we have referred to above. **Shipped direct from CHICAGO or from factory in SOUTHERN OHIO.** Allow five days extra for Chicago shipments. All sheets are 32 inches wide. **When ordering give length of sheets wanted.**

PRICES OF WATERPROOF WALL BOARD.

Catalog No.	Length	Number of Square Feet to the Sheet	Shipping Weight, per Sheet	Price, per Sheet
48M3073	8 feet	21⅓ square feet	18 lbs.	60c
	9 feet	24 square feet	20 lbs.	68c

	11 feet	29⅓ square feet	25 lbs.	84c
	12 feet	32 square feet	27 lbs.	92c

PEERLESS WALL BOARD

FINISHED IN A LIGHT BROWN COLOR.

PEERLESS WALL BOARD is made of three layers of cardboard, held together by two layers of asphalt. When used in place of plaster, it lacks some of the good qualities of our Wood Fiber Wall Board, described at the left, but at these low prices it is a real bargain. We are selling it for about **2 cents per square foot.**

IT IS OFTEN USED INSTEAD OF PLASTER and can be applied by anyone. Comes in plain light brown finish. **It can be painted any color desired,** but most people consider the plain light brown finish very effective. Fine for basements or attics and for dividing large rooms into two small ones.

NO WAITING FOR WALLS TO DRY. Packed in wood crates, guaranteed to reach you in good condition. **Shipped from CHICAGO or from factory in SOUTHERN OHIO.** Allow five days extra for Chicago shipments. When ordering give length of sheets for side walls and ceilings. All sheets are 32 inches wide.

FOR PEERLESS WALL BOARD IN QUARTER SAWED OAK AND CIRCASSIAN WALNUT FINISH SEE COLORED PAGE OPPOSITE.

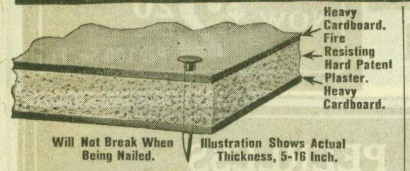
GOODWALL SHEET PLASTER AT $2.25 PER HUNDRED SQUARE FEET



Heavy Cardboard.
Fire Resisting Hard Patent Plaster.
Heavy Cardboard.
Will Not Break When Being Nailed.
Illustration Shows Actual Thickness, 5-16 Inch.

ADVANTAGES

It enables you to do a better job for less money and can be applied by yourself.

It is equal in service and strength to a lath and plaster wall.

It does away with lath stains and hair cracks.

It deadens sound as effectively as lath and plaster.

It is vermin proof and can be painted, papered or kalsomined.

It can be covered with a plaster coat of any thickness, but ¼ of an inch will be sufficient to make a smooth and seamless wall.

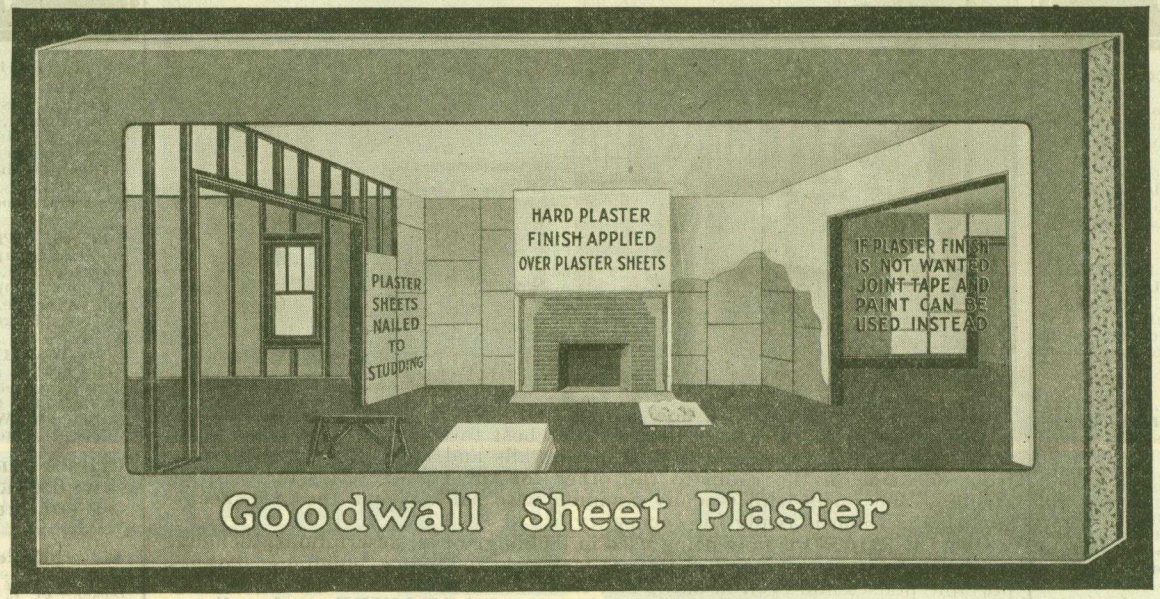
It can be removed and replaced, in sections, for plumbing repairs.

It is clean. You will have no muss and dirt when you apply it.

WHAT IT IS: Goodwall Sheet Plaster is a fire resisting hard patent plaster of even thickness between two sheets of heavy cardboard which are thoroughly saturated with the fire resisting composition. The Hard Plaster Finish adheres firmly to the surface. Goodwall Sheet Plaster comes in sheets 32x36 inches and takes the place of regular lath and plaster at less cost and with less labor. Sheets contain 8 square feet. Shipping weight, 14 pounds.

For the interior walls and ceilings of new buildings, for repartitioning in office buildings, for stores, country clubs, bungalows, summer cottages and attics, where a hard wall surface is wanted, a surface that will not warp, break or show lath stains, Goodwall Sheet Plaster is unsurpassed.

It can be cut with a saw or broken with a clean edge by scoring the cardboard on both sides with a knife, then breaking it where it has been scored. It will not shrink. It is a non-conductor of heat, cold and sound. It will reduce fuel bills in winter and make your house cool in summer. MOST IMPORTANT OF ALL, IT RESISTS FIRE.



PLASTER SHEETS NAILED TO STUDDING
HARD PLASTER FINISH APPLIED OVER PLASTER SHEETS
IF PLASTER FINISH IS NOT WANTED JOINT TAPE AND PAINT CAN BE USED INSTEAD
Goodwall Sheet Plaster

The illustration above shows Goodwall Sheet Plaster being applied to the studding. When this is done, it is given a coat of our specially prepared Hard Plaster Finish, ¼ of an inch thick. In the right hand corner we show Joint Tape placed over the joints, after which the entire surface is given a coat of paint or kalsomine. It can be wall papered without the use of sizing. For the best results, however, we recommend a ¼-inch coat of Hard Plaster Finish. You will then have fire resisting walls, with a perfectly smooth surface, which can be tinted any desired color or decorated like any other wall. You will find the prices and description of Joint Tape on color page opposite page 97.

ADVANTAGES

It is dry. No need to wait for wee to drive the dampness out.

It is strong. Send for a sample a try to break it with your hands.

It cuts out cost of lath. None nee ed with Goodwall Sheet Plaster.

It will not break when being naile It is tough and durable.

Nails—One pound will be required seven sheets of Goodwall Sheet Plast Shipped with sheet plaster from a of our sheet plaster warehouses.

Made of High Grades of Roofing Materials.

How Fire-Chief Roofing Is Made.

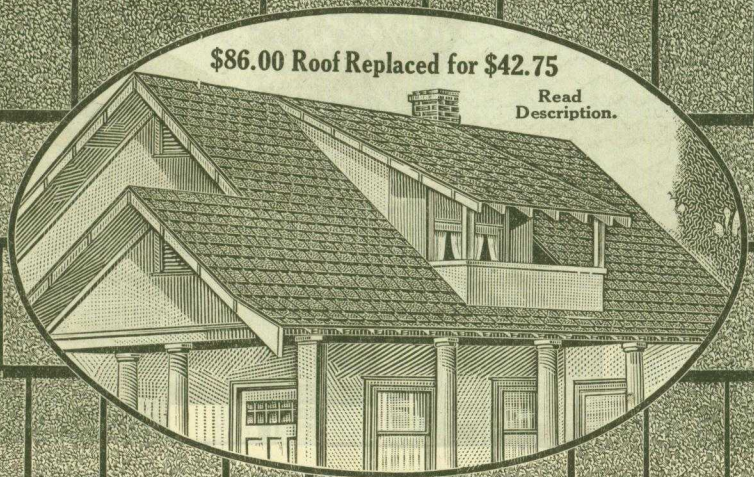
The formula and process for making Fire-Chief Shingle Roll Roofing have been in use for ten years in our Oriental Slate Surfaced Shingles. It has been put to the most severe tests. Oriental Slate Surfaced Shingles laid ten years ago are practically as good as the day when laid. Experts claim this roofing WILL LAST FROM TWENTY TO TWENTY-FIVE YEARS.

The body of the roofing is made of the most dependable materials known for roofing purposes, namely, weather resisting asphalts, compounded according to our own formula, and heavy, tough roofing felts costing from $5.00 to $10.00 per ton more than the kind used in ordinary roofing. NO TAR in this roofing. Nothing to melt or evaporate in any climate.

The coating is made of very high grade rubber-like roofing asphalts, the coating that is applied at a temperature of 350 degrees heat, acknowledged to be the most successful water-proofing known to science for roof protection. Used by railroad companies in the manufacture of car roofing that will withstand the rigors of all climates.

THIS SMOOTH EDGE MAKES TIGHT JOINTS

FIRE-CHIEF SHINGLE ROLL ROOFING



Made from the same stock used in our Oriental Shingles, which have been approved by the Underwriters' Laboratories, Inc., under direction of the National Board of Fire Underwriters.

Will Outwear TWO White Cedar Shingle Roofs.

Costs Less Than Wood Shingles.

Fire-Chief Shingle Roll Roofing costs less than $3.50 per square LAID on the roof. Red cedar shingles cost $5.73 per square laid. If you lay it yourself, $42.75 will roof a house requiring fifteen squares of Fire-Chief Shingle Roll Roofing; wood shingles laid on the same size house would cost about $86.00. Why not save $43.25?

Looks exactly like a perfect job of painted red or green wood shingles when on the roof, but Fire-Chief Shingle Roll Roofing does not have the defects, such as curled or warped shingles, so often found in wood shingle roofs. Used on an addition it will match the wood shingles on the main building exactly if they are stained red or green.

Red and Sea Green Shingle Patterns.

So perfect is this new shingle design that experts cannot detect it from a painted wood shingle roof at a short distance. The pattern is made of real red or sea green crushed slate (your choice of colors) with black shaded lines inlaid between the shingles, a treatment that is permanent and beautiful, and a perfect imitation of painted wood shingles. IT IS THE ONLY NATURAL SHINGLE EFFECT ROOFING ON THE MARKET THAT WE KNOW OF.

This shingle roofing is furnished in rolls containing 108 square feet, 40 feet 6 inches long and 2 feet 8 inches wide, with 8 feet extra allowed for 2-inch laps. ALL IN ONE PIECE—NOT IN 900 PIECES, as are wood shingles. To the average square of wood shingles there are over 200 cracks or places for snow to blow through. In Fire-Chief Shingle Roll Roofing there are NO CRACKS OR CREVICES. Each roll will cover 100 square feet.

WE BELIEVE WE HAVE MADE THIS THE HEAVIEST, THICKEST, STRONGEST AND MOST BEAUTIFUL of all shingle roll roofings. Each roll weighs fully 85 pounds. It is FOUR-PLY STOCK, each sheet being about ⅛ inch thick.

Shipped from

CHICAGO, ILL., ST. PAUL, MINN., KANSAS CITY, MO., ALBANY, N. Y., PITTSBURGH, PENN., or SOUTHERN OHIO.

Excludes Snow and Water Better Than Wood Shingles.

Fire-Chief Shingle Roll Roofing with self sealing seams is AIRTIGHT AND WATERTIGHT. No danger of snow drifting through the cracks, as is common when shingles are used.

WARMER THAN WOOD SHINGLES. Being absolutely windtight and because it is made of roofing felt and asphalt of about ⅛ inch in thickness, it is a non-conductor of cold or heat, and therefore makes a house COOLER IN SUMMER AND WARMER IN WINTER. Can be used over old shingles, giving double roof protection.

RESISTS FIRE. Unlike wood shingles, Fire-Chief Shingle Roll Roofing actually resists fire, whereas wood shingles when dry will catch fire easily from sparks. Why shingle your house with "kindling wood" when you can buy a FIRE-RESISTING ROOFING MATERIAL at about half the price of wood shingles?

PRICE OF FIRE-CHIEF SHINGLE ROLL ROOFING.

48M3320 RED
48M3321 SEA GREEN
WT. 85 LBS.-108 SQ. FEET
$2.85 PER ROLL

Needs No Painting.

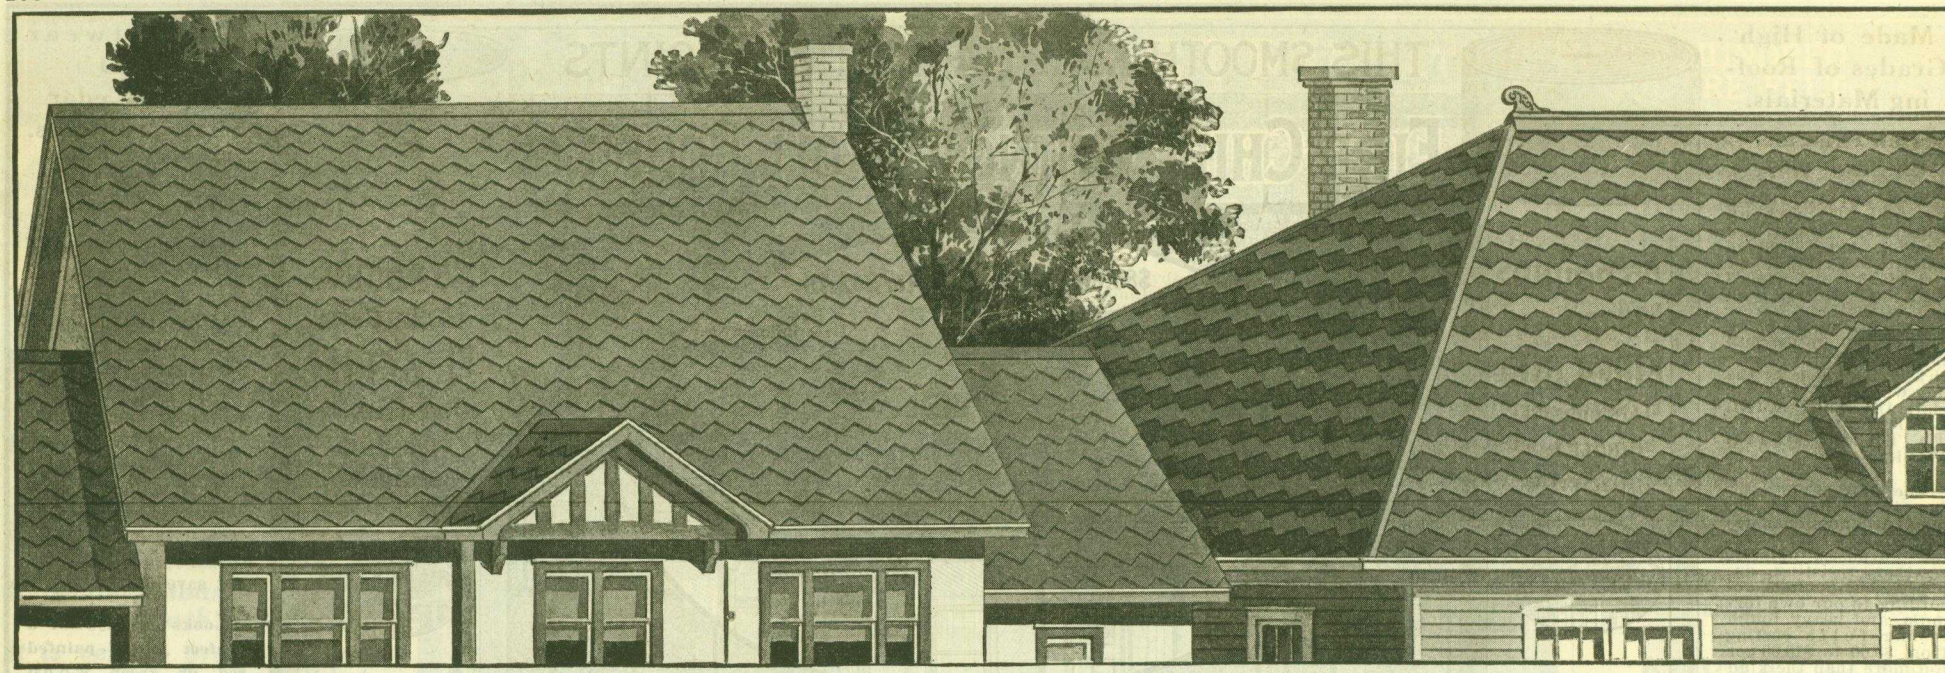
Fire-Chief Shingle Roll Roofing is furnished in beautiful RED or SEA GREEN shingle designs. The colors are natural red or sea green slate—Nature's own colors that will not fade or wash away. Beware of roofing with artificial colors.

Guaranteed for Fifteen Years.

A written guarantee backed by a concern whose reputation BACKS UP THE GUARANTEE. Did you ever hear of anyone guaranteeing wood shingles?

Galvanized Rustproof Nails and Cement Included.

The cement is not needed on roofs with a pitch of one-third or more.



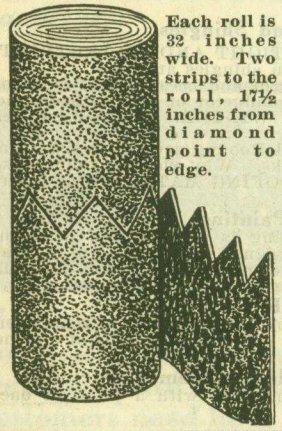
For colors see Insert between pages 92 and 97.

NEW-STYLE SLATE SURFACED ROOFING

Fine for Bungalows and high class homes.

Has Great Strength and Wearing Quality

New-Style Slate Surfaced Roofing is made of the same high grade material as our famous Oriental Slate Surfaced Roofing. It has the additional advantage of a finer appearance, as the rolls are cut diamond point. Each roll contains 138 square feet, the amount required to cover 100 square feet, each roll weighing 90 pounds. New-Style Slate Surfaced Roofing is made of high grade roofing felt, thoroughly saturated with a high grade asphalt, then heavily coated with asphalt, into which the crushed slate, red or sea green in color, is thoroughly embedded. The genuine crushed slate surface makes this **roofing practically fireproof.** Little or no danger from flying sparks or cinders. Takes a lower rate of insurance than wood shingles.



Each roll is 32 inches wide. Two strips to the roll, 17½ inches from diamond point to edge.

Consider the Weight and Covering Surface

Extra thickness and weight make extra strength. Each roll of New-Style Slate Surfaced Roofing **weighs 90 pounds to the roll** and will cover 100 square feet. Compare the cost of this roofing with the cost of wood shingles and figure the difference in the cost of laying. Then think of the added protection from fire and you will quickly choose New-Style Slate Surfaced Roofing.

Have you read what we say about the difference in weight between various brands of slate surfaced roofing, on page 92 of this catalog? If not, please do so now. Beware of slate surfaced roofing that does not weigh at least 85 pounds to the roll. When you buy New-Style Slate Surfaced Roofing or Oriental Slate Surfaced Roofing, you know that you get one of the highest grade, thickest, heaviest and most durable roofings on the market.

Guaranteed Fifteen Years

We guarantee New-Style Slate Surfaced Roofing to wear fifteen years under ordinary climatic conditions; cyclones, tornadoes and unusual storms excepted, also fires from lightning or other causes.

New-Style Slate Surfaced Roofing is not affected by snow, rain, heat or cold. It will not run, crack or dry up. No coating, painting or staining ever required.

Easy to Lay and Always Looks Well

New-Style Slate Surfaced Roofing is easy to lay. A glance at the small illustration to the right shows that it is laid in exactly the same way as regular roll roofing. You do not need to hire a mechanic to do this work. Any intelligent person can do a perfectly good job when laying New-Style Slate Surfaced Roofing if he will follow the simple instructions sent with every roll.

New-Style Slate Surfaced Roofing always looks well. The roofs illustrated above prove this beyond a doubt. The red or sea green roofing when laid in alternate rolls makes a beautiful contrast, or it will look well all in one color. It is suitable for all kinds of buildings, from the humblest cottage to the most expensive residence. Costs only a little more than the plain roll roofing and insures for your building a roof of distinction. **Shipped from CHICAGO or SOUTHERN OHIO factories only.**

V shape cuts are 3 inches deep.

NO WASTE — NO DELAY IN LAYING

VERSA-TILE SLATE SURFACED SHINGLES

EACH SHINGLE 8 x 12¾ INCHES

CAN BE LAID WITH EITHER SQUARE OR ROUNDED ENDS EXPOSED.

Fine Appearance, Durability and Economy

Anyone looking at the roofs illustrated above will admit the fine appearance which Versa-Tile Slate Surfaced Shingles impart to a large residence, bungalow or cottage. Our fifteen-year guarantee proves their durability. Our price of $4.85 proves their economy. Made of the same high grade roofing felt, high grade asphalt and genuine crushed slate that we use in New-Style and Oriental Slate Surfaced and Oriental Fire-Chief Shingle Roll Roofing in rolls. Each square of 425 of these shingles will cover 100 square feet of roof when laid 4 inches to the weather and ½ inch apart. These shingles are as good in every way as our regular Oriental Slate Surfaced Shingles, but owing to the saving in material by cutting them with a round point we enable our customers to make a substantial saving on each square as compared with the Oriental Slate Surfaced Shingles.

Versa-Tiles Never Need Painting

With Versa-Tiles on your roof it will never need painting, staining or coating of any kind. The beautiful red and sea green natural colors will not fade and will always look much richer, softer and more refined than a painted or stained surface. The next thing to solid slate, but finer in appearance and costs much less to lay. Can be used in different pleasing combinations in addition to being laid square butt and round point. The colors, red and sea green, can be laid in alternate courses, as shown in the illustration of the house at the top to the right.

SQUARE ENDS EXPOSED.

Versa-Tiles Make a Fire Retarding Roof

Wood shingle roofs catch fire easily. Versa-Tiles retard fire. Sparks or flying embers from trains, factories or nearby buildings have little or no effect upon them. The real crushed slate surfacing is thickly and permanently embedded in the outer asphalt coating. It is put there to stay and will not blow off. The extra heavy coating holds the crushed slate surface firmly in place so that it will withstand the heaviest downpour of rain as well as strong wind. The beautiful red or sea green slate surface will last as long as the shingles.

Versa-Tiles Are Guaranteed for 15 Years

We guarantee Versa-Tiles to wear fifteen years under ordinary climatic conditions; cyclones, tornadoes and unusual storms excepted, also fires from lightning or other causes. **Versa-Tiles are not affected by snow, rain, heat or cold.** They will not run, crack or dry up. Whether you order Red or Sea Green Slate Surfaced Versa-Tiles, you can be sure of having a beautiful roof, a roof that will look much better and wear longer than stained shingles.

Shipped from factories in NORTHEASTERN ILLINOIS or SOUTHERN OHIO.

BEST-OF-ALL ROOFING

AN ASPHALT FELT ROOFING 10 POUNDS HEAVIER THAN MOST OTHER SMOOTH FINISHED ROOFING.

THICKEST, HEAVIEST AND MOST DURABLE SMOOTH FINISHED ROOFING.

Don't Buy Roofing From Anybody Without First Making These Tests.

PLEASE COMPARE:

1. **THICKNESS** Best-of-all is from 10 to 15 per cent thicker.
2. **WEIGHT**—Weighs from 10 to 15 per cent more.
3. **FLEXIBILITY AND STRENGTH**—Ours exceeds others by 25 per cent actual test.
4. **QUALITY**—We use pure asphalts and long fiber felts. You won't find tar or oil in this roofing.

We give you from 5 to 10 Extra Pounds to the roll without extra cost.

If you make these four tests there will be but one result. Whether it be for house or barn you will buy Best-of-all Roofing. There is no doubt about Best-of-all wearing longest.

The Four Tests, simple as they may seem, tell the difference between good and bad roofing. When buying Best-of-all Roofing **You Can't Go Wrong. We Guarantee Every Roll.** If you are not satisfied we will return your money; you simply take no risk whatever.

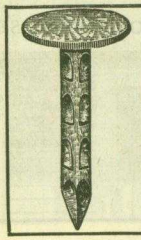
Our **Best-of-all Roofing** will outwear tin, tar or gravel roofing. It has stood the test in all climates from Alaska to the Gulf of Mexico. A weatherproof and fire resisting roofing that looks like silver, feels like rubber and wears like iron. Made of heavy, strong, long fibered roofing felt, saturated with high grades of asphalt. Best-of-all Roofing is elastic, pliable and tough, not affected by changes in climate, vapors, steam or gas and will not rust. Unlike most other kinds of prepared roofing, it is free from odor and will not discolor rain water; it can be used on any roof with a pitch of 1½ inches or over per running foot. A roofing that's **Heavier, Thicker and Stronger** than any standard make. If coated every three years with our Asphalt Roof Paint (see our Big Catalog or Paint Color Book), Best-of-all Roofing will wear considerably longer than the term for which it is guaranteed.

STOP! LOOK! COMPARE! Ours Wears Fully 25 Per Cent Longer and is from 30 to 50 per cent lower in price than retail prices.

Such sensational values can't be overlooked if you have a new or old building that needs a roof.

It is a Proven Fact that prepared roofing of good quality like Best-of-all will outwear wood shingles. Here's your chance to buy it at a fraction of their cost.

All the material that enters into the manufacture of Best-of-all Roofing is of high grade. High grades of roofing felts and high grades of asphalt only are used. Then, not being satisfied with paying for the best, we analyze all material thoroughly before we use it in manufacturing our roofing, so that we can feel satisfied that positively everything going into the makeup of this roofing is high grade. These precautions, together with the use of only the latest improved machinery, skilled workmen and manufacturing every roll under very careful inspection, result in Best-of-all Roofing being one of the most durable smooth finished roofings made regardless of price.



We furnish with every roll of our Best-of-all Roofing large headed galvanized roofing nails and plenty of cement for lapping seams or joints. Note that we furnish a galvanized nail with large head which costs much more than the old style wire roofing or shingle nails and tin caps used by many concerns. We know that a good roof depends largely on its being firmly secured to the roof boards. If this roofing is to be used over shingles, be sure to ask for 1¾-inch nails, otherwise ⅞-inch nails will be sent. Long nails not furnished with 1½-ply roofing. We recommend the heavier roofing when it is to be put on over shingles.

It Is Fire Resisting and Waterproof. It Is Better and Cheaper Than Tin, Tar and Gravel, or Any Other Kind of Roofing and Will Outwear Them All.

No. 48M33

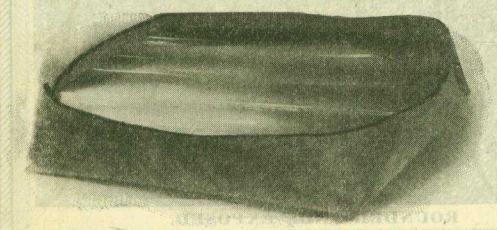
Shipped from CHICAGO, ILL., or CINCINNATI, OHIO.
Thirty-two inches wide; 216 square feet. Will cover 200 square feet.

If you live in the South, have your roofing shipped from Atlanta, Ga., and save extra freight charges. The difference in price represents only the lowest carload rate from our roofing factory to Atlanta, Ga.

WATER TEST



This illustration shows a pan formed of 4-Ply Best-of-all Roofing filled with water. This water test can easily be made by bending up the edges of a piece of roofing, so that the water will remain in the dish so formed. It will hold the water until it evaporates, without a drop soaking into the roofing. Best-of-all is waterproof, just as waterproof as anything can be. It never injures or taints the rain water flowing from it, which may be used for domestic purposes.

Best-of-all cannot rot.

STRENGTH TEST

An actual photograph of three large men (total weight, 61 pounds) sitting on a sheet of 4-Ply Best-of-all Roofing, showing the great strength of this material. A sworn affidavit as to the genuineness of this photograph and the weight of the three men will be furnished on request.

FLINT SURFACED ASPHALT ROOFING

Heavier by 10 Pounds to the Roll Than Other Flint Surfaced Asphalt Roofing.

Our Flint Surfaced Asphalt Roofing is heavily surfaced on both sides with clean flint sand, adding much to its fire resisting qualities. Being flint sanded on the under side as well as on the top side makes it especially fire resisting, because flying embers or coals are not likely to set it on fire from the top, while the same coating of flint sand on the under side acts as a resistant against fire from the inside of the building. Flint Surfaced Asphalt Roofing is 32 inches wide and is put up in rolls containing 108 square feet with a covering surface of 100 square feet. It is guaranteed to be made from a long fiber roofing felt and saturated with an asphalt composition, then heavily coated with a layer of asphalt into which the flint sand is embedded. It is absolutely free from animal oil and is guaranteed not to melt or run in summer, nor crack or break in winter. Acknowledged to be the best fire resisting flint surfaced asphalt roofing on the market. Suitable for any roof with a pitch of 1½ inches per running foot or over.

This Is an Asphalt Roofing. There is positively no coal tar used in its manufacture. This fact alone helps to make it fire resisting and the waterproofing qualities of our coating give it a good heavy body, making it very strong and flexible. We guarantee our Flint Surfaced Asphalt Roofing to be one of the heaviest sanded asphalt roofings made. This naturally makes it strong and durable.

Please Compare the thickness, weight, strength and quality of materials used in our Flint Surfaced Asphalt Roofing with other makes of flint coated roofing and the result will be that you will order from us.

Made of the same high grades of roofing felt and asphalts that are used in our celebrated Best-of-all Roofing described on the opposite page.

If coated every three years with our Asphalt Roof Paint (see our Big Catalog or Paint Color Book), Flint Surfaced Asphalt Roofing will wear considerably longer than the term for which it is guaranteed.

Flint Surfaced Asphalt Roofing Requires No Coating or Painting.

3½-Ply Roofing. **Specified by architects for the higher class buildings,** such as residences, schoolhouses and factory buildings, and wherever a high class long wearing roofing is required. Guaranteed to last twelve years.

2½-Ply Roofing. **Used on residences, barns and higher class buildings,** such to last nine years.

1½-Ply Roofing. **Used on buildings of every description.** With good care it will last about seven years.

1-Ply Roofing. **Intended for use on temporary buildings, sheds, etc.** Will last about five years.

We furnish with every roll of our Flint Surfaced Asphalt Roofing plenty of large headed galvanized barbed roofing nails and sufficient cement, with all necessary directions for laying. Be sure to ask for 1¾-inch nails if you are going to lay the roofing over shingles, otherwise ⅞-inch nails will be sent. Long nails not furnished with 1 or 1½-ply roofing. We recommend the use of the heavier roofing over shingles.

Quicker delivery and lower freight charges are assured by shipping direct from our factories and warehouses near you. Large orders going to Eastern points will be shipped from warehouse in CINCINNATI, OHIO, ALBANY, N. Y., or PITTSBURGH, PENN. Orders to Southern points will be shipped from warehouse in ATLANTA, GA. Orders to Southwestern and Western points will be shipped from warehouse in KANSAS CITY, MO. Orders to Northwestern points will be shipped from warehouse in ST. PAUL, MINN. We also ship from CHICAGO factory.

If you live in the South, have your roofing shipped from Atlanta, Ga., and save extra freight charges. The difference in price represents only the lowest carload rate from our roofing factory to Atlanta.

SMELL IT.

Split the sample on the edge if you can, and in doing so notice the dense black saturation and smell it. Notice that there is no smell of tar. We never use a single drop of coal tar in this roofing. We use only the higher grades of asphalt.

THE FIRE TEST.

PREVENTS OTHER BUILDINGS FROM "GOING UP IN SMOKE."

Sauk City, Wis.

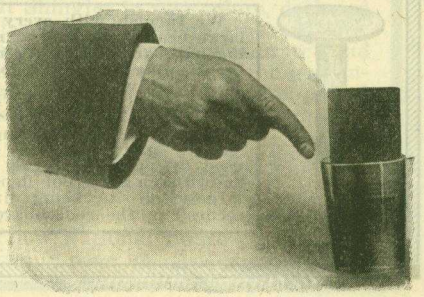
Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I cannot say how thankful and well satisfied I am with your Best-of-all Roofing. **It is certainly fireproof.** Lightning struck one of my barns on my farm, burned the barn, shed and hog house, but when it came to the corn crib, which was next in line and covered with your Best-of-all Roofing, we could check the fire, when otherwise it would have taken the rest of the buildings on the farm. The roofing on that corn crib was so brittle after the fire that it could be crumbled up like crackers, but during the fire there was no sign of its catching fire. Everybody that was there said if there had been shingles on that building it certainly would have burned. And another thing, I saved at least 50 cents on a square after deducting the freight charges, and the roofing is better than I could get of our dealer here. Yours truly,

CHAS. C. BECKER.

THE ACID TEST.

Take a glass and fill it half full of muriatic acid and soak the sample in same (don't use a tin cup, for the acid will eat the tin, or any iron or steel vessel), leave the sample there as long as you please and notice that the acid never harms the roofing. The roofing does not discolor the acid, showing that the acid does not dissolve the waterproofing. Makes no odor and does not soften the roofing or in any way affect it.



$3.50 PER ROLL OF 108 SQUARE FEET — SLATE SURFACED BURLAP ROOFING

Best Style Roofing for Use Over Old Shingles

A ROOFING OF THE FIRST QUALITY. NEEDS NO COATING. WATERPROOF, HAILPROOF AND FIRE RESISTING

WEIGHT, 90 POUNDS TO THE ROLL. NEEDS NO PAINT. NEVER LOSES COLOR. A ROOFING OF STERLING QUALITY.

Slate Surfaced Burlap Roofing Is Just What the Name Implies,

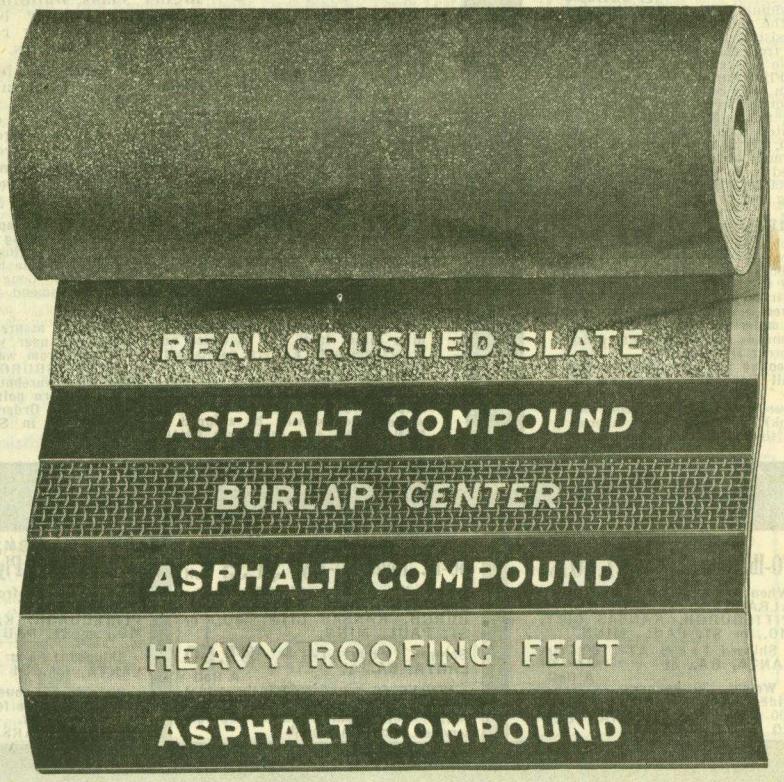
roofing made of roofing felt as a base, burlap, asphalt and slate surface. The roofing felt and burlap are thoroughly compounded with asphalt at a high temperature and formed into **one solid piece,** then heavily coated with a thick layer of asphalt compound and covered with genuine crushed slate, red or sea green in color.

An Ideal Roofing for Laying Over Wood Shingles,

because it is extra heavy and has a stiffness not found in other makes of roofing. The burlap gives added strength and equalizes contraction and expansion caused by sudden and extreme changes in temperature. We sell it in **one weight,** 90 pounds (one thickness). It is warmer in winter and cooler in summer than wood shingles, slate or steel.

Slate Surfaced Burlap Roofing Is Hailproof

because it is made with a strong burlap cloth insertion, making it sufficiently strong to withstand **sleet, hail, snow and the heaviest downpour of rain. It never needs coating or painting,** as the exposed surface is heavily covered with a thick layer of asphalt compound and **further protected with slate.** As a result it will wear fifteen years or more. While a trifle more expensive to commence with it is **cheapest in the end,** and when once laid your roofing troubles cease.



Be Sure to Ask for 1¾-inch Nails if This Roofing Is to Be Used Over Shingles.

Suitable for Any Roof.

It can be used on any kind or style of building, "from a mansion to a henhouse." It is being extensively laid on buildings used for stores, offices, factories and warehouses which are located in districts where flying embers are a menace to the average roofs, or in localities where steel roofs have been considered the only fire protection. Suitable for any roof with a pitch of 1½ inches to the foot or over, because it is made with a **2-inch border** free from slate, permitting a tightly cemented and waterproof seam.

Anyone Can Lay It.

No experience required. The only tools required are a common jackknife and a hammer.

Can Be Laid in One-Fourth the Time

it takes to lay wood shingles and at a total cost of less than one-half the cost of the most common grades of wood shingles.

When Used Over Shingles

be sure that there are no projecting nails or loose shingles. If laid on a new building, the building should be sheathed with dry, well seasoned lumber laid closely together.

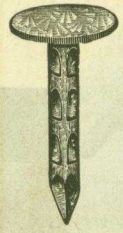
If You Are Having Trouble

with your old shingle roof do not attempt to patch it up so that it will last possibly another six months, but send in your order for a sufficient amount of **Slate Surfaced Burlap Roofing** to cover your roof right over the old shingles. If you do this it means that your roofing troubles are over for at least fifteen years. No painting or coating is necessary, either at the time you lay the roofing or after it is laid.

SEND FOR SAMPLES. THEY ARE FREE AND WILL BE MAILED ON REQUEST, POSTAGE PAID.

Furnished in Rolls Containing 108 Square Feet,

width, 32 inches; covering surface, 100 square feet. Price includes all necessary large headed galvanized nails and waterproof seam cement, with full directions for laying.



We furnish with every roll large headed galvanized roofing nails and plenty of cement for lapping seams or joints. Note that we furnish a galvanized nail with large head which costs much more than the old style wire roofing or shingle nails and tin caps used by many concerns. We know that a good roof depends largely on its being firmly secured to the roof boards.

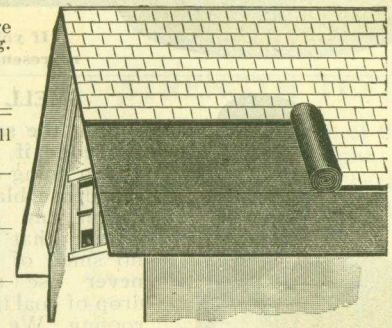
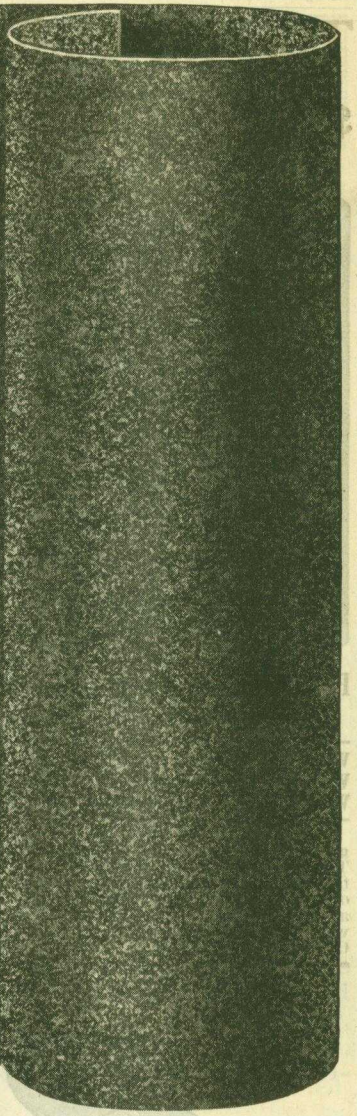
FOR ACTUAL COLORS OF SLATE SURFACED BURLAP ROOFING SEE COLORED INSERT, FACING PAGE 92.



BEAR HIDE ROOFING



Bear-Hide Asphalt Ready Roofing is STRONG, TOUGH AND DURABLE. It is made of high grade felt and asphalt, no tar or other low grade ingredients being used. It comes in standard weights, 35, 45 and 55 pounds to the roll, the same weights and thicknesses for which you have to pay considerably more elsewhere. Suitable for any roof with a pitch of 1½ inches or over per running foot.

We believe you will find this roofing is EQUAL IN EVERY WAY TO THE HIGHEST GRADE STANDARD ASPHALT ROOFINGS ON THE MARKET AND SUPERIOR TO MANY OF THEM. It lays easily, looks well on the roof and will last for years. However, as it lacks the extra heavy weight of our GUARANTEED BEST-OF-ALL ROOFING, we do not guarantee it to wear for any given number of years. Yet you can be absolutely assured that it will wear as long, if not longer, than any similar roofing you can purchase elsewhere for more money.

Bear-Hide Asphalt Ready Roofing has been adopted by us to prove to our customers that NO ONE ELSE CAN SELL AS GOOD QUALITY FOR THE SAME PRICE. It has been our aim in the manufacture of our different brands of guaranteed roofing to make them so good in every way, so thick, so heavy and so durable, that people everywhere would prefer them to the dangerous, unsightly and more expensive wood shingles. The great popularity of our GUARANTEED ROOFINGS has caused other manufacturers and dealers to duplicate on an inferior grade of goods our claims of quality. They have even gone so far as to copy our illustrations, our descriptions and our guarantee. Consequently, some people may be under the impression that they can get at a lower price elsewhere the same kind of roofing as we offer them. We have therefore decided to place on the market a still better grade of roofing than the standard kinds and SELL IT AT A LOWER PRICE THAN ANYONE ELSE. This is our reason for offering you Bear-Hide Asphalt Ready Roofing for $1.40 to $1.95 a roll. Note weights and shipping points below.

No. 48M41

35-lb. Rolls 1-Ply $1.40 Per Roll

Shipped from CHICAGO, ILL., or CINCINNATI, OHIO.

Weight, 35 pounds, 32 inches wide. 108 square feet. Will cover 100 square feet.

No. 48M43

55-lb. Rolls 3-Ply $1.95 Per Roll

Shipped from CHICAGO, ILL., or CINCINNATI, OHIO.

Weight, 55 pounds, 32 inches wide. 108 square feet. Will cover 100 square feet.

RED—STANDARD ASPHALT SHINGLES—GREEN

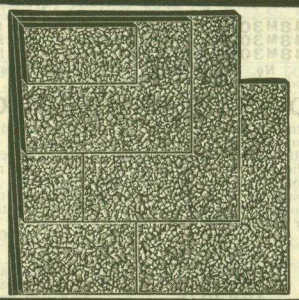
These are the standard Slate Surfaced Shingles generally sold at from $4.75 to $6.00 per square. Each shingle measures 8x12¾ inches and is cut straight at both ends. They will look well when first laid, but because they are 40 pounds per square lighter in weight than our guaranteed Oriental Shingles, they may curl at the butts unless extra nails are used. For the price we ask, you cannot buy better standard grade asphalt shingles anywhere than we offer you on this page. (For colors see insert facing page 92.) Weight, 200 pounds per square. **Shipped from factory in SOUTHERN OHIO only.**

PRICES
Standard Shingles.

No. 48M3351 Dark Red.

No. 48M3352 Sea Green.

$3.95 PER SQ.



We furnish Oriental Asphalt Shingles in two colors, dark red and sea green. They are surfaced with genuine crushed slate. The base is a good grade of roofing felt, thoroughly saturated and coated with high grade asphalt. If you are looking for guaranteed shingles, strong, stiff and durable, order our 240-pound Oriental Slate Surfaced Shingles, guaranteed for fifteen years.

Oriental Slate Surfaced Shingles.

No. 48M3048 Dark Red. Price, per square..... **$4.95**
No. 48M3049 Sea Green. Price, per square..... **4.95**

For Slate Surfaced Shingles approved by Underwriters' Laboratories, Inc., under direction National Board of Fire Underwriters, see colored insert facing page 92.

The So Called *Rubber Roofing*—*Flint Sand Coated Roofing*

$1.00 = FOR ONE-PLY We Offer Under the Trade Name of *Composition Rubber Roofing*

COMPOSITION ROOFING STANDARD C STAND ON END
COMPOSITION ROOFING HEAVY C STAND ON END
COMPOSITION ROOFING EXTRA HEAVY C STAND ON END

For Our Most Durable Smooth Finished Roofing See Best-of-all Roofing on Page 102.

WE GUARANTEE THESE PRICES TO BE FAR BELOW WHAT OTHERS CHARGE FOR THE VERY SAME ROOFING WHICH THEY SELL UNDER VARIOUS TRADE NAMES.

Why not buy Oriental Slate Surfaced, Fire-Chief Shingle Roll, Best-of-all or Flint Surfaced Asphalt Roofing? The above named roofings will wear many years longer than Composition Roofing or other makes and the price of these high grade fully guaranteed roofings is only a little higher than the cheap grades. However, if you want a cheap roofing to last a short time, then buy our Composition Roofing.

The "rubber" referred to in the description of this roofing is merely the trade name for a mineral substance that looks like rubber and feels like rubber.

Composition Roofing is sold by us for the purpose of meeting the demand of those who want ready roofing because it i low in price and who are not so particular about its wearing qualities. While this roofing is widely advertised by manu facturers under various names to wear from five to ten years, we hesitate to recommend or guarantee it for this period becaus it contains low grade asphalts and low grade oil which, according to best authorities, lack such wearing qualities as are foun in our Best-of-all Roofing described on page 102, Flint Surfaced Asphalt Roofing, shown on page 103, Oriental Slate Surface Roofing, shown on colored insert opposite page 92, and Fire-Chief Shingle Roll Roofing, shown on page 99.

OUR POLICY. Roofing which is recommended to wear a given time as printed in connection with our prices is backe by our binding guarantee **if it does not last the full length of time we claim it should wear. WE CAN MAKE NO CLAIM AS TO THE LENGTH OF TIME COMPOSITION ROOFING WILL WEAR,** but believe that it is a remarkably goo bargain at the prices we quote here. We would, however, advise you to be careful in selecting your roofing, or you may bu this very same make of roofing elsewhere and pay double our prices for it. Composition Roofing is made of standard felt, sa urated with an asphaltic composition and is finished on one side with a smooth mineral rubber coating and on the other sid coated with flint sand. This roofing may be used with either side up, according to the wishes of the purchaser. Suitable fo any roof having a pitch or rise of 1½ inches or over per running foot.

Composition Roofing is shipped direct from CHICAGO factory or from CINCINNATI, OHIO. Composition Roofing i made 32 inches wide and is put up in rolls containing 108 square feet, or enough material to cover a square of 100 square fee furnished complete with nails and cement inside the rolls.

DUCK BRAND ROOFING

While our Duck Brand Roofing is a high quality two and three-ply prepared tarred felt roofing, every ounce of which has waterproof qualities, we recommend Flint Surfaced and Best-of-all Roofing (see pages 102 and 103) in preference to it. Even our Composition Roofing shown above will look better, last longer and can be laid with less cost. With Composition Roofing and our other asphalt roofings we furnish **WITHOUT EXTRA CHARGE** nails and lap cement. Asphalt roofings are coated by machinery in the factory and **require no extra coating or painting** after laying, whereas Duck Brand Roofing requires for each roll about 2 gallons of roof coating, 1 pound of tin caps and 1 pound of roofing nails. These extras add about 48 cents to the cost of each roll, making the 2-Ply $1.53 per roll and the 3-Ply $2.03 per roll, whereas Composition Roofing is furnished complete with nails and cement for $1.20 for 2-Ply and $1.40 for 3-Ply. Smooth finished on one side, sand finished on the other. Nevertheless, Duck Brand Roofing is good value for the money and does not contain clay or other cheap substances which are found in other similar roofing. Rolls contain 108 square feet to the roll; nails and caps extra (see prices to the right). **Shipped from CHICAGO.**

Catalog No.	Grade	Thickness	Weight	Price, per Roll
48M3102	Medium	Two-Ply	40 pounds	$1.05
48M3103	Heavy	Three-Ply	60 pounds	1.55

We especially recommend our Best-of-all, Oriental Slate Surfaced, Fire-Chief Shingle Roll or Flint Surfaced Asphalt Felt Roofing to those who desire a roofing which will outlast wood shingles.

BARBED ROOFING NAILS AND TIN CAPS.

Shipped from CHICAGO only.

No. 48M3029 Tin Roofing Caps. (One pound required for each roll or square of roofing or siding.) Price, per pound.....4c

DUCK BRAND ROOF COATING

for coating tarred felt roofing. Distilled from low heat, straight run American coal tar, and is more durable and far superior to coatings made from the common kind of tar. The coating is the life of any tarred felt roof, keeps it soft and pliable, avoiding cracking in extremely cold weather and protecting the felt from the heat of the sun and the wear of storms and rain. Do not try to economize by not putting two coats of Duck Brand Roof Coating on your tarred felt roof. Do not wait until your roof leaks or is in bad shape before renewing the coating. Apply a coat of Duck Brand Roof Coating every two or three years. Requires 2 gallons to a square. **Shipped from CHICAGO or from factory in SOUTHERN OHIO.**

PRICES OF DUCK BRAND ROOF COATING.

Catalog No.	Size	Weight	Price, per Package.
48M3035	5-gallon can	50 pounds	$0.95
48M3035	10-gallon can	100 pounds	1.65

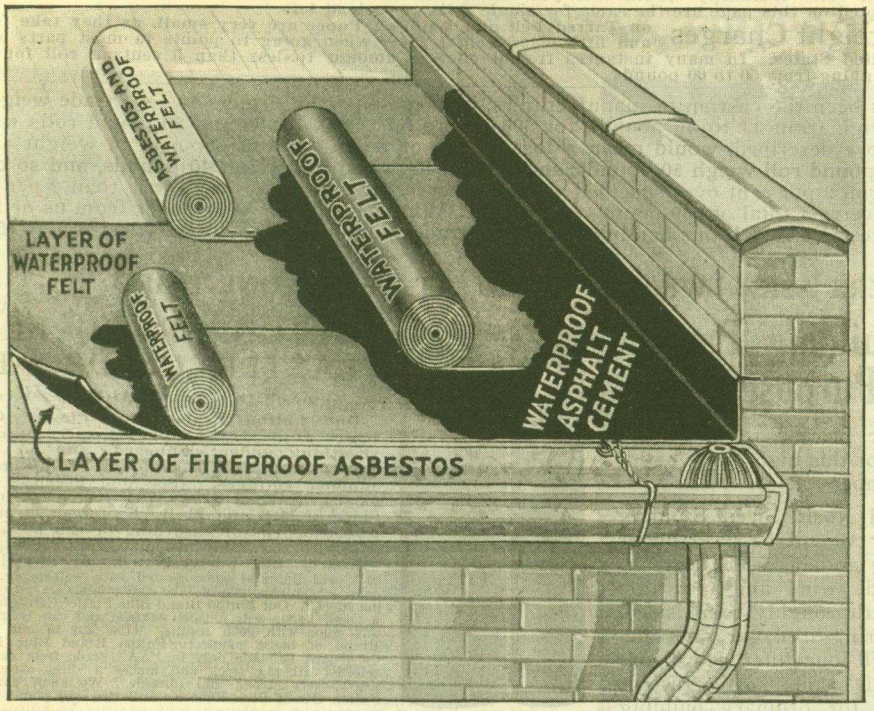
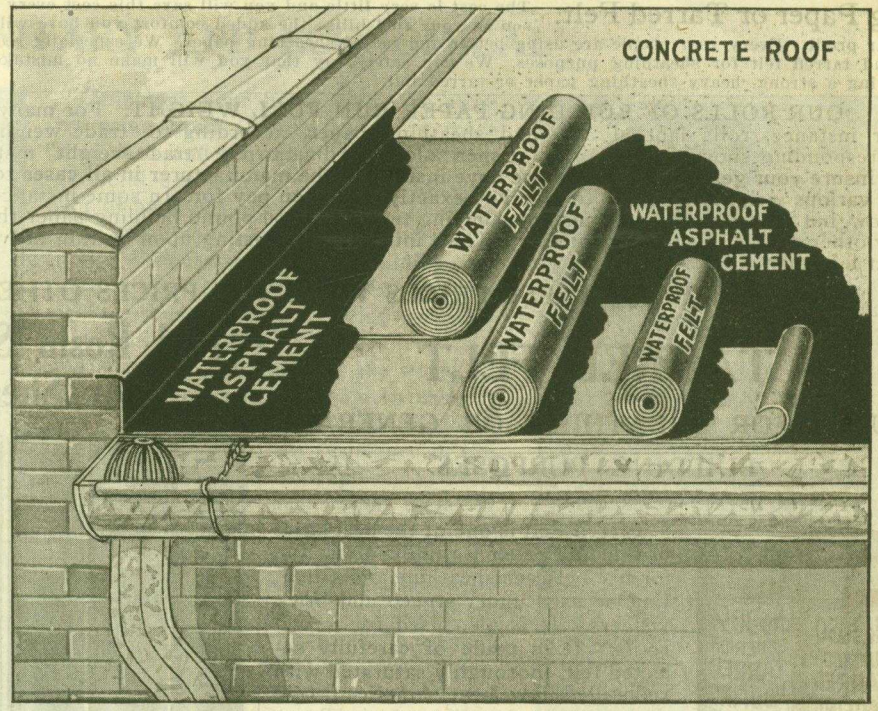
GUARANTEED ROOFING FOR FLAT ROOFS



FOR WOOD ROOFS.



FOR CONCRETE ROOFS.

' IS ESPECIALLY INTENDED FOR FLAT ROOFS or roofs with **actically no pitch or fall,** such as roofs of store buildings, factories, office ildings, apartment buildings, etc., for which ordinary prepared roofing is t practical. It has been in use on large public buildings, factories, etc., r a great many years and is giving perfect satisfaction.

E GUARANTEE THIS ROOFING to last ten years, provided it is put on cording to the directions furnished with each order. Other roofings put in the same manner are usually guaranteed for only five years, but we guarantee our roofing for ten years because it has been **fully tested for waterproof qualities and lasting service.**

WE FURNISH ENOUGH MATERIAL for each square of this roofing to **GIVE YOU THREE THICKNESSES,** as you will note in the illustrations above. Thus you will have an absolutely watertight roof. It needs no gravel because there is no tar whatever in this roofing. The asphalt cement coating, which comes in a solid state and must be melted, will not run in the sun, neither will it crack in cold weather. **Shipped direct from factory in SOUTHERN OHIO.**

THIS ROOFING IS FURNISHED IN ROLLS AND THE CEMENT IN BARRELS.

ice of Roofing for Use on Flat Roofs Over Wood

at. No.	Will Cover	Price Includes	Weight, per Square	Price, per Square	Guaranteed to Wear
M3211	100 Square Feet	Felt and Cement. 3 Thicknesses	112 lbs.	$3.70	10 Years

NOTE THE ASBESTOS LINING next to the roof boards in the illustration of the wood roof above. This asbestos lining prevents fire from breaking through the roof from either the inside or outside. Remember, this roofing is intended for flat roofs only. For all other kinds of roofs see Oriental Slate Surfaced Roofing, New-Style Slate Surfaced Roofing, Fire-Chief Shingle Roll Roofing, Flint Surfaced Roofing and Best-of-all Smooth Finished Roofing on the preceding pages.

TARRED FELT AND BUILDING PAPER

When You Build Use Plenty of Good Sheathing Paper or Tarred Felt. The cost is very little and you will save this cost every season in your fuel bills; the added comfort you have will be clear profit. Every year people are using better and better sheathing paper. We especially recommend tarred felt for sheathing purposes. We can safely say that you will make no mistake in buying a strong, heavy sheathing paper or tarred felt.

We Do Not Cut Rolls of Tarred Felt or Building Paper, as we quote the factory price. Half rolls ordinarily would cost you more than the price we ask for full rolls. The pr quoted on this page are the same for single rolls or carload lots.

Freight Charges on Tarred Felt and Building Paper are very small, as they take fo and fifth class freight rates when going to points in most parts of United States. In many instances freight charges amount to less than 5 cents a roll for weighing from 50 to 60 pounds.

OUR ROLLS OF BUILDING PAPER RUN FULL WEIGHT. For many years it has been the custom of manufacturers, jobbers and retail dealers to sell "trade weigh For instance, rolls labeled 50-pound sheathing paper, according to "trade weight" would weigh from 44 to 46 pounds for 500 square feet; also 40, 30 and 20-pound rolls wit corresponding shortage of weight. Paper sold according to the "trade weight" methods, as above described, **would mean a loss to you of from** 10 to 15 per cent in weight al **To insure your getting full weight we have instructed the manufacturer in all cases to make a 50-pound roll weigh 50 pounds, and make a 40-pound roll weigh 40 pounds, and so o the various weights, in order to give you exactly what you pay for.** In some instances our rolls run 2 per cent over specified weight, whereas in other cases not more than 2 per c below, but we guarantee to a customer buying ten rolls of 50-pound building paper that he will receive a total of 500 pounds **full weight.** Whether you buy your paper from us or f any other source of supply, protect your own interests by insisting upon getting full weight. If we were to sell our building paper at "trade weights" we could sell it to you at 15 cent less than we do.

COMPARE THESE PRICES WITH THE PRICES OTHER DEALERS ASK. WE SAVE YOU AT LEAST ONE-THIRD.

TARRED FELT

USED FOR SHEATHING OR GENERAL BUILDING PURPOSES.

Tarred Felt is one of the best kinds of building paper for lining floors and for use between sheathing and siding. Can be used under stucco and brick veneers. It is also used for gravel roofs. **It is made of carefully selected felt, thoroughly saturated with redistilled low heat American coal tar.**

This Felt is used extensively for roofing sheds and temporary buildings. We recommend No. 48M3050 Tarred Felt for all first class jobs. It makes an excellent deadening felt and should be used under all floors where a good job is wanted because it is thickest.

No. 48M3054 TARRED FELT. This grade of tarred felt is also used for gravel roofing where several layers are specified. It is lighter weight (not so thick), and where a medium grade of work is required a No. 48M3054 Tarred Felt will be found very satisfactory.

No. 48M3055 TARRED FELT. This grade of felt is made with the same care as the two heavier grades, but is lighter in weight and much thinner.

PRICES ON TARRED FELT.

Shipped from our CHICAGO store or from factory in SOUTHERN OHIO.

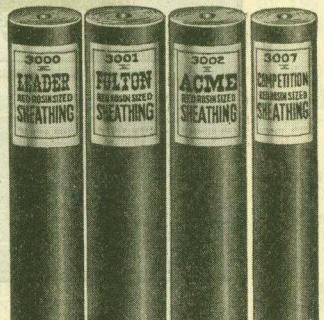
Red Rosin Sized Building Paper for Sheathing Purposes



Our prices are extremely low for this high grade building paper.

Red Rosin Sized Building Paper should be used under siding and between floors to exclude wind and moisture. It is thoroughly rosin sized, rendering it damp resisting. We sell four different weights of this paper. We recommend for ordinary building purposes our **Leader Brand,** as it is of sufficient thickness to give entire satisfaction.

Our Fulton Brand is made with exactly the same stock, but is considerably heavier than our Leader Brand. We believe there is no better or heavier Red Rosin Sized Paper made.

Our Acme Brand is the same quality as our Leader except that it is a lighter weight.

Our Competition Brand is a fair grade, similar to the kind usually sold. It is light in weight, as it runs 20 pounds to the roll.

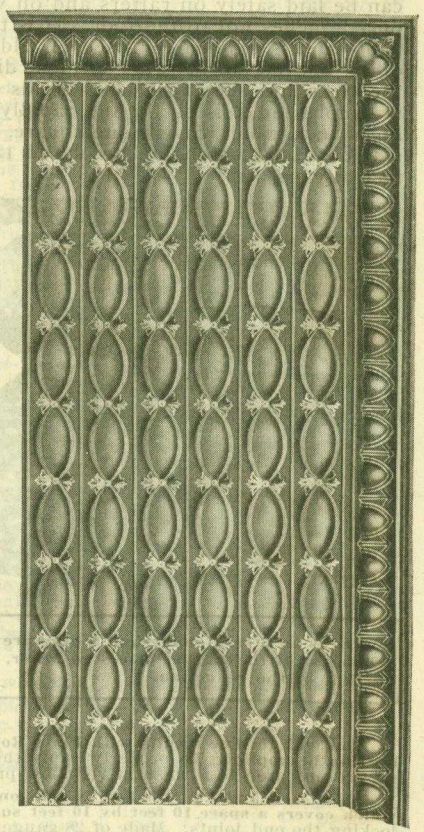
No. 48M96191 Side Wall, furnished in pieces 24 inches wide by 48 inches long. Price, per piece.....**30c**

Ornament your home, office or store by using Steel Ceiling; costs no more than lath and plaster. The advantages of metal decorations as applied to interior of buildings are numerous. They are just as suitable for old buildings as for new. When used in new buildings no plaster need be applied to the walls or ceiling, thus effecting a saving in material and labor. The weight of metal ceiling is trifling, consequently the strain on the joists is much reduced. In case of fire much protection is afforded by metal coverings through their resistance to the spread of flames. It is very easy to keep ceilings and walls clean when metal is used as a covering and they are in no way liable to damage through leaks in the roof. A leak will fill plaster with water and weaken it, to say nothing of the large unsightly blotch on the ceiling. Metal ceilings are nailed on and they are not affected by shrinking of timbers or settling of the building. Their durability makes them the most economical ceiling in existence.

If you intend building a store, hall or any other building of this kind, let us send you our Metal Ceiling Catalog, beautifully illustrated with full page half-tone reproductions of our steel ceilings. We handle a complete line of ceilings in Renaissance, Louis XIV, Empire, Colonial and other designs. In the upper left hand corner of this page we have a small illustration of one of our French Renaissance Ceiling Designs. While it will give you some idea of our ceilings, it does not begin to do justice to their beauty and workmanship. Steel ceilings such as we handle are now being used extensively for the finest residences as well as public buildings. Before you do any building be sure to write and ask for our Metal Ceiling Catalog which shows many beautiful designs. Sent free on request.



HIGH GRADE STEEL CEILING AT AN EXTREMELY LOW PRICE. ONLY $3.00 PER 100 SQUARE FEET.

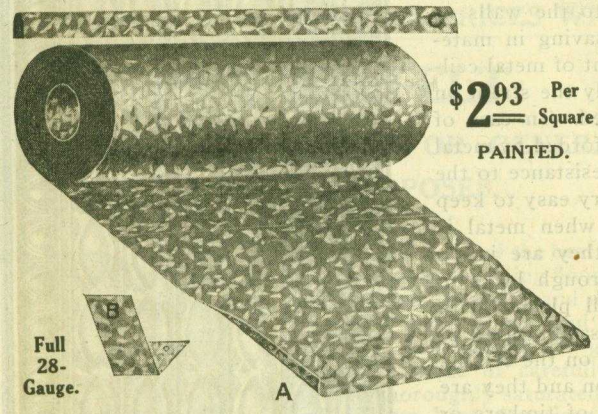
ROLL AND CAP ROOFING

QUALITY GUARANTEED

Our Roll and Cap Roofing is used on all kinds of buildings and with entire satisfaction. It is easy to put on, the only tools necessary being a pair of edging tongs, a pair of squeezing tongs, a wooden mallet or hammer, a pair of tinners' snips and a jointer. It can be laid safely on rafters and on very flat roofs; in fact, can be used on a roof with only 2 inches fall to the foot. It is therefore especially adapted for either flat or steep roofs and is extensively used on old roofs, where it may be placed over the shingles or on uneven surfaces. The most distinctive feature of this roofing is the locking of the cleat into the caps, which holds it firmly to the standing seam. The construction is simple and it is easily and rapidly laid. A roll is 26¼ inches wide and contains 50 lineal feet, which covers one square, or 100 square feet. With each roll we furnish 50 side cleats which should be placed 12 or 14 inches apart, and we also furnish 51 lineal feet of caps.



$2.93 Per Square
PAINTED.

Our Roll and Cap Roofing is easy to apply. To lay this roofing, first use your edging tongs to turn up the edge, which will form a standing seam 1 inch high on each side of the roll, shown by figure A. Commence at the left hand bottom side of the roof, lay the first sheet on the left hand edge of the roof, running from top to bottom. After you have turned up the standing seam on each side, proceed to nail on the cleats, which are used the same as shown in the illustration on this page of our Pressed Standing Seam Roofing; then lay up the next sheet with the standing seams formed and flatten the cleat over two by two, two sheets together; now place the cap over the seam and use the squeezing tongs or a hammer or mallet for locking the standing seam.

Prices on Steel Roofing and Siding are subject to market changes. If the market prices go lower, customers get the benefit of the reduction.

You will get fine results with Plain Roll and Cap Roofing for any kind of work where steel roofing can be applied. To properly apply this roofing you will need the tools mentioned above, which we are prepared to furnish at very low prices. (See prices at bottom of this page.)

Plain Roll and Cap Roofing is sold only in full rolls containing one square, or 100 square feet, which covers a space 10 feet by 10 feet square. This allows for forming the standing seam and for locking the end joints. Made of 28-gauge steel, either painted or galvanized on both sides. We do not cut nor sell a part of a roll.

Roll and Cap Roofing is shipped direct from the steel mills in CENTRAL OHIO.

EDGING TONGS.

Edging Tongs are used for turning 1-inch edge or standing seam on roll cap roofing. This tool has two parallel round jaws which will permit the edge of the sheet of steel to enter the right depth, producing a 1-inch standing seam. This tool has a wooden handle and will do the work for which it is intended. **Can be shipped either from our CHICAGO store or from steel mills in CENTRAL OHIO with steel roofing.**

No. 48M3090 **Edging Tongs.** Weight, 3¼ pounds. Price.....**40c**

SQUEEZING TONGS.

Squeezing Tongs are used for pressing or squeezing the standing seam on either roll cap or pressed standing seam or double cap roofing. The heavy cast iron jaws of this tool are about 14 inches long, and it is sufficiently strong to press the cap tightly together, making a finished seam, and it will do the work of a $3.00 tool. **Can be shipped either from our CHICAGO store or from steel mills in CENTRAL OHIO with steel roofing.**

No. 48M3093 **Squeezing Tongs.** Weight, 7½ pounds. Price.....**45c**

PRESSED STANDING SEAM ROOFING

Pressed Standing Seam or Double Cap Roofing is made from the same high grade steel as our other roofing and is very simple in its application and effective in its construction. It is a universal roofing, used on all kinds of buildings. Its distinctive feature is the outside cleat, which has many points to recommend it, chief among which is the rapidity with which it can be laid on the roof and its adaptability to any kind of shape of roofing, it being easy to lay on porches, etc. This roofing is easily cut and fitted with a pair of snips.

The sheets are formed with a cap on each side, which makes a stronger and better roof than when separate caps are used, such as are sold by quite a number of other steel mills and dealers. Our Pressed Standing Seam Roofing can be applied by any ordinary laborer, and the only tools required are a pair of squeezing tongs, a jointer, a pair of snips and a mallet. It is stronger, neater, more durable and less liable to need repairs than a tin roof.

FULL 28-GAUGE

Our Pressed Standing Seam Roofing is firmly held to the sheathing by the use of outside cleats which are nailed at intervals of 12 or 14 inches. This style of fastening is considered the best for metal roofing. The cleats are nailed on the sheathing, making a roof strong and secure against any windstorm less than a cyclone. Remember, in using this style of roofing with these cleats, that we make no hole in sheets, as is necessary when laying corrugated and V crimp roofing. This is one of the strong features of Standing Seam Roofing.

Cover your buildings with sheets of such lengths as will cut to the best advantage without loss to you. This roofing comes in six different lengths of sheets, ranging from 5 to 10 feet, inclusive, and lays 24 inches from center to center. We furnish the necessary cleats to lay the roofing.

This roofing can be used over shingles or nailed directly to the rafters. By covering an old shingle roof with steel it will make the building cooler in summer and warmer in winter. **Shipped direct from the steel mills in CENTRAL OHIO.**

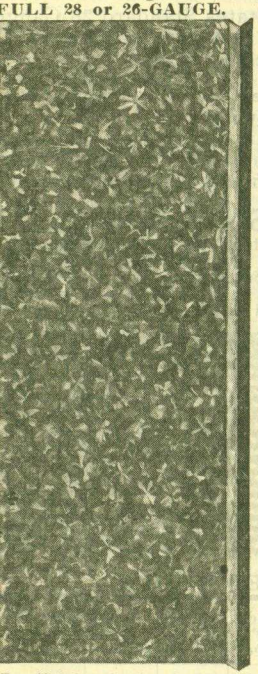
EXTRA HEAVY Two and Three-V Crimp Steel Roofing. U. S. STANDARD WEIGHTS

Crimp Roofing Is in Many Respects the

est of all the various styles of metal roofing. It may be laid over sheathing, shingles, or can be nailed direct to the ters, which should be placed 24 inches from center to center, d can be used on any roof having 2 inches or more fall to the t. The ends of the sheets can either be lapped 3 inches or re or can be put together with lock joint as desired. We ommend that you use the lap joint at the end of the sheets tead of lock joint, as it will positively prevent the rain, snow or nd from blowing in under the sheet.

FULL 28 or 26-GAUGE.



It Is Easily Laid

and has many advantages over other kinds of steel roofing. It is especially adapted for factories, barns, sheds or temporary buildings and, as it requires no soldering and folding or hammering of seams or joints, anyone who has ordinary mechanical ability can put it on. It has a neat appearance and is the most economical and the lowest priced style or kind of steel roofing made.

We Illustrate at the Left

a sheet of Two-V Crimp Steel Roofing which has a covering width of 24 inches after lapping one crimp over the other. This roofing comes in different lengths ranging from 5 to 10 feet inclusive. In laying V Crimp Roofing the ends of the sheets should be lapped not less than 3 inches when used on roofs having a fall of not less than 2 inches to the foot. The two-V crimp sheet appears to be the more popular because it is less work to lay it on the roof, as it can be put directly on the rafters. The wood V strips should be nailed on the top surface of the rafter; you should put a crosspiece between the rafters wherever there is a joint or lap. The roofing should be well coated with paint under the lap and nailed down to the crosshead between the rafters. We illustrate above the manner in which V Crimp Roofing should be folded and nailed to the eaves of the roof.

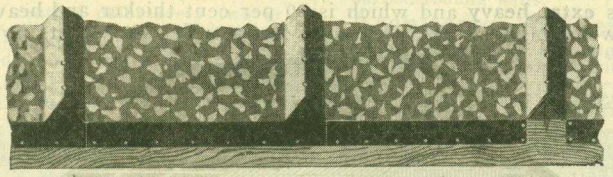
Two-V Crimp Roofing Is Shipped Direct From the Steel Mills in CENTRAL OHIO.

PRICES ON TWO-V CRIMP STEEL ROOFING.

State Number of Sheets in ALL Orders.

Made in HEAVY GRADE (U. S. Standard 28-Gauge Steel) and EXTRA HEAVY GRADE (U. S. Standard 26-Gauge Steel).

GOOD ADVICE—Use our extra heavy grade 26-gauge steel. It is 20 per cent thicker and heavier than the 28-gauge steel. Costs only a trifle more and lasts twice as long.



Above illustration shows the manner or method of nailing either Two or Three-V Crimp Roofing along the eaves of the roof. With a pair of snips and a hammer a good tight joint can be made that will look well and prevent rain or snow from getting under the roof. The ridge of the roof can be finished very easily by lapping the end of one sheet over the ridge, hammering it down and nailing it, or you can allow the roofing to come up to the ridge on each side, then hammer down the V crimps for 3 or 4 inches on the end and use either our angle ridge cap or roll ridge cap, as shown on page 115.

V Crimp Roofing requires a triangular wood strip, size ⅞ inch, on each side, to be used under the crimps. These wood V strips are shipped from the steel mills with the steel roofing and sold in any quantity. The Two-V Crimp Roofing requires 50 lineal feet for each square (100 square feet, or a space 10 feet square), while Three-V Crimp Roofing requires 100 lineal feet for each square. These wood V strips should be nailed on the rafters or sheathing for each crimp. **Shipped with roofing direct from the steel mills in CENTRAL OHIO.**

BARBED ROOFING NAILS.

Catalog No.	Kind of Nails	Length	Price, Per Lb.	Per 100-Lb. Keg
48M3028	Common Barbed	⅞ in.	4c	$3.90
48M3088	Common Barbed	1¼ in.	4c	3.90

When ordering be sure to specify length of sheets wanted.

Prices on Steel Roofing and Siding are subject to market changes. If the market prices go lower, customers get the benefit of the reduction.

Save Money on Your Building

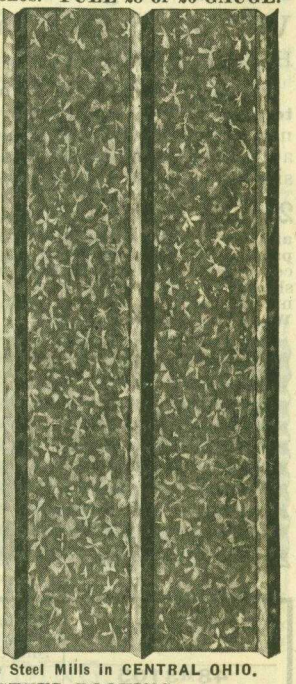
by laying the roofing direct to the rafters without sheathing. Set the rafters 24 inches from center to center and nail the wood V strips on the top surface of the rafters. Place crosspieces between the rafters to support and nail the end of the top sheet; begin at the lower left hand corner of the roof and lay the sheets from eaves to the ridge, allowing at least 3 inches for the end laps and one crimp for the side laps. Use 1¾-inch barbed roofing nails, which should be driven into the top of the crimp and through the V strip about every 8 or 10 inches. At the end laps use nails every 4 or 5 inches. **FULL 28 or 26-GAUGE.**

We Illustrate at the Right

a sheet of Three-V Crimp Steel Roofing which has a covering width of 24 inches from center to center of two outside crimps. The center crimp adds much to the strength of the sheet, as it stiffens the iron and prevents the sheets from rattling. **Three-V Crimp Roofing can** be laid directly on the rafters by placing them 24 inches from center to center, but, in order to obtain the full value and strength of these sheets, they would perhaps better serve you to lay them on sheathing or over old shingles or on a smooth surface where you can place a wood V strip to support the center crimp. In putting Three-V Crimp Roofing on a new roof it is only necessary to place sheathing boards at intervals of, say, every 2 feet, this being close enough to allow the V strips to properly support and strengthen the center of the sheets.

V Crimp Steel Is Used for Siding

on barns, sheds and outbuildings. The three-V can be more securely fastened to the walls of the building than the two-V, can be painted any color and with ordinary care will last for many years. Two inches end lap is sufficient when using V crimp steel for siding.



Three-V Crimp Roofing Is Shipped Direct From the Steel Mills in CENTRAL OHIO.

PRICES ON THREE-V CRIMP STEEL ROOFING.

The above prices are for roofing only and do not include strips or nails. Prices on nails and strips shown above.

It requires 100 lineal feet of wood V strips and 2 pounds of barbed roofing nails for each square of the Three-V Crimp Roofing.

IMPORTANT—V Crimp Roofing is sold as being 24 inches wide and has a covering width of full 24 inches when laid; therefore, you do not have to allow extra for side laps, but be sure to allow sufficient for end laps when ordering.

QUALITY GUARANTEED

EXTRA HEAVY Pressed Corrugated Steel—U. S. STANDARD WEIGHTS

Made in HEAVY GRADE (U. S. Standard 28-Gauge) and EXTRA HEAVY GRADE (U. S. Standard 26-Gauge).

Corrugated Steel Is an Excellent Material for roofing, ceiling, siding, awnings, etc. It is especially desirable for grain elevators, mills, barns and fireproof building of all kinds.

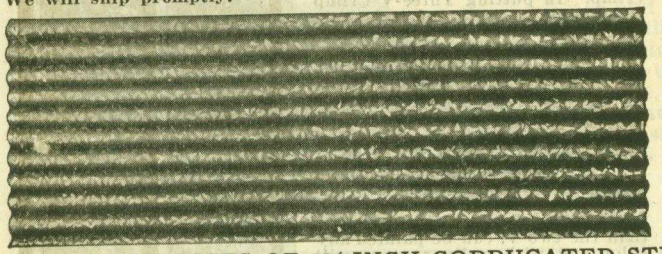
Cheap and Easy to Lay. It requires only a hammer and a pair of tinners' snips to lay corrugated steel either on a roof or side of a building, and for this reason it i especially desirable where a large quantity is used. In putting on corrugated sheet steel the nails should always be driven through the crow or the highest point of the corrugation. Do not hammer the nails down hard enough to batter or flatten the sheet.

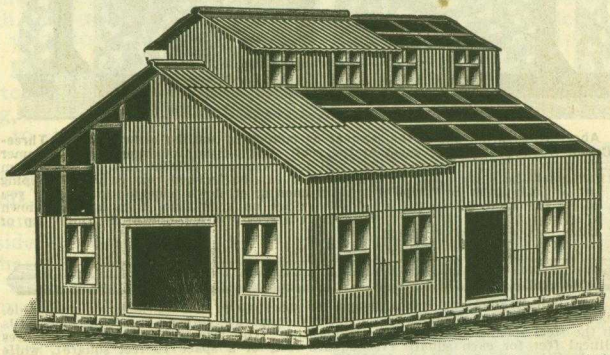
Extra Strong on Account of Corrugations. By making sheet steel in this corrugated form it gives the sheet great strength and rigidity.

We Furnish Two Thicknesses: United States Standard 28-Gauge, which is known the country over as standard weight and thickness, and United States Standard 26-Gauge which we describe as **extra heavy** and which is 20 per cent thicker and heavier than the standard 28-gauge. We recommend the EXTRA HEAVY GRADE, or 26-gauge, in preference to the standard weight (28-gauge), as it costs but a trifle more, costs no more to lay and gives nearly double the wear.

When ordering 2½-inch corrugated steel roofing be sure to order 108⅓ square feet to cover one square. This does not include end laps. Allow from 4 to 6 inches for end laps, according to the pitch or slope of your roof. When used as siding, a 2-inch end lap is sufficient.

2½-Inch Corrugated Steel Roofing comes in sheets 26 inches wide and has a covering width of but 24 inches. It is furnished either painted or galvanized. Our painted sheets receive a good heavy coat of dry red mineral paint mixed in oil, and the galvanized sheets are well galvanized on both sides with high grade galvanizing material. **Shipped from the steel mills in CENTRAL OHIO. We will ship promptly.**





Above illustration shows a factory building partially covered with corrugated sheet steel. You will note that the roof and the sides are being covered with this material by nailing it direct to the studding and rafters. There is no sheathing used on either the roof or sides of the building. We recommend the use of tarred roofing felt on all roofs covered with sheet steel. This tarred felt should be immediately under the steel roofing. It adds to the life of the steel.

State Number of Sheets on All Orders

Be sure to order 104 1/6 square feet of 1¼-inch corrugated steel roofing to cover one square. This does not include end laps. End laps for corrugated roofing should b from 4 to 6 inches, according to the pitch or slope of you roof. When used as siding a 2-inch end lap is sufficient.

Our 1¼-Inch Corrugated Sheet Steel comes i sheets inches wide, but has a covering width of only 24 inches. It **furnished either painted or galvanized.** Our painted sheets receiv a good heavy coat of dry red mineral paint mixed in oil, while th galvanized sheets are thoroughly well galvanized; 1¼-inch corru gated sheets are **shipped from the steel mills in CENTRAL OHI**

Steel Siding—Pressed Brick, Stone and Weatherboard

over Your Outbuildings With a Fireproof Material and at the same time have them **pear modern and up to date with some of our pressed brick or stone steel siding** which is made om high grade soft or mild steel that enables the sheet to be stamped so as to form a good itation of the finest Philadelphia or Milwaukee pressed brick or rock face brick; also a splendid itation of rock face stone which has been dressed into the proper size to show up best.

heet Steel Siding Costs Very Little to Put Up because it can be applied by any mechanic, is easily iled either on to the sheathing, weatherboarding or directly onto the studding, which should be ced 16 inches from center to center.

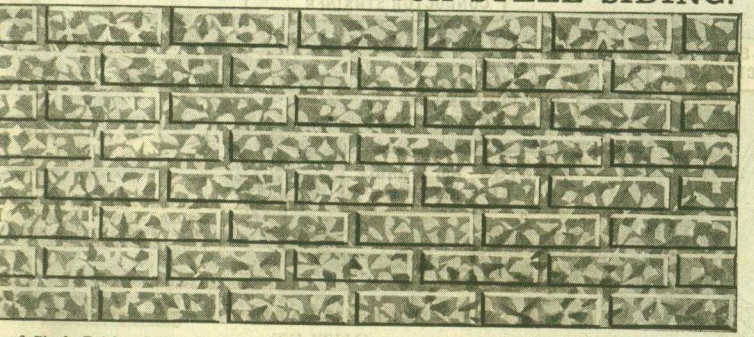
heet Steel Siding Will Last for Years if given a coat of paint every two or three years. We furnish this brick siding d weatherboarding in both painted and galvanized sheets and recommend the use of galvanized eets on permanent buildings. Our galvanized sheets are well coated in a thoroughly up to date galvanizing plant and are given a heavy coat of spelter, which preserves the sheets from rusting, so that they will last for years.

Painted Sheet Steel Siding is well painted with an oil paint made from dry mineral paint mixed in pure linseed oil, and the sheets are well coated on both sides.

The Best Nails to Use with sheet steel siding are a ⅞-inch barbed roofing nail or a four-penny common wire nail, either of which may be readily driven through the grooves in the sheet without the use of a punch. Always use a nail set to drive nails home. It requires about ¾ pound of these nails to a square of siding. See page 106 for barbed roofing nails.

Architects, Builders and Contractors will readily see the advantage of using rock face brick and stone steel siding for siding purposes on dwellings, schoolhouses, business blocks, factories, etc., in preference to the old style corrugated, beaded and other metal sidings.

PRESSED BRICK STEEL SIDING.



32c PER SHEET PAINTED OR 63c PER SHEET GALVANIZED GUARANTEED FULL 28-GAUGE.

e of Single Brick, 2⅝x8¼ inches. Sheets, 28x60 inches. Weight, per square, painted, 64 pounds; galvanized, 78 pounds. **Pressed Brick Steel Siding can be put on the building by any workman so that it will lay perfectly smooth.** The ets should be painted a red brick color and striped for the mortar lines, which should be done after it is put on the ding. The paint covers up the nail holes and a short distance away the building cannot be distinguished from a brick This material costs no more than the best wood siding and less than one-fourth the ent price of brick. Sold only in full sheets painted a maroon red or galvanized as quoted w. A square consists of a little more than 8⅓ sheets. **Pressed Brick Steel Siding is pped direct from the steel mills in CENTRAL OHIO.**

PRICE, PER SQUARE
Painted $2.74
Galvanized 5.38

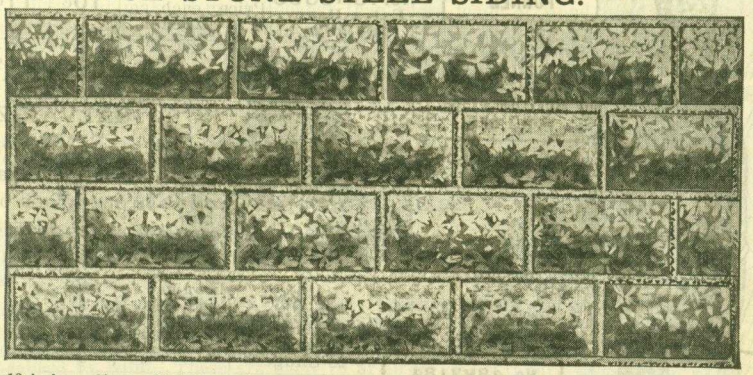
ROCK FACE STONE STEEL SIDING.

34c PER SHEET PAINTED OR 65c PER SHEET ALVANIZED ARANTEED FULL 28-GAUGE.



Size of Single Stone, 7x12 inches. Sheets, 28x60 inches. Weight, per square, painted, 64 pounds; galvanized, 78 pounds. **This is something comparatively new in sheet metal siding.** It very closely imitates rock face stone and makes one of most attractive and handsome sheet metal coverings so far produced or offered the building trade.

It is unquestionably an elegant facing for store fronts and cannot help take the place of the old style galvanized iron fronts, because it is per, makes a handsomer front and is more easily applied. A square sts of a little more than 8⅓ sheets. **Rock Face Stone Steel Siding is ed direct from the steel mills in CENTRAL OHIO.**

PRICE, PER SQUARE
Painted $2.87
Galvanized 5.50

No. 48M3142 **Rock Face Stone Steel Siding,** painted drab color. Price, per sheet.....34c
No. 48M3143 **Rock Face Stone Steel Siding,** galvanized. Price, per sheet.....65c

NOTE—Prices on Steel Roofing and Siding are subject to market changes. If the market prices go lower, customers will get the benefit of the reduction; if higher we will advance only enough to cover part of the increased cost to us.

ROCK FACE BRICK STEEL SIDING.

34c PER SHEET PAINTED OR 65c PER SHEET GALVANIZED GUARANTEED FULL 28-GAUGE.

Size of Single Brick, 2⅝x8¼ inches. Sheets, 28x60 inches. Weight, per square, painted, 64 pounds; galvanized, 78 pounds. **Rock Face Brick Steel Siding in beauty of appearance has no superior.** This material should be painted again the color desired after it is put on the building and then striped between the brick to represent the mortar lines, which makes an especially fine looking building. The bricks are of the standard size and we furnish these sheets either painted red, sandstone color or galvanized, as specified below. We do not cut sheets. A square consists of a little more than 8⅓ sheets. **Rock Face Brick Steel Siding is shipped direct from the steel mills in CENTRAL OHIO.**

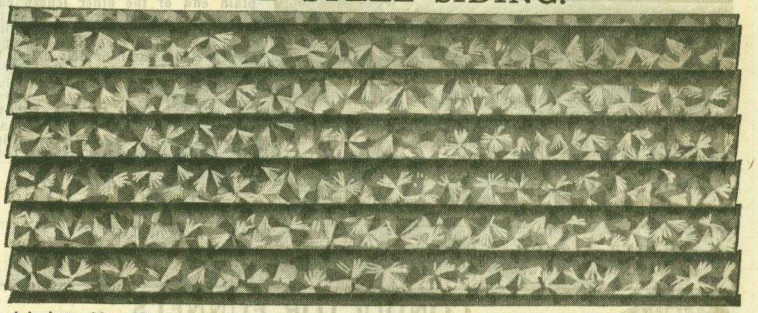
WEATHERBOARD STEEL SIDING.

48c PER SHEET PAINTED OR 91c PER SHEET GALVANIZED GUARANTEED FULL 28-GAUGE.



Each sheet shows six boards 4 inches wide. Sheets, 96 inches long. Weight, per square, painted, 75 lbs.; galvanized, 91 lbs. **Used extensively as siding on frame buildings.** Cheap, durable and fireproof, and is desirable for use in place of wood weatherboarding. Six and one-quarter sheets 24x96 inches form a square, which will lay 100 square feet on building, less the laps at the ends of the sheets. Each sheet shows six boards 4 inches wide. Can be applied either directly to studding 16 inches from centers or on rough sheathing. In order to provide for 1-inch end laps, place every sixth stud 15 inches from centers. When applying to sheathing place nails 4 to 6 inches apart along the horizontal laps and immediately under the projecting crimp. When applying to studding nail to each stud. Nail end laps at the upper edge of each face or board. Sheets may be cut to fit as desired with ordinary tinners' snips. **Weatherboard Steel Siding is shipped direct from the steel mills in CENTRAL OHIO.**

HOW TO ORDER PIPE AND GUTTER.

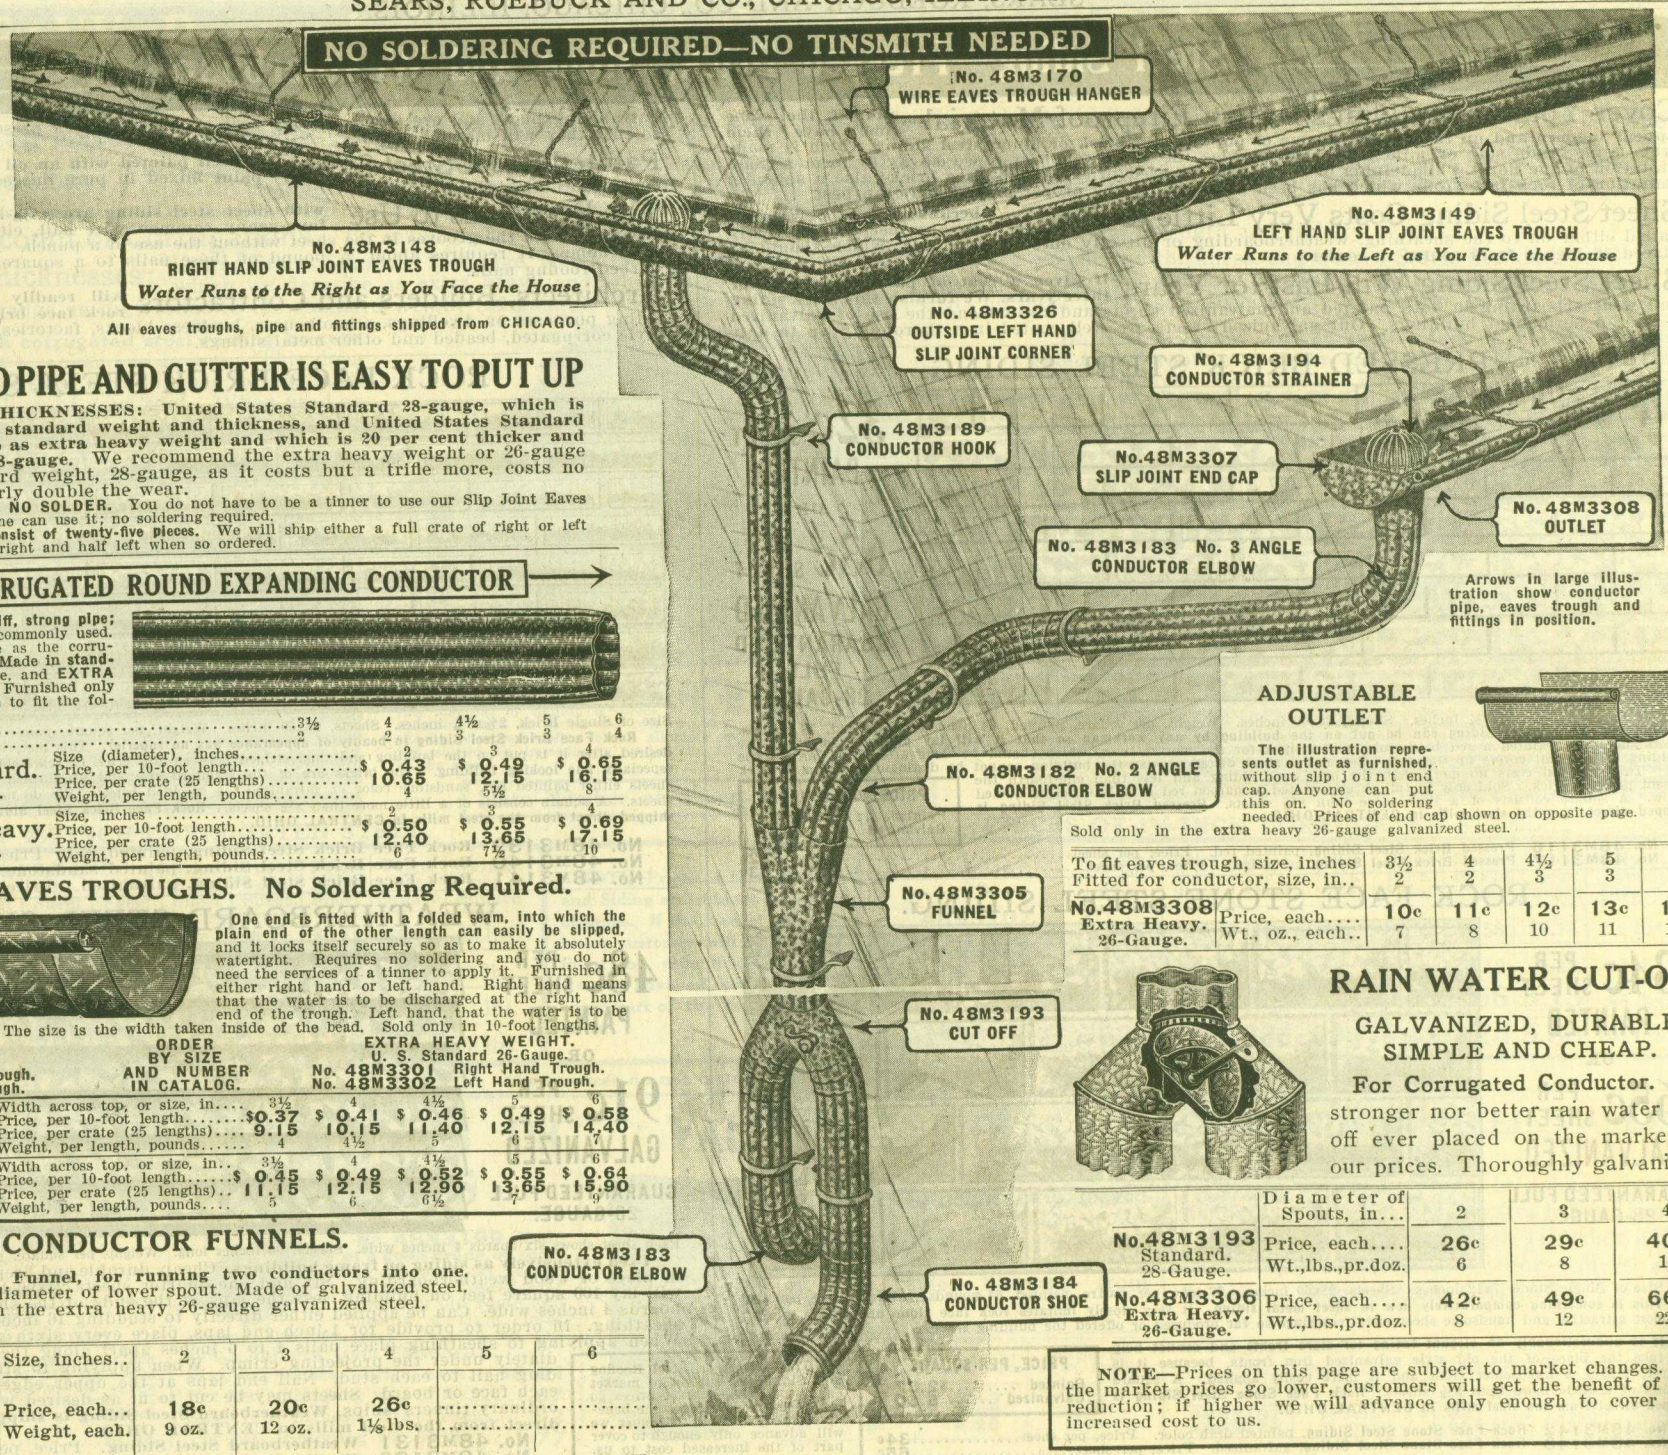
First. Be sure to state how much left hand and how much right hand Eaves Trough you need.

Second. Make a list of fittings for Eaves Troughs such as Miters, Hangers, End Caps and Outlets. These should be **exactly the same size** as the Eaves Trough.

Third. State how much Conductor Pipe or Down Spouts you will need and be sure to order the proper size to fit the Eaves Trough. **Conductor Pipe is always smaller than the Eaves Trough.** For instance, 3-inch Conductor Pipe should be used with 4½ or 5-inch Eaves Trough.

Fourth. Make a list of fittings which go with Conductor Pipe, such as Elbows, Conductor Hooks, Strainers, Funnels and Cut-offs. These should be ordered exactly the same size as Conductor Pipe.

NO SOLDERING REQUIRED—NO TINSMITH NEEDED



All eaves troughs, pipe and fittings shipped from CHICAGO.

Arrows in large illustration show conductor pipe, eaves trough and fittings in position.

OUR GALVANIZED PIPE AND GUTTER IS EASY TO PUT UP

WE FURNISH TWO THICKNESSES: United States Standard 28-gauge, which is known the country over as standard weight and thickness, and United States Standard 26-gauge, which we describe as extra heavy weight and which is 20 per cent thicker and heavier than the standard 28-gauge. We recommend the extra heavy weight or 26-gauge in preference to the standard weight, 28-gauge, as it costs but a trifle more, costs no more to hang and gives nearly double the wear.

OUR SLIP JOINT REQUIRES NO SOLDER. You do not have to be a tinner to use our Slip Joint Eaves Trough and Conductor Pipe. Anyone can use it; no soldering required.

Full crates of eaves troughs consist of twenty-five pieces. We will ship either a full crate of right or left hand or will pack the crates half right and half left when so ordered.

GALVANIZED CORRUGATED ROUND EXPANDING CONDUCTOR

Corrugated conductor makes a stiff, strong pipe; is easily put together and is most commonly used. It will not burst when full of ice as the corrugations allow the pipe to expand. Made in **standard weight U. S. standard 28-gauge, and EXTRA HEAVY U. S. standard 26-gauge.** Furnished only in 10-foot lengths. They are made to fit the following eaves troughs:

Size of eaves trough, inches	3½	4	4½	5	6
Size of conductor, inches	2	2	3	3	4
No. 48M3180 Standard. U. S. Standard 28-Gauge. Size (diameter), inches	2	3	3	4

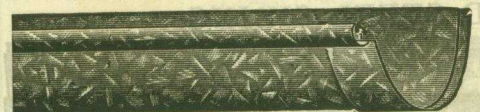
Price, per crate (25 lengths)	12.40	13.65	13.65	17.15	
Weight, per length, pounds	6	7½	7½	10	

SLIP JOINT EAVES TROUGHS. No Soldering Required.



One end is fitted with a folded seam, into which the plain end of the other length can easily be slipped, and it locks itself securely so as to make it absolutely watertight. Requires no soldering and you do not need the services of a tinner to apply it. Furnished in either right hand or left hand. Right hand means that the water is to be discharged at the right hand end of the trough. Left hand, that the water is to be discharged at the left hand end. The size is the width taken inside of the bead. Sold only in 10-foot lengths.

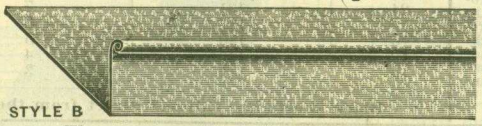
LE B

is illustration ows how hangers e to be applied.

Plain Roof Gutter

Made of 28-Gauge Galvanized Steel or Extra Heavy 26-Gauge.



STYLE B

The accompanying illustrations show our style "B" Roof Gutter. The hangers are applied in such a manner as to leave no exposed nail or screw heads (as the pictures readily show); therefore, there can be no leaks from splitting or nail holes, as in the old style way with wood fronts and wood brackets. This

le gutter is sold at prices that make it much cheaper than those made of wood lined with tin.

Plain Galvanized Roof Gutter, in lengths of 10 feet, 5/8-inch bead. End pieces and drops must made by the workman who puts up the gutter and all joints must be soldered.

SEND IN YOUR ORDER NOW

DO YOUR REPAIRING IN GOOD WEATHER.

BY ALL MEANS SEND IN YOUR ORDER EARLY FOR STEEL ROOFING, PAINTED OR GALVANIZED, TWO OR THREE-CRIMP STEEL, PRESSED BRICK AND ROCK FACE STEEL SIDING, GALVANIZED SHEETS, PRESSED STANDING SEAM ROOFING, EAVES TROUGH, CONDUCTOR PIPE AND OTHER ACCESSORIES IN THE STEEL ROOFING LINE. Take advantage of the low prices we are now quoting. We have a big stock and can give you quick service. Every steel product listed in this catalog is guaranteed to be as good as can be produced in its class and we will sell it to you at a considerably lower price than you would have to pay elsewhere.

ORDER THE HIGHEST GRADE—U. S. STANDARD 26-GAUGE STEEL.

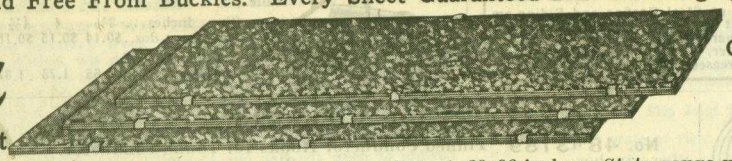
We advise that you purchase our extra heavy grade 26-gauge steel, which is 20 per cent thicker and heavier than the 28-gauge steel. It will wear nearly twice as long and is only slightly higher in price. In all building operations, repairing or remodeling, it is a good idea to purchase the highest grade, as it is cheapest in the end. You should not hesitate about sending us your order for 26-gauge steel roofing material when we can give it to you for less money than you will have to pay for a lighter gauge elsewhere. Again we urge you to send in your order early and protect yourself against any possible advance in price.

You run no risk in sending us your order at any time for steel roofing material. Should there be any decline in prices, we will give you the benefit and return any difference in price that may be due you. We always aim to sell this material at the very lowest manufacturing cost with but one profit added.

GALVANIZED STEEL SHEETS.

Flat and Free From Buckles. Every Sheet Guaranteed Fine Working Quality.

92c Per Sheet



Our Prices Save You Money.

No. 48M3225 Galvanized Steel Sheets. Size of sheet, 28x96 inches. **State gauge wanted.**

No. 1 Quality Black Slate

Black Slate is a well known covering for roofs. Our slate is furnished with holes punched ready for nailing; therefore, it is easy to put on and the services of a roofing expert are not needed. In order that your slate will reach you in perfect condition we ship it all perfectly crated unless it is ordered in carload lots of sixty-five squares or more, in which case it can be safely shipped uncrated at a saving of $1.00 per square on the price, which is the exact amount we save by not crating, and it also takes a lower freight rate. A carload of sixty-five squares of slate is just enough for three medium size houses or two very large houses. **Shipped from slate quarries in PENNSYLVANIA.**

Weight, per Square, Crated, 850 Pounds.
Weight, per Square, Not Crated, 650 Pounds.

No.	Size	Price, per Square, Punched and Crated	Price, per Square, Punched but Not Crated, in Lots of 65 Squares or More
48M3097	6x10	$3.35	$2.35
48M3098	8x14	5.90	4.90
48M3099	10x14	5.95	4.95

We will be glad to quote special prices on lower grade slate for barns and other buildings not needing as good a grade of slate as required on houses.

No. 48M3055 Tarred Felt to be used under slate, 500 square feet per roll. Weight, per roll, 60 pounds. Price.....$2.75

HIP SHINGLES

p Shingle.

Hip Shingles are designed for the covering of hips of roofs, either straight or curved. These shingles are intended to take the place of plain tin strips, wood or metal rolls, etc. They can be adjusted to the different widths shown to the weather and make a very ornamental hip finish.

The drifting of snow and the curling of shingles are overcome by the use of these hip shingles.

There is no need to make close joints in the shingles at the hips, as the offset or shoulder at the sides (which fits snug against the butt of the shingle) forms a gauge and guide by which to keep them straight.

They may be used with shingles, slate, felt or any of the flat styles of metal roofings. Size, 4x9 inches. Sold only in full crates of 250 shingles.

No. 48M3133 Steel Hip Shingles, painted on both sides. Crate containing 250 shingles. Weight, 50 pounds.
Price, per crate.....**$2.45**

No. 48M3135 Tin Hip Shingles, painted on both sides. Crate containing 250 shingles. Weight, 50 pounds.
Price, per crate.....**$3.03**

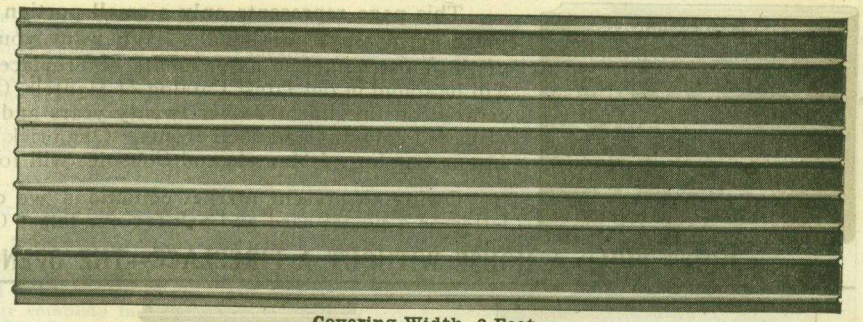
LOW PRICES ON BEADED CEILING

$2.87 PER SQUARE FOR BEADED CEILING or SIDING



Covering Width, 2 Feet.

Sheets when beaded cover 24 inches from center to center of outside beads. The beads are small corrugations ⅜ inch wide and ⅛ inch high and 3 inches from center to center. This style of ceiling is very desirable in stores, churches, warehouses, factories, engine rooms, boiler rooms, public halls, paper mills, glass factories, etc. It is fireproof, and can be easily cleaned with plain soap and water when necessary. Made of high quality steel, painted on both sides. The sheets should be lapped 1 or 2 inches at ends and over one crimp at sides. They can be applied perpendicularly or horizontally (as desired) to boards, studding or joists placed the proper distance apart, or can be put on over old plaster. **Shipped from steel mills in CENTRAL OHIO.** Weight, per square, 70 pounds.

When ordering single sets always give size of mantel opening, size of fireplace opening and of hearth wanted. All tile except 61M64015 comes in both plain and mottled colors. **All tile shipped from factory HIO.**

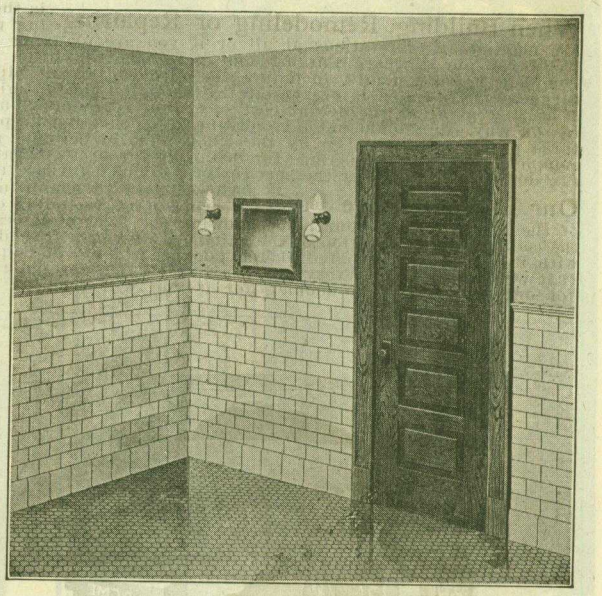
Tile Makes the Bathroom and Kitchen Sanitary

A COMPLETE LINE OF FLOOR AND WALL TILE.

The use of tile for the floors and walls of a bathroom or kitchen should be favorably considered by everyone who is building a home or who expects to make alterations in his present home. There are few things which add so much to the real usefulness as well as to the appearance of a bathroom or kitchen as a tiled floor and walls.

Tile is absolutely impervious to moisture. No such satisfactory surface material can be secured in any other way. Before you build send us the plans for your bathroom, kitchen and vestibule, and let us furnish you an estimate of the cost of tile for floors and wainscoting.

With our complete instructions you can lay the tile yourself and do as good a job as any high priced tilewright.



PLAIN WHITE WALL TILE.

Plain wall tile in standard sizes, 6x2 and 6x3 inches, for only 22½ cents per square foot. In the illustration the tile wainscoting is shown complete with a 6-inch sanitary cove base and a plain molded cap. The base and cap are always figured separately and the price varies with the number of corner angle pieces and door and window stop pieces. If you will send us a drawing of your bathroom or kitchen or any room in which you want tile wainscoting, showing the location of all doors, windows and offsets, and tell us how high up on the walls you want the tile to come, we will be glad to give you a complete estimate of the cost of the tile, including the cap and base. If you want plain wall tile without cap and base, you can order right from this page as many square feet as you need.

No. 61M61150 White Enameled Wall Tile. Price, per square foot.....**22½c**
Shipped from the tile works in OHIO, from which point customer pays the freight.

For instructions on how to lay tile see pages 4 and 5 in our Special Tile Book, which will be mailed free for the asking.

PURE WHITE FLOOR TILE.

Design No. 61M61000.

Shipped from the tile works in OHIO, from which point customer pays the freight.

1 -Inch White Hexagons, mounted on paper.	Price, per square foot.....	**16c**
1¼-Inch White Hexagons, mounted on paper.	Price, per square foot.....	**18c**
2 -Inch White Hexagons, not mounted.	Price, per square foot.....	**24c**

We can also furnish plain white ¾-inch squares or plain white 13-16-inch rounds mounted on paper for 16 cents per square foot.

Floor tile averages about 3 pounds to the square foot and wall tile about 5 pounds to the square foot.

Write for Our Latest Special Tile Color Book

A postal card will bring the catalog to you.

$29.58 AND UP

Warm Air Furnaces for Modern Heating and Ventilating

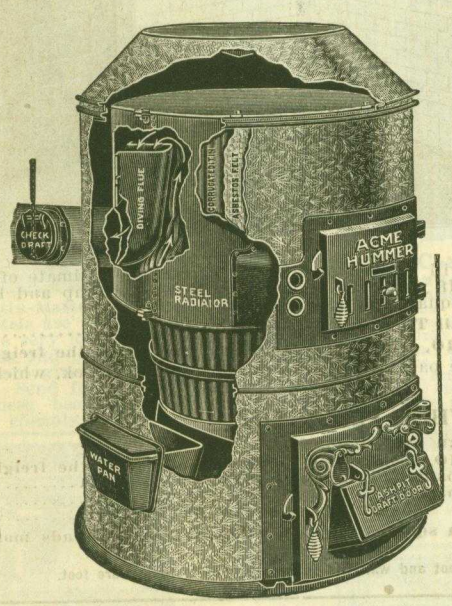
$29.58 AND UP

When Building, Remodeling or Repairing, is the best time to install a warm air heating plant. Don't overlook this and if you are making any alterations at all or if you are planning to put up a new home by all means write for our Furnace Catalog and get our proposition on warm air furnaces. We furnish complete heating plants, including the furnace and all pipes, registers and other fittings. Our furnaces are installed in every state in the Union and are giving perfect satisfaction. We sell you a heating plant at the actual cost of manufacture plus our one margin of profit. There is no reason why you should not take advantage of this and keep in your own pocket the other two or three profits usually taken by the wholesaler, jobber and retail furnace man. We give you full, complete and easy instructions for installing furnaces so that any common handy man or mechanic can do the work without the services of a regular furnace man.

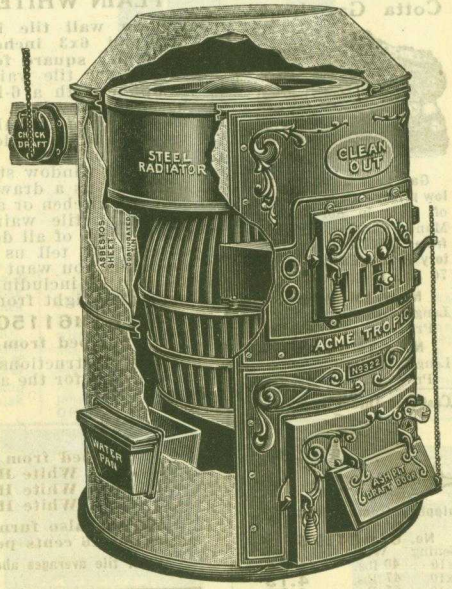
Our Estimates Are Free. **All we need to enable us to give you a price on a complete heating plant, including everything necessary,** is a rough sketch of the floor plans of your home showing the sizes and location of the rooms with the height of the ceiling and the location of the chimney. If you will send for our Furnace Catalog, you will get with it a specially prepared sketch booklet which will help you in making up your drawing, so that we can give you a very low price on all the material required. But you do not need to wait for our regular sketch booklet, for if you will send us any kind of a sketch, giving us the necessary information, we can send you our price by return mail. You are under absolutely no obligation to us when you receive the estimate, and we will not bother you with form letters asking you to buy. We depend alone upon our low price and our strong guarantee to secure your order.

NO STRONGER GUARANTEE EVER MADE

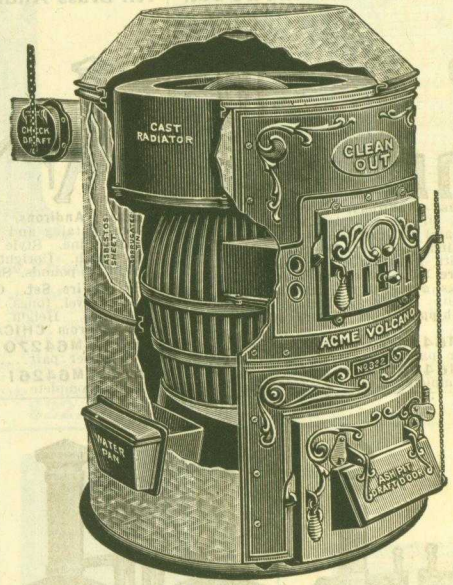
We have the greatest confidence in our furnaces, and in order to convince our customers of their absolute superiority we have sold them for over ten years under the following liberal offer: If, after installing the furnace in accordance with our plans and specifications, properly connecting it to a chimney flue of ample size and in good condition, and correctly operating it, it does not give absolutely perfect satisfaction, heating the building throughout to an average temperature of 70 degrees in the coldest winter weather, we stand willing and ready to accept its return to our factory at our expense and to return the entire purchase price and all transportation charges paid.



SHIPPED FROM FOUNDRY IN OHIO.



WRITE FOR OUR SPECIAL FURNACE CATALOG.



ACME HUMMER FURNACE FOR SOFT COAL OR WOOD.

While this furnace is designed especially for soft coal or wood, it is a good all around furnace and will burn any kind of fuel. The large combustion chamber or radiator is made of heavy gauge cold rolled steel with cast iron top and the fire pot is cast in two sections, which absolutely prevents warping or cracking. A very good furnace for the money.

A supplementary grate for use when burning wood alone is furnished for any size Hummer Furnace for $2.00 extra.

ACME TROPIC FURNACE FOR HARD (ANTHRACITE) COAL OR COKE.

The Acme Tropic is a circular radiator furnace, being equipped with a heavy steel plate radiator, giving the maximum amount of utilized radiating surface above the fire pot and insuring the most economical consumption of fuel. Steel is the best heat radiating material known. We recommend our Acme Tropic Furnace as a very quick heater. For hard coal or coke, always select the Acme Tropic.

ACME VOLCANO FURNACE FOR EITHER HARD OR SOFT COAL.

Our highest type furnace. Our Acme Volcano Furnace will burn either hard or soft coal equally well, and will give perfect satisfaction. The heavy cast iron radiator is proof against the attack of sulphur fumes in soft coal and is specially constructed so that it is perfectly gastight. We offer the Acme Volcano in competition with any furnace of any name, make or price on the market, and guarantee that you will get just as good results. If you pay more than our price you are giving someone an extra profit or you are paying for some patented device that does not add one heat unit to the efficiency of the furnace.

Catalog No.	Diameter Casing, In.	Diameter Fire Pot, Inches	Heating Capacity, Cubic Feet	Shipping Weight, Pounds	Price, With Casing, as Shown

Beauty and Harmony When Combined With Quality and Economy

Are the Main Attributes to a Well Furnished Home.

The BEAUTY of the home is largely due to the lighting fixtures, and an otherwise attractive house can be marred by unattractive and cheap fixtures. We are offering in this catalog a very large and complete line for your selection of the newest and most popular designs and latest ideas in electric and gas lighting; embracing direct, indirect and semi-indirect styles, including chandeliers, showers, domes, bowls, pendants, brackets and portables, both ornate and plain, as well as French, English and Colonial period designs.

The QUALITY is a most important point to be considered, as there may be many fixtures similar in appearance which differ greatly in the characteristics which go to make up quality, such as gauge (thickness) of metal, construction, workmanship and finish. In selecting our fixtures we have given particular attention to these points. In addition every fixture and sundry is rigidly inspected by us before we ship them.

Fixtures Shipped Completely Wired and Assembled Ready to Hang.

The chief fear in the minds of some people when buying an electric fixture is that they will be unable to put it up or, if they hire an electrician to do the work, they think that he will overcharge them or refuse to erect the fixture because it was not purchased from him. To overcome these difficulties we are prepared to ship our fixtures **completely wired and assembled, all ready to erect.** By this we mean that in all the wired electric and combination fixtures the sockets are attached to the arms and the arms are fitted into the body with all wired connections taped and insulated according to the rules of the Board of Insurance Underwriters. The fixture reaches you **complete in one piece.** Anyone, without electrical experience, can erect it easily and quickly without requiring any special tools. All you have to do is attach the fixture to the wall or ceiling and connect the two wires at the end of the fixture stem to your house wires.

OUR GUARANTEE

Each lighting fixture you buy from us is sold with the understanding and agreement that it MUST SATISFY YOU PERFECTLY. We guarantee that each and every article listed in this catalog is exactly as described and illustrated. If there is the slightest dissatisfaction because of quality, style, size or for any other reason whatever, we expect you to return the article and we will then exchange it for exactly what you want, or return your money, as you wish, including any transportation charges you have paid. WE DO NOT CHARGE EXTRA for boxing or cartage of our fixtures. Our prices include delivery of the merchandise on board the freight or express cars in Chicago, securely and safely boxed. You pay the transportation charges from Chicago to your station. We guarantee safe delivery of all our lighting fixtures, parts and glassware, and WILL MAKE GOOD, WITHOUT EXTRA CHARGE, ANY BREAKAGE OR DAMAGE IN TRANSIT.

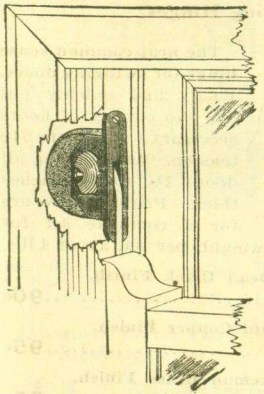
WINDOW TRIM

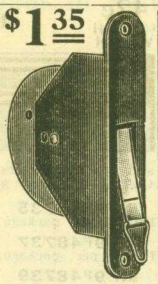


All Steel Unit Sash Balances

$1.35

Better and Cheaper Than Sash Cord and Weights.

No. 9P47552 **Suitable for old or new work.** Noiseless, work more smoothly and cheaper to install than cord and weights. One size face plate for different weights of sash so that for new work all mortises may be cut at the mill when the frames are made, just as mortises are now cut for ordinary pulleys. As quickly applied to old work as a common sash pulley. Round end makes mortising easy. Size of face plate, 1¼x5½ inches.



GUARANTEED FOR TEN YEARS.

Size No. 1.	Weight, each, about 3½ pounds.	Weight of each sash,	6 to 7 pounds.
Size No. 2.	Weight, each, about 3½ pounds.	Weight of each sash,	8 to 9 pounds.
Size No. 3.	Weight, each, about 4 pounds.	Weight of each sash,	10 to 11 pounds.
Size No. 4.	Weight, each, about 4 pounds.	Weight of each sash,	12 to 13 pounds.
Size No. 5.	Weight, each, about 4½ pounds.	Weight of each sash,	14 to 15 pounds.
Size No. 6.	Weight, each, about 5½ pounds.	Weight of each sash,	16 to 17 pounds.
Size No. 7.	Weight, each, about 5½ pounds.	Weight of each sash,	18 to 19 pounds.

State size wanted. Price, all sizes, per set of **4** for **2** sash..**$1.35**

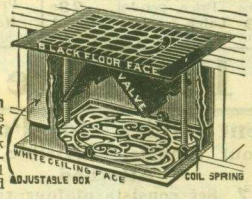
Combination Floor and Ceiling Register and Ventilator.

Saves Heat.

$1.45 AND UP



Makes One Stove Do the Work of Two.

Keeps that cold room upstairs warm and comfortable with the heat that is ordinarily wasted near the ceiling of the room below. Consists of a black floor register with valves, a white ceiling plate and an adjustable sheet metal box connecting the two. Easily and quickly put into position; just cut the holes in floor and ceiling, place the register and ceiling plate in position and hook the two coil springs that hold them together. **Adjustable to fit any floor and ceiling from 7 to 12 inches apart.** Will take 6-inch pipe on all sizes.

$10.00

Contractors and Builders, Why Pay More?

It does the work of higher priced scrapers.

Our Floor Scraper, $10.00

$10.00

Does the work of three men with hand scrapers; saves time and labor; leaves the floor smooth and level; does away with the hard back breaking job of scraping floors by hand. As operator draws scraper toward him, the blade works upon the floor similar to the action of a hand scraper, the weight of the machine giving force to the pull, preventing jumping or leaving a wavy effect. This scraper does as fine work as any similar tool on the market, no matter what price may be asked for it. It works close up to the wall, is easy to operate and soon pays for itself in time saved. Blades are 6 inches wide, made of steel, tempered very tough and hard. Wheels are rubber tired to prevent scarring the floor. Entire tool is neatly finished. Shipping weight, about 122 pounds. Our price includes one extra blade.

No. 9P55639 Price, complete.....**$10.00**
No. 9P55640 Extra Blades, each..... **.25**

INCANDESCENT GAS AND GASOLINE MANTLES.

We quote our mantles in a handy family size package containing six mantles. Selling them by the half dozen enables us to quote you a lower price than if sold singly and always assures you having a mantle in the house if the one on the lamp should break suddenly.

Hercules Heating Systems Mean Comfort and Economy for You

$91.93 FOR A COMPLETE STEAM HEATING PLANT FOR A 6-ROOM HOUSE | WE FURNISH A COMPLETE HOT WATER HEATING PLANT FOR A 6-ROOM HOUSE FOR $117.92

INCLUDING BOILER, RADIATORS, PIPING, VALVES AND FITTINGS

To what extent will you enjoy your new home next winter? Will you install an efficient heating system that will warm every room to a summerlike temperature, or will you depend upon an out of date method of heating that cannot prove satisfactory? A system which heats but two or three rooms to a greater temperature than is actually required while the remainder of your home must be shut up because the heat will not penetrate to it.

Your MODERN home will be modern, comfortable and up to date if you include a HERCULES Steam or Hot Water Heating Plant with your order for the building material. A Hercules plant will bring you and your family many comforts. The children may play upon the warm floors or go from room to room, as the heat will be evenly distributed throughout the entire house. Your wife can use the sewing room without her fingers becoming stiff from the cold, and you may sit in your favorite easy chair and enjoy your evening paper without cold chills running up and down your spine. With a Hercules Heating Plant installed you and your loved ones will enjoy your home during the cold winter months with the same freedom as you did during the summer time.

Our heating plants are thoroughly reliable, our prices are within your means.

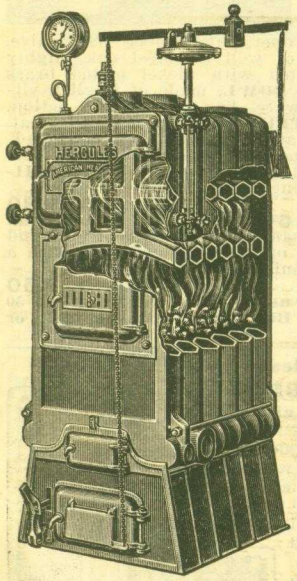
Send us a sketch of your building, giving the sizes of the different rooms, the height of the ceilings and the number and sizes of the windows and outside doors. We will then furnish you, without charge, an itemized estimate and complete specifications covering a Hercules Heating Plant which we guarantee to properly warm your home without the necessity of forcing the fire at any time.

A Hercules plant is within your reach even though you may be of limited means, as our prices are reasonable and our working drawings and instructions make the installation of the system so simple a matter that you may do the work yourself, should you so desire, even though you have had no previous experience in this kind of work.

WRITE FOR MODERN HEATING CATALOG.

In it we show a complete line of boilers, radiators, valves, pipe, fittings and all other material needed for erecting a complete heating plant. It also explains how we handle our immense heating business and how we make you every possible saving in time and labor of handling, from the time you request an estimate until your Hercules Heating Plant reaches you.

Hercules Hot Water and Steam Boilers.



These boilers are of the vertical sectional type and have all the advantages of the round boiler, such as compact fire pot and simplicity of construction, while they also have the superior advantages of the sectional boiler such as long fire travel, increased heating surface and the correct proportions between the grate and heating surface. The fire pot is deep and return flues ample, making the boiler economical in fuel consumption and requiring but very little attention. It will carry coal enough to maintain perfect combustion for twelve hours under ordinary conditions. It has the proper interior circulation which is of special advantage for steam, as the steam is more easily generated and is quickly separated from the water, so the water is not carried up into the pipes with the steam. The boiler is thoroughly tested before leaving the factory and is made up and shipped in two parts; base and grates in one part and the sections in the other, which makes it easy to erect. Its compact form enables it to be carried into a building as easily as a radiator.

Steam boilers are furnished complete with trimmings, such as steam gauge, water gauge, damper regulator, and safety valve. These are not necessary with a hot water boiler. All boilers are furnished complete with firing tools, such as poker, hoe and flue brush.

Shipped from factory in WESTERN NEW YORK.

Comfort Plain Pattern Radiators for Steam and Hot Water.

Made of good quality cast iron, properly machined and tested. The graceful, artistic outline and plain design of the sections give Comfort Radiators a rich pleasing appearance, and the smooth flat surfaces, leaving no hollows or corners in which dust and dirt may collect, make them suitable for any room.

While only three-column radiators are shown below, we can furnish single, two and five column radiators. For full information write for our "Modern Heating Systems" Catalog.

When ordering be sure to state whether radiators are wanted for steam or hot water, number of sections, height and whether single, two, three or five-column. Also state size and position of tappings, otherwise tappings will be as follows:

STEAM RADIATORS ARE TAPPED AS FOLLOWS:

Up to 24 feet.....1-inch supply
24 feet to 50 ft..1¼-inch supply
50 feet to 100 ft..1½-inch supply
Over 100 feet.....2-inch supply

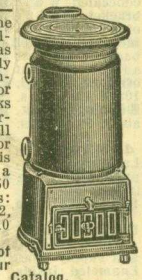
HERCULES TANK HEATER.



Burns any kind of fuel—coal, coke or wood. Just the thing for heating range boilers and storage tanks, so as to have an abundant supply of hot water during the summer months. Also used for heating stock and other tanks in winter that would otherwise freeze. A very small shovelful of coal once or twice a day is all that is necessary. Suitable for a pressure of not over 40 or 50 pounds. Shipping weights: No. 110, 185 pounds; No. 112, 190 pounds; No. 115, 210 pounds.

A more complete line of these heaters is shown in our "Modern Heating Systems" Catalog.

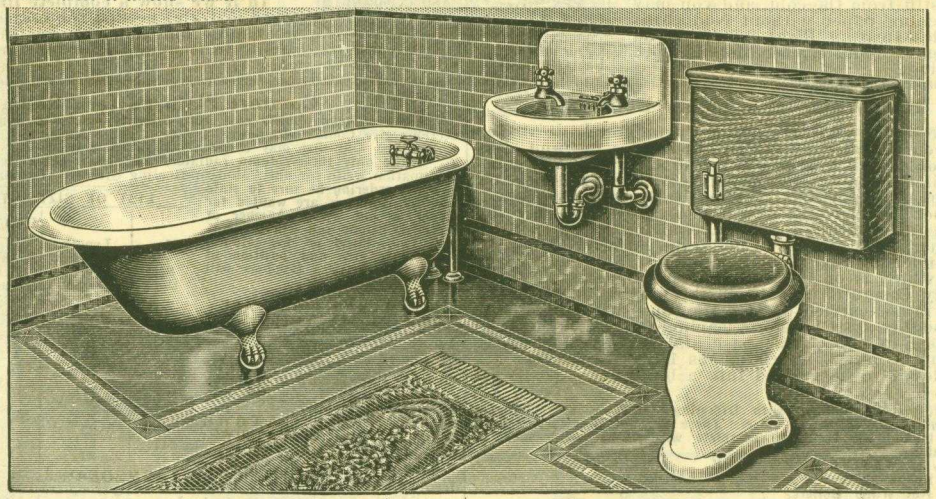
PERFECTION BATHROOM OUTFIT.

A strictly high grade combination. A practicable up to date outfit in keeping with the finest bathroom, at a price within the reach of even those of limited means.



Furnished with low down siphonic action closet, porcelain enameled wall lavatory and 5-foot cast iron porcelain enameled bathtub.

THE BATHTUB is 5 feet long, graceful in appearance, roomy and sides proper height to prevent water splashing over. Made of cast iron, has 3-inch roll rim and is white porcelain enameled inside, painted outside. Furnished with nickel plated brass No. 4½ Fuller bath cock, combination waste and overflow pipes and two ½-inch offset supply pipes.

THE LAVATORY, supported by concealed wall hanger, is cast iron porcelain enameled and measures 18x21 inches with an 8-inch back and 4-inch apron. It has sanitary soap tray cast in top above overflow and is neat and attractive. Fitted with 1¼-inch nickel plated brass P trap with waste to wall; two nickel plated brass compression basin cocks with china tops, one marked hot, the other cold, and two nickel plated brass supply pipes from basin to wall.

THE CLOSET is sanitary, up to date and substantially constructed. It will pass the most rigid inspection. Bowl is siphon washdown made of English vitreous earthenware properly glazed and baked, assuring a smooth glossy surface. Seat is golden oak, highly polished, fitted with nickel plated brass offset hinges. Tank is golden oak, thoroughly seasoned, nicely polished, lined with copper, capacity 6½ gallons, fitted with rubber ball valve, the type now universally used. Valve is operated by pearl top push button located near side of tank. Closet outfit furnished complete with tank, seat, bowl, nickel plated brass supply and flush pipes and closet screws to fasten bowl to floor.

WE GUARANTEE this bathroom outfit to satisfy you in every way or return your money.

SHIPPING. Closet outfit shipped from CHICAGO. Shipping weight, about 95 pounds. **Bathtub and lavatory shipped from LAYTON PARK, WIS.** Shipping weight, about 380 pounds.

No. 42M9214⅓ Perfection Bathroom Outfit, complete. Price.....**$38.50**

No. 42M2214⅓ Same as above, except waste and supply pipes to floor instead of to wall. Price.....**$38.60**

Above outfit with all fittings threaded for iron pipe connections $1.50 extra.

Standard Range Boilers.

Guaranteed for one year to withstand a pressure of 85 lbs. Most so called 30, 40 and 52-gallon range boilers do not actually have these capacities. They are rated according to a trade custom which specifies that boilers of certain dimensions shall be known as having capacities of 30, 40 and 52 gallons. All boilers listed below have the capacities marked upon them and are guaranteed to be full size. They are first shaped and riveted and then galvanized inside and out. This covers all parts of the boiler with a coating of zinc and protects it from rusting. Range boilers are used for storing hot water where they can be connected to the city water, an elevated tank or a pneumatic water system. The water is heated by a coil in the kitchen stove or furnace, or by a gas or coal water heater. Instructions for installing furnished upon request.

A stand, inner tube and set of brass couplings for lead pipe connection are included with each boiler.

No.	Cap., Shpg. Wt., Gal. Abt. Lbs.	Price
42M1081¼	30 90	$ 7.35
42M1083¼	40 101	9.00
42M1084¼	52 155	13.00

If galvanized couplings are wanted for iron pipe connection add 20 cents extra.
